Renán Vega Cantor

Impensar las ciencias sociales Immanuel Maurice Wallerstein, 1999 Minuciosa crítica del legado de las ciencias sociales del siglo XIX al pensamiento social de finales del siglo XX. En vez de las ideas incorporadas al concepto de “desarrollo”, Wallerstein subraya las transformaciones en tiempo y espacio, que no deberían de considerarse como influencias externas sino como aspectos clave para lo que es la transformación social. Se presenta también un análisis crítico de algunos personajes como Marx y Braudel, cuyas ideas han ejercido influencias en el planteamiento del autor.

Economic Cycles and Social Movements Eric Mielants, Katsiaryna Bardos, 2020-10-04 Economic Cycles and Social Movements: Past, Present and Future offers diverse perspectives on the complex interrelationship between social challenges and economic crises in the Modern World System. Written with a balance of quantitative, qualitative and theoretical contributions and insights, this volume provides a great opportunity to reflect upon the ongoing conceptual and empirical challenges when confronting the complex interrelations of various economic cycles and social movements. By engaging wide-ranging ideas and theoretical points of view from different disciplines, different countries and different perspectives, this study breaks new ground and offers novel insights into the way the capitalist world economy functions as well as the way social and political movements react to these constraints. Different chapters in this volume bring about novel interdisciplinary approaches to study business cycles, economic changes and social as well as political movements, offer new interpretations and, while examining the complexity of socioeconomic cycles in the long run, present epistemological challenges and a wide variety of empirical data that will increase our understanding of these complex interactions.

Dependency, Neoliberalism and Globalization in Latin America Carlos Eduardo Martins, 2019-12-09 The Marxist Theory of Dependency (TMD) managed to articulate the insertion of peripheral societies into the international market with the capital accumulation processes of each country. It has become an essential theory for the understanding of our societies. Since Ruy Mauro Marini laid out its foundations, many transformations have occurred in global capitalism and in our societies, leaving us the challenge of updating it against a more complex context. The real test of theory is its adequacy as an

instrument of understanding contemporary reality. The TMD has been enriched and renewed from this work of Carlos Eduardo Martins. It considers capitalism from the perspective of anti-capitalism, dependence from the standpoint of emancipation and reality through a vision for its revolutionary transformation. Emir Sader - CLACSO General Secretary (2006-2012) This book is a revised edition of a work first published in 2011 as *Globalização, dependência e neoliberalismo na América Latina* by Boitempo Editorial, São Paulo, Brazil. La teoría marxista de la dependencia (TMD) logró articular la inserción de las sociedades periféricas en el mercado internacional con los procesos de acumulación de capital de cada país. Se ha convertido en una teoría esencial para la comprensión de nuestras sociedades. Desde que Ruy Mauro Marini expuso sus fundamentos, muchas transformaciones ocurrieron en el capitalismo global y en nuestras sociedades, poniendo el desafío de actualización en condiciones más complejas La prueba real de la teoría es su adecuación como instrumento de comprensión de la realidad contemporánea. La TMD sale enriquecida y renovada de esta obra de Carlos Eduardo Martins dedicada a pensar el capitalismo bajo la perspectiva del anticapitalismo, la dependencia en la óptica de la emancipación y la realidad en la perspectiva de su transformación revolucionaria. Emir Sader - Secretario General CLACSO (2006-2012)

Aníbal Quijano Deni Alfaro Rubbo, 2024-09-09 One of the prominent thinkers in the Social Sciences, Aníbal Quijano (1930-2018), has a fundamental work for the compression of contemporary dilemmas since his main theoretical and political concerns have always been linked to the mutations of world capitalism and its reverse paths. This book aims to contribute with analyses of his voluminous and diversified production distributed practically over 60 years of intellectual trajectory. In the first decades, the Peruvian author produced essential works on peasant movements, the urbanization process, and the class structure in Peru and Latin America by mobilizing sociological categories such as marginality, dependency and structural heterogeneity. He devoted himself to investigating imperialist domination in Peru and its implications for social classes and created the journal *Sociedad y Política*. In the 1990s and 2000s, the Peruvian sociologist published a set of texts on the coloniality and decoloniality of power, which represents a theoretical construction inseparable from the processes and experiences that were occurring in Peru, Latin America and the world, from the “globalization” of “neoliberalism” to global and local resistances. Thus, this book is addressed to all those, with or without specialized training in social sciences, interested in knowing not only the history of social sciences in Latin America but mainly in understanding the historical roots and the political dilemmas of peripheral capitalist societies.

Pensar el siglo XIX Santiago Castro-Gómez, 2004 Los textos aquí presentados reflexionan sobre la contrucción del entramado simbólico que quiso instaurarse como fundamento cultural de la nación colombiana en el siglo XIX: la literatura y el periodismo como artífices del imaginario letrado de la Ateneas sudamericana, la ciencia como instrumento de control biopolítico sobre las poblaciones y el territorio, el derecho como dispositivo para la contrucción de subjetividades obedientes, la familia católica como espacio privilegiado de la vida de las mujeres, el museo como escenario para la patrimonialización de

la memoria histórica.

La enseñanza de la contabilidad Maria Elena Escobar Ávila,2020-11-01 Con este trabajo se propone una forma de enseñar la contabilidad respuesta a la enseñabilidad de la contabilidad partiendo del concepto demuseo contable como proyecto social de memoria histórica en cultura contable. La importancia de la historia, estudiada bajo la óptica de la complejidad, de la eliminación de las líneas divisorias de las disciplinas sociales y de la transdisciplinariedad y la puesta en la realidad que proporciona un museo virtual, se presenta como respuesta y propuesta de enseñabilidad. El libro utiliza un aparato conceptual referido en especial a teorías como la complejidad, la transdisciplinariedad, el constructivismo, el aprendizaje significativo y la mediación pedagógica, así como también un conjunto de datos precisos provenientes de la convergencia de problemas de las áreas de investigación, docencia y gestión en programas de contabilidad.

Unthinking Social Science Immanuel Wallerstein,1991-09-02 In this important work, Immanuel Wallerstein develops a highly original critique of the legacy of nineteenth century social science for social thought in the late twentieth century. He argues that the presumptions which provide the foundation of dominant research today need 'unthinking' and should be radically revised or even discarded. Once considered liberating, these notions have become a barrier to clear understanding of the social world in current times. Applying these ideas to a variety of theoretical areas and historical problems, Wallerstein also offers a critical discussion of some of the key figures whose ideas have influenced the position he formulates - including Marx and Braudel. In the concluding sections of the book, Wallerstein demonstrates how these new insights lead to a revision of world-systems analysis.

América Latina. La construcción del orden Waldo Ansaldi,2012-10-31 A partir de la idea rectora de que América Latina es una construcción histórica que se constituye desde su origen como unidad estructuralmente desigual y diversa, Waldo Ansaldi y Verónica Giordano despliegan en este libro un análisis de la realidad histórica, social y política de la región, que puede leerse de dos maneras complementarias: como una historia social de lo político y, también, como una historia política de lo social. A diferencia de la perspectiva que adopta en pensamiento conservador, el pensamiento crítico puesto en acto en este volumen propone que el orden es una construcción histórica, colectiva, política y conflictiva. La formación del Estado, la creación de la nación y la constitución de las condiciones que posibilitaron la inserción internacional de nuestra economía son los procesos sobre los que se enfoca y desarrolla el riguroso análisis de los autores. América Latina, La construcción del orden no pretende reconstruir paso a paso la historia de la región, sino advertir sobre la compleja trama de procesos en la construcción del orden, en el que las cuestiones del poder, la explotación y la dominación se encuentran en un primer plano.

En palabras del destacado investigador Norbert Lechner, si el orden no es concebido como acción colectiva, la diversidad no logra ser asumida como pluralidad, sino que es vivida como una desintegración cada vez más insoportable. Pensada en dos volúmenes, esta primer entrega de América Latina. La construcción del orden se convertirá sin duda en un clásico de obligada referencia para los estudios acerca de la región.

La instrucción pública en los departamentos de Chilón, Simojovel, Pichucalco, La Libertad y Tonalá durante el Rabasismo en Chiapas, 1891-1911 Yoshiro Román Gálvez López,Guillermo Alonso Suárez Solís,2018-02-28 Tesis del año 2017 en el tema Historia - América, Nota: -, , Materia: Facultad de Humanidades, Licenciatura en Historia, Idioma: Español, Resumen: El tema de investigación surgió a partir de la poca información inexistente acerca de la historia de la educación en Chiapas a final del siglo XIX y principios del XX, durante el período conocido como porfiriato en el ámbito nacional (1876-1911) y como rabasismo en el estado (1891-1911). Comúnmente la historia de Chiapas es la historia de Tuxtla Gutiérrez, San Cristóbal de Las Casas, Comitán y Tapachula; por tal motivo se originó el interés de estudiar otras regiones, que con menor relevancia son importantes para comprender el desarrollo educativo del período. El presente trabajo abarca los departamentos de Chilón, Pichucalco, Simojovel, La Libertad y Tonalá, que con sus diferentes realidades buscaron sembrar la semilla del progreso en sus respectivas áreas geográficas. Las diversas cuestiones surgidas dieron como resultado que la educación elemental fuera el principal objeto de estudio, considerándola el motor de la correcta alfabetización que tanto necesitaba la sociedad chiapaneca. El tema de la educación es uno de los ejes importantes para entender el desarrollo histórico de las sociedades. Es la base para el futuro, - como muchos lo han entendido - fundamental para hacer realidad el proyecto que se tiene como nación. En el caso de México existen pocos investigadores preocupados por el pasado de la educación y las fuentes bibliográficas son escasas.

Unthinking Social Science Immanuel Maurice Wallerstein,1991 In this, new edition of a classic work—now with a new preface—on the roots of social scientific thinking, Immanuel Wallerstein develops a thorough-going critique of the legacy of nineteenth-century social science for social thought in the new millennium. We have to unthink—radically revise and discard—many of the presumptions that still remain the foundation of dominant perspectives today. Once considered

liberating, these notions are now barriers to a clear understanding of our social world. They include, for example, ideas built into the concept of development. In place of such a notion, Wallerstein stresses transformations in time and space. Geography and chronology should not be regarded as external influences upon social transformations but crucial to what such transformation actually is. Unthinking Social Science applies the ideas thus elaborated to a variety of theoretical areas and historical problems. Wallerstein also offers a critical discussion of the key figures whose ideas have influenced the position he formulates—including Karl Marx and Fernand Braudel, among others. In the concluding sections of the book, Wallerstein demonstrates how these new insights lead to a revision of world-systems analysis. Author note: Immanuel Wallerstein is the Director of the Fernand Braudel Center for the Study of Economies, Historical Systems and Civilizations at the State University of New York at Binghamton, where he is also an emeritus Distinguished Professor of Sociology. He is currently a research sociologist at Yale University.
