Women in Power Blema S. Steinberg, 2009-07-15 Indira Gandhi, Golda Meir, and Margaret Thatcher were all described at various times as the only man in their respective cabinets - a reference to their tough, controlling behaviour. What explains this type of leadership style? In *Women in Power*, Blema Steinberg describes the role that personality traits played in shaping the ways in which these three women governed. For each of her subjects, Steinberg provides a personality profile based on biographical information, an analysis of the patterns that comprise the personality profile using psychodynamic insights, and an examination of the relationship between personality and leadership style through an exploration of various aspects of political life - motivation, relations with the cabinet, the caucus, the opposition, the media, and the public. By bringing together some of the best work in psychological leadership studies and conventional personality assessments, *Women in Power* makes a significant contribution to the study of political leadership and the advancement of personality-in-leadership

modelling.

Using DSM-IV Anthony L. Labruzzo,Jose M. Mendez-Villarrubia,1997-06 In Using DSM-IV, Dr. Anthony LaBruzza and Jose Mendez-Villarrubia offer the needed supplement to DSM-IV. Their book, a veritable road map for DSM-IV, explains the technical language and hierarchical classifications of DSM-IV while it demonstrates how the system can be adapted to a clinical approach. In cogent prose replete with examples, the authors show how to use DSM-IV to arrive at accurate diagnoses that include, rather than forsake, dynamic conceptualizations of clients' psychological functioning. The authors review each DSM-IV diagnostic category, helping the reader to see what clients with a specific pathology look like, what is actually needed to qualify for the disorder, and what similar disorders to rule out. Because theirs is a fundamentally humane and clinical approach to mental illness, LaBruzza and Mendez-Villarrubia suggest that any interview, even a mental status exam, should be a helpful experience for the client. They show how to embed a diagnostic interview in an ongoing clinical process and thus relate to and understand each client as unique, even while finding the right diagnostic category for him or her. This attunement to individuals also enables LaBruzza and Mendez-Villarrubia to consider issues of cultural diversity. Both authors have extensive experience working with Hispanic populations and have included an in-depth chapter on assessing Hispanic clients. In this new era of managed health care, the demand for uniform, accurate diagnoses has never been higher. Facility with the DSM-IV system is imperative. But so too is a thoughtful understanding of clients. Using DSM-IV is the one resource that can help clinicians combine descriptive and dynamic orientations to clients to produce a truly comprehensive diagnosis. As an explanatory and inclusive manual of DSM-IV, this is the essential book.
