**Health Informatics** Ramona Nelson, Nancy Staggers, PhD, RN, FAAN, 2013-06-14 Health Informatics: An Interprofessional Approach was awarded first place in the 2013 AJN Book of the Year Awards in the Information Technology/Informatics category. Get on the cutting edge of informatics with Health Informatics, An Interprofessional Approach. Covering a wide range of skills and systems, this unique title prepares you for work in today's technology-filled clinical field. Topics include clinical decision support, clinical documentation, provider order entry systems, system implementation, adoption issues, and more. Case studies, abstracts, and discussion questions enhance your understanding of these crucial areas of the clinical space. 31 chapters written by field experts give you the most current and accurate information on continually evolving subjects like evidence-based practice, EHRs, PHRs, disaster recovery, and simulation. Case studies and attached discussion questions at the end of each chapter encourage higher level thinking that you can apply to real world experiences. Objectives, key terms and an abstract at the beginning of each chapter provide an overview of what each chapter will cover. Conclusion and Future Directions section at the end of each chapter reinforces topics and expands on how the topic will continue to evolve. Open-ended discussion questions at the end of each chapter enhance your understanding of the subject covered.

*Digital Influence Mercenaries* James (J.F.) Forest, 2022-04-15 In today's online attention economy, supply and demand have created a rapidly growing market for firms and entrepreneurs using the tactics, tools, and strategies of digital influence warfare to gain profit and power. This book focuses on the more malicious types of online activity such as deception, provocation, and a host of other dirty tricks conducted by these "digital influence mercenaries." They can be located anywhere with an Internet connection--Brazil, China, Iran, Macedonia, Russia, Zimbabwe--and the targets of their influence efforts can be whomever and wherever they are paid to attack. They can do this for state governments willing to pay and provide their targeting instructions (usually in support of foreign policy objectives) and may have specific metrics by which they will assess the mercenaries' performance. Non-state actors (including corporations and political parties) can pay for these kinds of digital influence services as well. And in addition to being paid for services rendered, digital influence mercenaries can also profit simply by manipulating the targeted advertising algorithms used by social media platforms. James J. F. Forest describes in detail the various tools and tactics these mercenaries use to exploit the uncertainties, fears, and biases of their targets including bots, deep-fake images, fake news, provocation, deception and trolling. He also shows how they weaponize conspiracy theories and disinformation to manipulate people's beliefs and perceptions. Forest also highlights how government agencies and social media platforms are trying to defend against these foreign influence campaigns through such tactics as shutting down offending websites, Facebook pages, and YouTube channels; tagging disinformation with warning labels; identifying and blocking coordinated inauthentic behavior; and suspending social media accounts, often permanently. European and North American governments have launched numerous investigations against these mercenaries, and in some cases have brought criminal charges. Forest concludes with suggestions for how each of us can learn to identify disinformation and other malicious efforts and defend ourselves in the future.

**Food Fraud Prevention** John W. Spink, 2019-10-18 This textbook provides both the theoretical and concrete foundations needed to fully develop, implement, and manage a Food Fraud Prevention Strategy. The scope of focus includes all types of fraud (from adulterant-substances to stolen goods to counterfeits) and all types of products (from ingredients through to finished goods at retail). There are now broad, harmonized, and thorough regulatory and standard certification requirements for the food manufacturers, suppliers, and retailers. These requirements create a need for a more focused and systematic approach to understanding the root cause, conducting vulnerability assessments, and organizing and implementing a Food Fraud Prevention Strategy. A major step in the harmonizing and sharing of best practices was the 2018 industry-wide standards and certification requirements in the Global Food Safety Initiative (GFSI) endorsed Food Safety Management Systems (e.g., BRC, FSSC, IFS, & SQF). Addressing food fraud is now NOT optional - requirements include implementing a Food Fraud Vulnerability Assessment and a Food Fraud Prevention Strategy for all types of fraud and for all products. The overall prevention strategy presented in this book begins with the basic requirements and expands through the criminology

root cause analysis to the final resource-allocation decision-making based on the COSO principle of Enterprise Risk Management/ ERM. The focus on the root cause expands from detection and catching bad guys to the application of foundational criminology concepts that reduce the overall vulnerability. The concepts are integrated into a fully integrated and inter-connected management system that utilizes the Food Fraud Prevention Cycle (FFPC) that starts with a pre-filter or Food Fraud Initial Screening (FFIS). This is a comprehensive and all-encompassing textbook that takes an interdisciplinary approach to the most basic and most challenging questions of how to start, what to do, how much is enough, and how to measure success.

*Detecting Trust and Deception in Group Interaction* V. S. Subrahmanian, Judee K. Burgoon, Norah E. Dunbar, 2021-02-07 This book analyzes the multimodal verbal and nonverbal behavior of humans in both an artificial game, based on the well-known Mafia and Resistance games, as well as selected other settings. This book develops statistical results linking different types of facial expressions (e.g. smile, pursed lips, raised eyebrows), vocal features (e.g., pitch, loudness) and linguistic features (e.g., dominant language, turn length) with both unary behaviors (e.g. is person X lying?) to binary behaviors (Is person X dominant compared to person Y? Does X trust Y? Does X like Y?). In addition, this book describes machine learning and computer vision-based algorithms that can be used to predict deception, as well as the visual focus of attention of people during discussions that can be linked to many binary behaviors. It is written by a multidisciplinary team of both social scientists and computer scientists. Meetings are at the very heart of human activity. Whether you are involved in a business meeting or in a diplomatic negotiation, such an event has multiple actors, some cooperative and some adversarial. Some actors may be deceptive, others may have complex relationships with others in the group. This book consists of a set of 11 chapters that describe the factors that link human behavior in group settings and attitudes to facial and voice characteristics. Researchers working in social sciences (communication, psychology, cognitive science) with an interest in studying the link between human interpersonal behavior and facial/speech/linguistic characteristics will be interested in this book. Computer scientists, who are interested in developing machine learning and deep learning based models of human behavior in group settings will also be interested in purchasing this book.

Creativity, Innovation, and Change Across Cultures David D. Preiss, Marcos Singer, James C. Kaufman, 2023-07-26 This book offers interdisciplinary, multicultural, and international perspectives on the interrelation between culture, innovation, change and creative forces. Its wide-ranging contributions present theoretical and empirical approaches and with reference to different domains across disciplines including psychology, education, social sciences, humanities, and engineering. The authors demonstrate how urgent social, environmental, technological, and economic challenges can benefit from individual, and community creativity to effect change. In this volume, “culture” refers to sociocultural differences, educational culture, media culture, organizational culture, technological culture, ethnic differences within a culture, and digital culture. Its contributors offer fresh insights on how creativity, innovation, and change can propel us forward and offer hope for the future across these many different forms of culture. They offer both granular studies of creativity and innovation at work in particular contexts and macro-level discussion on how they affect organizational culture, the culture of a discipline and society at large. This cross-cultural analysis of creativity, innovation and approaches to change will particularly appeal to practitioners and researchers in the fields of psychology, organizational behavior and education.
