The Dark Triad of Personality Minna Lyons, 2019-01-11 The Dark Triad of Personality: Narcissism, Machiavellianism, and Psychopathy in Everyday Life summarizes the latest research on how these personality traits (psychopathology, narcissism, Machiavellianism) are defined and displayed, while also exploring the impact they have on individuals and society, the relationship between clinical conditions and personality traits, and their adaptivity. The book introduces the Dark Triad through the lens of existing clinical and personality literature, discussing shared and unique cognitive and empathetic profiles associated with each trait. The Handbook of Loneliness Todd Nelson, 2025-11-23 The problem of loneliness has increased dramatically over the last 25 years. Loneliness presents a threat to the mental, emotional, and even physical well-being of the lonely individual. This statement is borne out in much research, and the alarming threat that loneliness presents is such that the U.S. Surgeon General issued an 82-page advisory in 2023 on what he called an “epidemic” of loneliness. Here in this Handbook of Loneliness, are gathered experts on loneliness from all over the world, in multiple disciplines, in which they discuss the results of their research and that of their colleagues on a wide range of topics related to understanding loneliness. The Springer Handbook of Loneliness is an invaluable reference for anyone seeking a wide-ranging, deeper understanding of the causes and effects of loneliness, and how loneliness can be reduced.

Modern Relationships Mahzad Hojjat, Anne Moyer, 2024 This volume compiles the latest research and theory on close relationships in the twenty-first century from multi-disciplinary and international perspectives with the intent of taking stock of the cultural, political, and legal changes that have shaped the relationship landscape. Some of the important shifts that are captured are the rise of singlehood, online dating, and cohabitation, the new importance of social media, marriage equality, and changes in gender norms. New ways of forming families and unions via adoption, assisted reproduction, and remarriage are also covered, as well as coupling across cultural, racial, religious, and national lines.

Machiavelliana Michael Jackson, Damian Grace, 2018-06-05 In Machiavelliana Michael Jackson and Damian Grace offer a comprehensive study of the uses and abuses of Niccolò Machiavelli's name in society generally and in academic fields distant from his intellectual origins. It assesses the appropriation of Machiavelli in didactic works in management, social psychology, and primatology, scholarly texts in leaderships studies, as well as novels, plays, commercial enterprises, television dramas, operas, rap music, Mach IV scales, children's books, and more. The book audits, surveys, examines, and evaluates this Machiavelliana against wider claims about Machiavelli. It explains the origins of Machiavelli's reputation and the spread of his fame as the foundation for the many uses and misuses of his name. They conclude by redressing the most persistent distortions of Machiavelli.

Corruptible Brian Klaas, 2021-11-09 An "absorbing, provocative, and far-reaching" (Kirkus Reviews, starred review) look at what power is, who gets it, and what happens when they do, based on over 500 interviews with those who (temporarily, at least) have had the upper hand—from the creator of the Power Corrupts podcast and Washington Post columnist Brian Klaas. Does power corrupt, or are corrupt people drawn to power? Are tyrants made or born? Are entrepreneurs who embezzle and cops who kill the result of poorly designed systems or are they just bad people? If you were suddenly thrust into a position of power, would you be able to resist the temptation to line your pockets or seek revenge against your enemies? To answer these questions, Corruptible draws on over 500 interviews with some of the world's top leaders—from the noblest to the dirtiest—including presidents and philanthropists as well as rebels, cultists, and dictators. Some of the fascinating insights include: how facial appearance determines who we pick as leaders, why narcissists make more money, why some people don't want power at all and others are drawn to it out of a psychopathic impulse, and why being the "beta" (second in command) may actually be the optimal place for health and well-being. Corruptible also features a wealth of counterintuitive examples from history and social science: you'll meet the worst bioterrorist in American history, hit the slopes with a ski instructor who once ruled Iraq, and learn why the inability of chimpanzees to play baseball is central to the development of

human hierarchies. Based on deep, unprecedented research from around the world, and filled with “unexpected insights...the most important lesson of *Corruptible* is that when psychopaths inadvertently reveal their true selves, the institutions that they plague must take action that is swift, brutal, and merciless” (Business Insider).

Material Differences Herman Burssens,2003 In Africa, the materials that are used to make objects of daily and ritual life are profoundly significant. Material is meaning. *Material Differences: Art and Identity in Africa* examines the different layers of meaning inherent in the material of each object. Many African cultures believe that mineral and organic materials contain supernatural powers that are associated with protection, healing or with leadership. Some of these materials-wood, ivory, stone, clay, or metals such as iron, copper alloys, and gold-are laden with symbolic significance. The exhibition and this publication investigate the numerous factors that lead to the choice of specific materials in the creation of works of art in sub-Saharan Africa. --Google Books.

An Eloquent Picture Gallery Keith Hamilton Dietrich,Andrew Bank,2008 In the early 1860s, Gustav Fritsch, a 25-year-old German medical doctor and anthropologist, travelled through southern Africa on a scientific expedition to study the 'native races', making great use of the new medium of photography. Fritsch's portraits of southern African people are extraordinary images, bringing to life a whole gallery of both known and unknown figures with astonishing veracity. Retrieved from archives in Germany and reproduced here in their entirety for the first time, these photographs can now be reclaimed as part of our common cultural heritage. They are accompanied by several essays that describe Fritsch's journey and scientific project and set them in the context of his racial theories and life's work.

The Tomb of Maya and Meryt: Objects and skeletal remains Maarten Jan Raven,2001 Maya was one of the most important officials of state under Tutankhamun. The holder of many titles in the administration, the chief of which was overseer of the treasury, he was also responsible for the security of the royal tombs in the Valley of the Kings. Maya and his wife Meryt erected a magnificent tomb at Saqqara, the necropolis of the capital city, Memphis. Wrecked in antiquity by tomb robbers, much remained nevertheless to be recorded by the EES-Leiden mission, which located the tomb in 1986.
