The Law and Geoeconomics of Investment Screening Jens Hillebrand Pohl, Steffen Hindelang, Thomas Papadopoulos, Janosch Wiesenthal, 2025-04-08 This volume presents pioneering research for the purpose of developing a common analytical foundation and framework for the emerging interdisciplinary research field of investment control and national security. It deals with legal and regulatory aspects of investment controls, specifically from an international, transnational, and comparative law perspective.

The Struggle over Law in Europe Aldo Sandulli, 2024-04-29 This book examines the role of law in Europe at a time when economic policies have become dominant not only on this continent but globally. Can law be seen as a mere infrastructure? Or does it contribute to defining the social and legal order through its own inherent rules? If the second hypothesis is true, what might these rules be, and how may they be identified? Lastly, to what extent can agreeing a definition of the role of law affect the future of Europe? With the Next Generation European Union, the EU has introduced an unprecedented investment plan for economic recovery and resilience. In doing so, it has become the most important financial intermediary on the continent. But is this simply the prelude to a European economic and financial revival, or does it also aim to strengthen the European legal order in social, political, and constitutional terms? This book argues that the role of law in Europe should be to achieve a balanced relationship between freedom and solidarity; encouraging economic competition, but also social cohesion. Analyzing the role of law in the project of European integration, it maintains that law should be more

than an infrastructure for finance and economics, showing how it can act as a guide and a binding force to achieve a more balanced relationship between economics, politics, and law. This book will be of interest to scholars in the fields of public law, European law, law and economics, the philosophy of law, legal history, political theory, and political science, as well as others concerned with the future of European integration.

The Max Planck Handbooks in European Public Law: Volume I: The Administrative State Sabino Cassese,Armin von Bogdandy,Peter Huber,2017-07-24 The Max Planck Handbooks in European Public Law series describes and analyses the public law of the European legal space, an area that encompasses not only the law of the European Union but also the European Convention on Human Rights and, importantly, the domestic public laws of European states. Recognizing that the ongoing vertical and horizontal processes of European integration make legal comparison the task of our time for both scholars and practitioners, it aims to foster the development of a specifically European legal pluralism and to contribute to the legitimacy and efficiency of European public law. The first volume of the series begins this enterprise with an appraisal of the evolution of the state and its administration, with cross-cutting contributions and also specific country reports. While the former include, among others, treatises on historical antecedents of the concept of European public law, the development of the administrative state as such, the relationship between constitutional and administrative law, and legal conceptions of statehood, the latter focus on states and legal orders as diverse as, e.g., Spain and Hungary or Great Britain and Greece. With this, the book provides access to the systematic foundations, pivotal historic moments, and legal thought of states bound together not only by a common history but also by deep and entrenched normative ties; for the quality of the *ius publicum europaeum* can be no better than the common understanding European scholars and practitioners have of the law of other states. An understanding thus improved will enable them to operate with the shared skills, knowledge, and values that can bring to fruition the different processes of European integration.

Global Administrative Law and EU Administrative Law Edoardo Chiti,Bernardo Giorgio Mattarella,2011-07-03 This book seeks to enrich and refine global administrative law and EU administrative law analytical tools by examining their manifold relations. Its aim is to begin to explore the complex reality of the interactions between EU administrative law and global administrative law, to provide a preliminary map of such legal and institutional reality, and to review it. The book is the first attempt to analyze a dense area of new legal issues. The first part of the book contains core elements of a general theory of the relationships between global and EU administrative law: comparative inquiries, exchanges of legal principles,

and developing linkages. The second part is devoted to special regulatory regimes, in which global and European law coexist, though not always peacefully. Several sectors are considered: cultural heritage, medicines, climate change, antitrust, accounting and auditing, banking supervision, and public procurement.
