**Rethink Your Mainframe Applications: Reasons and Approaches for Extension, Transformation, and Growth** Mike Ebbers,Alex Louwe Kooijmans,Michael Lowe,Helene Lyon,Stan Washington,Gary Wicks,IBM Redbooks,2013-05-04 Today there are new and exciting possibilities available to you for creating a robust IT landscape. Such possibilities include those that can move current IT assets into the twenty-first century, while supporting state-of-the-art new applications. With advancements in software, hardware and networks, old and new applications can be integrated into a seamless IT landscape. Mobile devices are growing at exponential rates and will require access to data across the current and new application suites through new channels. Cloud computing is the new paradigm, featuring anything from SaaS to full server deployment. And although some environments are trying to virtualize and secure themselves, others such as IBM® zEnterprise® have been at the forefront even before cloud computing entered the scene. This IBM RedpaperTM publication discusses how transformation and extensibility can let you keep core business logic in IBM IMSTM and IBM CICS®, and extend BPM, Business Rules and Portal in IBM WebSphere® on IBM z/OS® or Linux on IBM System z® to meet new business requirements. The audience for this paper includes mainframe architects and consultants.

Batch Modernization on z/OS Mike Ebbers,Elsie Ramos,Snehal Antani,Patrick Bruinsma,Manuel Mueller,Martin Packer,Christian Strauer,Sridhar Sudarsan,Susann Thomas,Andreas Wagner,Janet Wall,IBM Redbooks,2012-07-26

Mainframe computers play a central role in the daily operations of many of the world's largest corporations, and batch processing is a fundamental part of the workloads that run on the mainframe. A large portion of the workload on IBM® z/OS® systems is processed in batch mode. Although several IBM Redbooks® publications discuss application modernization on the IBM z/OS platform, this book specifically addresses batch processing in detail. Many different technologies are available in a batch environment on z/OS systems. This book demonstrates these technologies and shows how the z/OS system offers a sophisticated environment for batch. In this practical book, we discuss a variety of themes that are of importance for batch workloads on z/OS systems and offer examples that you can try on your own system. The audience for this book includes IT architects and application developers, with a focus on batch processing on the z/OS platform.

*Steal this File Sharing Book* Wally Wang,2004 Steal This File Sharing Book tackles the thorny issue of file sharing networks such as Kazaa, Morpheus, and Usenet. It explains how these networks work and how to use them. It exposes the dangers of using file sharing networks--including viruses, spyware, and lawsuits--and tells how to avoid them. In addition to

covering how people use file sharing networks to share everything from music and video files to books and pornography, it also reveals how people use them to share secrets and censored information banned by their governments. Includes coverage of the ongoing battle between the software, video, and music pirates and the industries that are trying to stop them.
