Song Sheets to Software Elizabeth C. Axford,2004-06-24 The second edition continues to be a valuable source to printed music, music software, and Web sites useful to musicians, and includes interesting essays on the history of printed music, copyright laws, music theory fundamentals, and other topics. Many questions posed by musicians and others concerned with music production and instruction are answered with short, effective explanations (e. g., the duration of copyright, the concept of fair use, writing lead sheets, publishing music). Axford's volume will be especially useful to young musicians or others beginning a career in some aspect of music. A useful section, Web Sites for Musicians, reveals the book's currency: very few dead links were detected, attesting to careful updating from the first edition. The section Tech Talk: Terms A - Z provides brief definitions for many new terms used by musicians or technology specialists. A valuable desk reference for everyone involved in the music industry.

Music Apps for Musicians and Music Teachers Elizabeth C. Axford,2015-02-19 In today's digital age, learning and creating music has never been so easy and affordable. Anyone can enhance their musical knowledge, skills, and creativity

with the multitude of music apps available. However, sifting through thousands of music apps in the Apple App Store and Google Play can be a daunting task for any musician or music instructor. But not anymore! Having spent countless hours researching the most interesting useful, educational, fun, and easy-to-use music apps, Elizabeth C. Axford in *Music Apps for Musicians and Music Teachers* surveys the landscape of music-related apps for both iOS and Android mobile devices, including tablets and smartphones. *Music Apps for Musicians and Music Teachers* lists hundreds of music-related apps organized by category, including singing, musical instruments, music theory and composition, songwriting, improvisation, recording, evaluating music performances, listening to music, music history and literature, music appreciation, and more. App developers are listed with each app, including links to their websites for updates and support. The book sections and chapters align with the newly revised National Standards for Music Education released in 2014 by the National Association for Music Education. Suggested activities for educators are provided, as well as key terms and a bibliography. *Music Apps for Musicians and Music Teachers* is for anyone interested in music, whether hobbyist or professional. It enhances the ability to learn on the go by offering musicians, music students, and music instructors a list of the most useful music apps available.

Music's Immanent Future Sally Macarthur, Judy Lochhead, Jennifer Shaw, 2016-05-12 The conversations generated by the chapters in *Music's Immanent Future* grapple with some of music's paradoxes: that music of the Western art canon is viewed as timeless and universal while other kinds of music are seen as transitory and ephemeral; that in order to make sense of music we need descriptive language; that to open up the new in music we need to revisit the old; that to arrive at a figuration of music itself we need to posit its starting point in noise; that in order to justify our creative compositional works as research, we need to find critical languages and theoretical frameworks with which to discuss them; or that despite being an auditory system, we are compelled to resort to the visual metaphor as a way of thinking about musical sounds. Drawn to musical sound as a powerful form of non-verbal communication, the authors include musicologists, philosophers, music theorists, ethnomusicologists and composers. The chapters in this volume investigate and ask fundamental questions about how we think, converse, write about, compose, listen to and analyse music. The work is informed by the philosophy primarily of Gilles Deleuze and Felix Guattari, and secondarily of Michel Foucault, Julia Kristeva and Jean-Luc Nancy. The chapters cover a wide range of topics focused on twentieth and twenty-first century musics, covering popular musics, art music, acousmatic music and electro-acoustic musics, and including music analysis, music's ontology, the noise/music dichotomy, intertextuality and music, listening, ethnography and the current state of music studies. The authors discuss their philosophical perspectives and methodologies of practice-led research, including their own creative work as a form of research. *Music's Immanent Future* brings together empirical, cultural, philosophical and creative approaches that will be of interest to musicologists, composers, music analysts and music philosophers.
