The Magnet Motor Patrick Weinand, 2019

The Search for Free Energy Keith Tutt, 2001 THE SCIENTIST, THE MADMAN, THE THIEF AND THEIR LIGHTBULB reveals the revolutionary work of inventors and scientists who have struggled to develop clean and 'fuelless' new ways to produce the electricity we need for the 21st century and beyond. If the technologies could be developed commercially, they would offer almost costless energy, which would mean the end of the oil economy and freely available electricity throughout the developed and underdeveloped world. THE SCIENTIST, THE MADMAN, THE THIEF AND THEIR LIGHTBULB contains the elements of a dramatic conspiracy thriller in which greed, mendacity, murder, suicide, suppression, betrayal, jealousy, madness and misunderstood genius all play their full parts. It also investigates the complex psychology of invention and reserves a chapter for those inventors who are either self-deluded mavericks or charlatans who aim to trick gullible investors out of their savings. Most importantly, there are technologies here that offer to solve the planet's most serious problem: global warming and climate change caused by fossil fuel power plants and car emissions. Is the technological solution to

global warming contained within these pages?

A Free Gift That May Be Over Unity Or Free Energy to the World Jay Lunke, 2018-07-29 This is a new technology that reduces the electrical energy to operate electro-mechanical devices. When this technology is used in an electric motor, it uses 25% of the electrical energy of the older conventional motors. The technology does this by using the torque of three permanent magnets and one electro-magnet to produce positive torque through all of its operation. In addition to this there is another energy saving design using a new modified electrical tank circuit that captures a lot of the electrical energy from the collapsing magnetic field back through the electro-magnet that created the magnetic field in the first place into a capacitor. The capacitor is charged back to its full potential and then used to power the electromagnet again the next time the electromagnet is used again. These two high efficiencies in electrical energy will be among the highest in any motor system to date. The motor is not limited to rotating a shaft so that the design configurations using this technology are unlimited. The three layer technology is in modular form that can be repeated over and over again in building unlimited devices with them. The modular building blocks are great for building the motors as part of the final application device to save money for the end user of those products. Using this new technology will save on resources that are being used up on the earth today. By giving this technology freely to the world will allow the acceleration of saving the world from using up its resources. This book gives hobbyists and designers many ideas in using this new technology in creating their own products with it.
