*Foundation Web Design* Sham Bhangal, Tomasz Jankowski, 2013-11-27 Want to create a top-level website from scratch, but don't know where to start? Well, you've got a choice: buy this book, or buy ten others... Creating a website in today's environment is no longer a question of knowing about one piece of software, or one technology. To achieve the best results, you need broad knowledge on a range of topics: HTML to create pages Cascading Style Sheets (CSS) to format your text JavaScript to create interactivity Image editing software like Fireworks and Photoshop to prepare images Macromedia Flash to add multimedia content *Foundation Web Design* is a step-by-step guide to stunning website creation. Starting with the basics, and assuming no prior knowledge, Sham Bhangal cuts through the jargon and introduces a wide range of essential skills and technologies. These combine to help you create a fully operational and graphically stunning case study website. About the Authors: Sham Bhangal's unique tutorial style has found success in friends of ED *Foundation* titles such as *Foundation ActionScript*, heralded by Amazon.com as "perhaps one of the finest introductory programming books ever written." Tomasz Jankowski—who designed the case study site—has won numerous web design awards. His stunning artwork first appeared in our landmark title *New Masters of Flash*.

Renew Yourself Catherine Hakala-Ausperk, 2017-10-04 Unplanned careers affect everything and everyone. They can lead to frustration, negativity, and apathy at a time when we need to be focused, energized and motivated. Though your library career might have started accidentally, you can overcome organizational restructuring, changing job titles, and shifting responsibilities by cultivating a mindful existence in the library workplace. Building on the simple and fun approach that have made her previous books bestsellers, Hakala-Ausperk offers up a DIY-style program for revisiting personal values, understanding your options, identifying skill gaps, and creating plans for growth. Whether you're a library veteran who's feeling burned out, a new LIS grad just starting out, or somewhere in mid-career, this book will introduce methods to help you examine your individual interests, desires, and goals; show you how to understand your workplace's priorities and culture, and offer tips for identifying where there's either a match or a gap; demonstrate how you can improve your current position; prepare you to move forward through the creation of a personalized strategic professional plan that addresses professional development, gaining additional experience, and other options for growth; include tips for effective self-marketing, networking through colleagues and friends, and acing an interview; present ways to stay happy and engaged in a

new role or position; and offer guidance for sharing your skills and experience through mentorship, and retiring with grace. Ideal for both self-paced study and team-based staff development, this six-step plan will help readers renew themselves, their careers, and their organizations.

**Theorizing Outdoor Recreation and Ecology** Sean Ryan,2016-04-29 Deciding what user impacts are natural or unnatural has inspired much debate. Biophysically, moose cause similar kinds of soil and vegetation impacts as hikers. Yet moose are the sign of nature while hikers are the sign of damage. The field of outdoor recreation is beset with paradoxes, and this book presents a unique, alternative framework to address these dilemmas. Examining outdoor recreation through the lens of ecological theory, Ryan draws from theorists such as Foucault, Derrida and Latour. The book explores minimum impact strategies designed to protect and enhance ecological integrity, but that also require a disturbing amount of policing of users, which runs counter to the freedom users seek. Recent ecological theory suggests that outdoor recreation's view of nature as balanced when impacts are removed is outdated and incorrect. What is needed, and indeed Ryan presents, is a paradoxical and ecological view of humans as neither natural nor unnatural, a view that embraces some traces in nature.

Psychiatrist in the Chair Brendan Kelly,Muiris Houston,2020-10-22 Born in Dublin in 1942, Anthony Clare was the best-known psychiatrist of his generation. His BBC Radio 4 show, In the Psychiatrist's Chair, which ran from 1982 to 2001, brought him international fame and changed the nature of broadcast interviews forever. Famous interviewees included Stephen Fry, Anthony Hopkins, Spike Milligan, Maya Angelou and Jimmy Savile, each of whom yielded to Clare's inimitable gentle yet probing style. Clare made unique contributions to the demystification and practice of psychiatry, most notably through his classic book Psychiatry in Dissent: Controversial Issues in Thought and Practice (1976). This book, the first, official biography of this much-loved figure, examines the man behind these achievements: the debater and the doctor, the writer and the broadcaster, the public figure and the family man. Using extensive public and family records, we ask: Who was Anthony Clare, really? Were there just one Anthony Clare, or many? What drove him? And what is to be learned from his life, his career, and his unique, sometimes controversial legacy to our understanding of the mind? This is the remarkable story of a remarkable person.

Offers nuggets of wisdom within humorous one-liners Provides a quick laugh or pick-me-up at the end of a busy day Helps promote better communication among colleagues, students, and patients Material in this book can be used during lectures and hospital rounds, conferences, with office staff, and by speakers who need funny lines to spice up their presentations to medical professionals

*Handbook of Global Philosophies on AI Ethics* Naresh Singh, Ram B. Ramachandran, 2025-08-15 This book offers an exploration of the diverse perspectives shaping the future of artificial intelligence (AI), highlighting the influence of non-Western thinking in its development. What would the impact be if AI were developed with the wisdom of Ubuntu, the harmony of Confucian thought, or the Indian principle of Vasudhaiva Kutumbakam, the world is one family, at its core? This thought-provoking collection brings together leading voices from around the globe to reimagine AI systems that are fair, ethical, and inclusive. Addressing critical issues such as bias, fairness, privacy, and existential risks, it challenges the status quo and envisions a future where AI reflects the values of all humanity—not just a select few. Exploring the influence of topics like religion, culture, and social movements, the book examines how these perspectives shape AI's application in industries such as finance, education, and the military, while underscoring the importance of establishing robust ethical guardrails. Whether you're a curious reader, a policy maker, a scholar, or a tech innovator, this book is your guide to understanding how different cultural perspectives can redefine AI ethics. It's time to ask: what kind of world do we want AI to build for us all?

*Robert Crumb* D. K. Holm, 2005 For almost forty years, Robert Crumb has been at the forefront of the underground cartooning movement. From his early sketches for the newspaper Yarrowstalks to recent comic books such as Mystic Funnies, Crumb has both defined the world of comix and tested the limits of what makes a comic book story. What's in this book? Crumb's complicated life is laid out and his numerous pop culture influences are cataloged. From Crumb's childhood letters and first attempts at comics to his vastly influential early books such as Zap and Motor City Comics, the most significant and interesting work by Crumb is analyzed. Also covered is Crumb's relationship to music, the movies by and about him, and the remarkable change his work took in the '80s. Also in this book, which is the first critical study of Crumb's work published in English, the cartoonist is assessed as an important writer. The book concludes with a rare interview with

the reclusive cartoonist.--BOOK JACKET.

**Emerald Rain** William McDermott,2005-11 A renowned research biochemist is murdered. Nuclear material is stolen and an extremely deadly bio-chemical agent is compromised. A group of international terrorists, presumed to have been terminated years before, are confirmed to be alive and operating within the borders of the United States. Now they have the capability to unleash weapons of mass destruction within the United States and their third world conspiracy to successfully undermine the stability of the U.S. Government looks to be inevitable. Brent Martin, a former U.S. Intelligence agent once tasked with the terrorists' destruction, is summoned back to the agency to counter their plan and preserve the safety of millions. Emerald Rain is a suspense thriller which pits European and Middle East terrorists and global conspirators against the United States of America. The story brings to light how unprepared the United States, as a whole is able to combat overt acts of terrorism within the boundaries of our nation. At the same time it depicts the resiliency of our countries resolve to improvise, adapt and overcome any obstacle of freedom and defeat the terrorists at their own game.

**Vampires, Whiskey, and Southern Charm** Mimi Jean Pamfilof,2024-02-02 From New York Times bestseller Mimi Jean Pamfiloff comes a standalone story filled with Southern vibes, way too many cuss words, and a woman determined to defeat the local vampire. HE'S NEVER GIVING UP, AND SHE'S NEVER GIVING IN... My name is Masie Kicklighter, and I work at my family's local bar in the heart of Tennessee, slinging whiskey and living a quiet life. I can't say my life was perfect, but when a local vampire started stalking me and sayin' all sorts of crazy things (I was not his. Nor would I ever be.), my first instinct was to run. But Leiper's Fork was my home. This was my town. And no one was gonna run me out. Even if he was hotter than a Sunday BBQ in July. So I came up with a plan to run him off. The only problem? He was one stubborn man. And crafty, too. Then something terrible happened. A whole lot of terrible somethings. And they would change everything for us both.

**Margins of Writing, Origins of Cultures** Seth L. Sanders, 2006 Writing and the state both first began in the ancient Near East. The origins of history are traced to the place where they met. But what did they actually have to do with each other? Most of ancient Near Eastern philology consists of careful examination of the leavings of the state scribes; it has revealed a treasure-house of ancient culture, from haunting poetry to onion archives. But there is a crucial blind spot in our perspective on the largest and oldest archive of the ancient world: the relationship between the vast body of official writing and the actual life of language as spoken, understood, and imagined by ancient Near Eastern people. The vital relationships between language and ethnicity, the connections between languages of empire and local identity, and way languages are born, live and die in writing has remained the subject of more speculation than rigorous research. If recorded history began in the ancient Near East, we are just beginning to explore the powerful creative relationship between writing and the political identities of the Near East's cultures. Collectively, the articles here provide well-documented challenges to conventional wisdom about that for which people actually used Sumerian, Egyptian, Hittite, and Hebrew. This conference was the first to bring leading philologists together with anthropologists and social theorists to explore what writing meant to politics in the ancient Near East. The conference was designed to encourage philologists to talk to theorists about how their material matters. It seems to have worked. The papers and responses give a vivid sense of the stakes and consequences of the oldest written texts in the twenty-first century. We met over two days, on February 25-26, 2005, at the University of Chicago Oriental Institute's James Breasted Auditorium. Fourteen participants attended; Piotr Michalowski, our fifteenth, was out of the country on an international research project.
