Air Crash Investigations Allistair Fitzgerald, 2009-11 On January 31, 2000, Alaska Airlines, Flight 261, a McDonnell Douglas MD-83, was on its way from Puerto Vallarta, Mexico, to Seattle, Washington, when suddenly the horizontal stabilizer of the plane jammed. While passengers were praying for their life, Captain Thompson and First officer Tansky tried to make an emergency landing in Los Angeles. They did not make it, the plane suddenly crashed into the Pacific Ocean, killing all 93 people aboard. The NTSB concluded that the failure of the horizontal stabilizer was caused by insufficient maintenance. In other words the crash of Alaska Airlines Flight 261 could have been avoided.

Managing the Human Dimension of Disasters Kjell Brataas, 2021-03-30 Managing the Human Dimension of Disasters provides the most comprehensive and up-to-date analysis on how individuals cope with tragedy and loss. Kjell Brataas gives a voice to those who have suffered and have been affected by unimaginable trauma. Noted experts recount stories and share their knowledge of how they assisted victims following tragedies such as the Manchester Arena bombing, the 2004 Indian Ocean tsunami, terror attacks, several aircraft disasters and school shootings, the 9/11 attacks and the COVID-19 pandemic. The book focuses on those affected by a disaster, including the bereaved, survivors and first responders. Leaders of support groups formed after these tragedies, trauma therapists and psychologists from three continents offer their experiences dealing with victims and the aftermath of disaster. Chapters provide guidance on memorializing tragedies, site visits, donation management, media relations, social media, grief counseling and human resilience. Readers will be shown that psychological support is critical after a disaster and learn from those who deal with emergencies. Brataas' unmatched volume offers new understandings, recommendations, best practices and benchmarks on how best to assist victims in the aftermath of disaster. A valuable resource for students, researchers and practitioners.

Life in the Air Mark Gottdiener,2001 This book is not just about air travel. It is about the emergent social world of flying. It concerns air space and behavior in the air the way someone else might look at cities and street behavior. Economic,

political, and cultural aspects are all considered. . . . Airports have now become specific places in their own right that, in a certain sense, now. . . are very much like cities. Frequent flying also has produced its very own culture. Rules of behavior are subscribed to in the air. Unique behaviors at terminals and in the passenger cabin have emerged that contrast with life on the ground. In chapters below I explore these interesting aspects of etiquette, eroticism, and bi-coastalism, a human activity that is only possible because of our present society's evolution. . . . Only now have we begun to appreciate our emergent global culture. The world is shrinking just as the opportunities for travel expand.
