Water Displays in Domestic Spaces across the Late Roman West Ginny Wheeler,2025-02-28 Analyzes the use of water features in late antique homes across the Western Roman Empire, highlighting their aesthetic, social, and practical significance. For ambitious late antique homeowners seeking to demonstrate their status and taste, water and its display offered almost infinite possibilities. *Water Displays in Domestic Spaces across the Late Roman West: Cultivating Living Buildings* presents the first synthesis of the archaeological evidence for late antique water features in both urban houses and extra-urban villas across the western Empire. Ginny Wheeler examines a wide and varied range of examples: from decorative basins and pools to fountains of all forms and water-equipped dining couches. Through careful analysis and evocative reconstruction of the water displays in their diverse contexts, this book explores how they were incorporated into late antique residences, the different ways that they enhanced domestic spaces, and the potential motives behind their insertion. To assess the great efforts to which homeowners, particularly in urban settings, went to ensure their installation and continued operation, one case study focuses on the best-preserved cityscape of Ostia. While the roles of water features ranged from practical to aesthetic, social and symbolic, this book highlights their previously under-considered contributions to thermal comfort and sensory experience through in-depth analyses of two Iberian villas. Wheeler identifies broad patterns and regional distinctions in form and decor before reflecting on the multifaceted significance of water in the domestic sphere, informed by literary, epigraphic, and iconographic sources. Beyond contributing to the ongoing debate over fountains' utility versus aesthetics, this research offers new insights into the organization of life at household and neighborhood levels, the social relations between homeowners occasioned by water installations, and the understanding and application of environmental design in antiquity.

The Sculptural Environment of the Roman Near East Yaron Z. Eliav, Elise A. Friedland, Sharon Herbert, 2008 Public sculptures were the mass media of the Roman world. They populated urban centers throughout the empire, serving as a plastic language that communicated political, religious, and social messages. This book brings together twenty-eight experts who otherwise rarely convene: text-based scholars of the Greco-Roman, Jewish, and Christian realms from the fields of

classics, history, and religion and specialists in the artistic traditions of Greece and Rome as well as art historians and archaeologists. Utilizing the full spectrum of ancient sources, the book examines the multiple, at times even contradictory, meanings and functions that statues served within the complex world of the Roman Near East. Moreover, it situates the discussion of sculpture in the broader context of antiquity in order to reevaluate long-held scholarly consensus on such ideas as the essence of Hellenism (the culture that emerged from the encounter of Greco-Romans with the Near East) and the everlasting conflict among paganism, Christianity, and Judaism.

Arranged alphabetically, this two-volume set contains over 800 entries tracing the development of the art forms in classical civilizations such as ancient Greece and Rome. Illustrated with 400 halftones, maps and line drawings, and 32 color plates, the Encyclopedia is a reliable and convenient resource covering this field of everlasting significance in the development of western culture.

Architecture Of Rome Stefan Grundmann, 2007 Rome is where the history of European architecture was written. The foundations were laid in ancient Roman times when the first attempts were made to design interiors which could be experienced as something physical. Ancient Roman architects also started to develop building types that are still valid today, thus creating the cornerstone of later Western architecture. This guide has been arranged chronologically. Every epoch is preceded by an introduction that identifies its key features. This produces a continuous, lavishly illustrated history of the architecture of Rome, indeed, the whole of the West. The book includes an alphabetical index and detailed maps, whose

information does not just immediately illustrate the historical picture, but also makes it possible to choose a personal route through history. In order to clarify the historical development, the key buildings of each period and other major works are emphasised both in the text and on the maps.
