Simposio de Biodiversidad Y Conservacion de Algunos Recursos Floristicos en El Estado de Hidalgo ,

Conservación en la Patagonia Chilena Juan Carlos Castilla, Juan J. Armesto, María José Martínez-Harms, 2021-07-30 La Patagonia chilena en el margen occidental de América del Sur, entre el golfo de Reloncaví e islas Diego Ramírez, es uno de los últimos lugares del planeta con extensos ambientes prístinos. Con una línea de costa sobre 100.000 km posee una de las mayores zonas de interfaz marino-terrestre a nivel mundial. Por su larga historia de iniciativas de conservación estatales y privadas, más del 50% de su superficie terrestre y un 41% de su maritorio están oficialmente protegidos y son reservorios mundiales de patrimonio natural, donde objetivos como la conservación de la biodiversidad, servicios ecosistémicos y mitigación del cambio climático pueden ser puestos a prueba. Sin embargo, la Patagonia chilena sigue siendo una región científicamente poco conocida, y que cada vez más convive con fuertes presiones antrópicas, como la salmonicultura, la explotación de turberas y la apertura de nuevas rutas de acceso a sitios remotos y prístinos. **Conservación en la Patagonia Chilena: Evaluación del Conocimiento, Oportunidades y Desafíos**, libro único en su género, presenta el trabajo colaborativo de 67 investigadores y un grupo de expertos y revisores de alto nivel, con especializaciones en diferentes áreas del saber: biología, ecología, socio-ecología, conservación, pesquerías, acuicultura, antropología, economía, geografía, turismo, criósfera, oceanografía, cambios climáticos y globales. En 18 capítulos se recopila, analiza y sintetiza la información científica y socio-ambiental relacionada con la conservación patagónica. Además, se presentan visiones respecto de los desafíos de conservación en diferentes ambientes, con recomendaciones de prioridades. Se enfatiza la necesidad de incrementar la investigación interdisciplinaria y de establecer en la Patagonia chilena una red integral, operativa y con financiamiento de áreas marino-terrestres protegidas, tomando en consideración los espacios costeros marinos de los pueblos originarios.
