Between PIAAC and the New Literacy Studies Anke Grotlüschen, Lisanne Heilmann, 2021-01-15 With this book we present a selection of articles that critically deal with (internationally comparative) large-scale assessments. We acknowledge that studies such as PIAAC are often designed, financed and implemented on the basis of neo-liberal worldviews. Nevertheless, we would like to use the articles that are presented here to show the various ways in which adult and continuing education can benefit and learn from the knowledge that they generate. In PIAAC, for example, there are huge differences between the surveyed variables and the theoretical frameworks on literacies and literacy practices that the New Literacy Studies (NLS) have brought out. This book features eleven articles, which - with the NLS's theoretical considerations and points of criticism in mind - find new and alternative evaluations and interpretations of the data. Not only can they show effects of marginalization on a large scale, but the data can also provide information about mechanisms of

power in relation to literacy and basic competencies.

Immigration and Quality of Life in Ageing Societies Aeneas Zi Wang,Aimi Muranaka,Florian Coulmas,2024-08-16

This edited book argues that a new perspective on immigration is needed. As many advanced economies are ageing, and their populations stagnate or decline, immigrants are increasingly required to fill in the gaps left behind by shrinking workforces. Against this backdrop, the outdated view that it is - and can only be - a privilege for immigrants to move temporarily from less to more developed economies needs a rethink. In particular, questions about how attractive a host destination can be for immigrants; not just in economic, but also in social, political, linguistic, and cultural terms should be raised. Considering in detail the situation in Japan and Germany - Japan where there are hardly any convenience stores without foreign employees, Germany where retirement homes would no longer function without foreign nursing staff - the book analyses migration to these two countries in different aspects such as education, training, and labour market participation, and policies and actions on the part of the state and policymakers in rendering moving to and living in these countries worthwhile. Bringing together leading scholars active in diverse aspects of migration in Japan and Germany, this book will be a valuable resource to students and scholars with an interest in immigration issues in these two countries specifically, and Europe and Asia more broadly.

Encyclopaedia of Mathematics Michiel Hazewinkel,2012-12-06 This ENCYCLOPAEDIA OF MATHEMATICS aims to be a reference work for all parts of mathematics. It is a translation with updates and editorial comments of the Soviet Mathematical Encyclopaedia published by 'Soviet Encyclopaedia Publishing House' in five volumes in 1977-1985. The annotated translation consists of ten volumes including a special index volume. There are three kinds of articles in this ENCYCLOPAEDIA. First of all there are survey-type articles dealing with the various main directions in mathematics (where a rather fine subdivision has been used). The main requirement for these articles has been that they should give a reasonably complete up-to-date account of the current state of affairs in these areas and that they should be maximally accessible. On the whole, these articles should be understandable to mathematics students in their first specialization years, to graduates from other mathematical areas and, depending on the specific subject, to specialists in other domains of science, engineers and teachers of mathematics. These articles treat their material at a fairly general level and aim to give an idea of the kind of problems, techniques and concepts involved in the area in question. They also contain background and motivation rather than precise statements of precise theorems with detailed definitions and technical details on how to carry out proofs and constructions. The second kind of article, of medium length, contains more detailed concrete problems, results and techniques.

Emotionen im Kontext von Integrationskursen Silan Akis,2024-09-02 Masterarbeit aus dem Jahr 2024 im Fachbereich Pädagogik - Integration, Note: 1,3, Humboldt-Universität zu Berlin (Erziehungswissenschaften), Sprache: Deutsch, Abstract: Diese Masterarbeit untersucht Emotionen im Kontext von Integrationskursen anhand einer qualitativen Befragung von Teilnehmenden und Lehrenden. Die Analyse gibt Aufschluss darüber, welche Faktoren eine förderliche Lernumgebung schaffen. Es wird argumentiert, dass es notwendig ist, die emotionalen Bedürfnisse der Teilnehmenden, ihre kulturellen Hintergründe und die sozialen Beziehungen in den Kursen zu berücksichtigen. Nur so wird eine förderliche Lernumgebung geschaffen, die den Integrationsprozess erfolgreich begleiten kann. Angesichts der Herausforderung im Bereich der Integration von Migrant*innen in die Gesellschaft und der essenziellen Rolle, die der Erwerb der Landessprache für diesen Prozess spielt, ist die Untersuchung der emotionalen Dimensionen in Integrationskursen von großer Bedeutung. Erwachsene Migrant*innen, die mit Hindernissen wie Sprachbarrieren und kulturellen Unterschieden konfrontiert sind, können in Integrationskursen eine Vielzahl von Emotionen erleben. Dazu gehören Ängste vor dem Unbekannten, die Hoffnung auf eine bessere Zukunft und Frustration aufgrund von Sprachschwierigkeiten. Ebenso können Freude über Fortschritte und das Knüpfen neuer zwischenmenschlicher Beziehungen eine Rolle spielen.
