**Journal of Interdisciplinary Science Topics, Volume 5** Cheryl Hurkett,2016-06-03 The Journal of Interdisciplinary Science Topics (JIST) form part of the 'Interdisciplinary Research Journal' module in the third year of both the BSc and MSci Interdisciplinary Science degrees. It is intended to provide students with hands-on experience of, and insight into, the academic publishing process. The activity models the entire process from paper writing and submission, refereeing other students' papers, sitting on the editorial board that makes final decisions on the papers, to finally publishing in an online journal. This book is a compilation of the papers written by undergraduate students that were published during the 2015/2016 academic year.

*Breakthrough Swimming* Cecil Colwin,2002 Never before has one book taken such a comprehensive look at the evolution, science, and coaching application of competitive swimming. In *Breakthrough Swimming*, legendary swimming coach and researcher Cecil Colwin provides a rich perspective on the development of the sport and explains major advances in stroke mechanics, training methods, and racing techniques. Accompanied by richly detailed illustrations, this engaging text is one of the most insightful written works on the sport. It makes clear sense out of the scientific principles and puts into context the historical changes in the sport. Not only will you gain a greater understanding of competitive swimming through its origins and evolution, but you'll also gain these valuable skills: - Improve your stroke technique, starts, and turns. - Improve your feel of the water by learning to anticipate and effectively manipulate the reacting flow of the water. - Understand the hydrodynamics of swimming and learn how water reacts to the forces you apply with each swimming stroke. - Improve your conditioning and develop a better training program by understanding the principles of training. - Learn how to design different types of workouts to produce specific physiological effects. - Learn how to plan a seasonal program and how to relate your training to the pace of the race you intend to swim. The book includes a chapter contributed by Dr. David Pyne, sport physiologist to the 2000 Australian Olympic swimming team. Pyne covers the physiology of modern swimming training and the preparation of swimming teams for top-flight international competition. *Breakthrough Swimming* covers every aspect of competitive swimming from its spawning ground in early 19th-century England to the present day, including the profound

changes that occurred in the last decade of the 20th century. The book also explains the societal changes of recent years, such as the advent of professional swimming and the specter of performance-enhancing drugs. Combining history with the latest innovations, *Breakthrough Swimming* is the definitive work on the past, present, and future of competitive swimming.

Geothermal Heat Pump Systems David Borge-Diez, Enrique Rosales-Asensio, 2023-03-21 This book presents an overview of geothermal heating systems using ground source heat pumps in different countries. It evaluates the emissions and energy costs generated by the operation of low enthalpy geothermal systems, with heat pumps fed by different energy sources, and assesses, from an international point of view, those policies whose aim is a sustainable, low-carbon economy. The use of low-impact energy sources is gradually growing with the aim of reducing greenhouse gases emission and air pollution. The alternatives offered by geothermal systems are one of the key solutions for a future renewable development, enabling the electrification of heating systems and the use of biofuels. The book will be of interest to energy professionals and researchers.
