**Symbols: Their History, Meaning & Evolution** Adele Nozedar, 2025-08-30 From the yin-yang to the green man, ancient symbols pervade our culture and are imbued with different meanings over time. Symbols explores the mysteries, the power and evolution of this classic form of communication, carefully examining some of the most important symbols in history from across the world. Whether it is the ankh which first emerged in ancient Egypt and later played a major role in the occult world, or the all-seeing eye of the Freemasons, Symbols provides a fascinating overview of the secret language of signs. Includes: • Religious symbols: the alter, the druze star, the laughing Buddha... • Symbols of luck, wealth and power: the horseshoe, the eye of Ra, heraldry... • Masonic symbols and rituals: the level and plumbline, the triangle, the column... • Symbols of the occult: tarot, the zodiac... • The symbolism of animals: the goat, the hare, the magpie... • Symbols in nature: the lotus, the river, the moon... With clear depictions of each symbol discussed and examples of their usage, this book sheds light on the cultures of the world and how they manifest through fascinating iconography.

**A grammar of Japhug** Guillaume Jacques, 2025-09-25 Japhug is a vulnerable Gyalrongic language, which belongs to the Trans-Himalayan (Sino-Tibetan) family. It is spoken by several thousand speakers in Mbarkham county, Rngaba district, Sichuan province, China. This grammar is the result of nearly 20 years of fieldwork on one variety of Japhug, based on a corpus of narratives and conversations, a large part of which is available from the Pangloss Collection. It covers the whole grammar of the language, and the text examples provide a unique insight into Gyalrong culture. It was written with a general linguistics audience in mind, and should prove useful not only to specialists of Trans-Himalayan historical linguistics and typologists, but also to anthropologists doing research in Gyalrong areas. It is also hoped that some readers will use it to learn Japhug and pursue research on this fascinating language in the future.

**Environmental Justice and Environmentalism** Ronald D. Sandler, Phaedra C. Pezzullo, 2007 In ten essays, contributors from a variety of disciplines consider such topics as the relationship between the two movements' ethical commitments and activist goals, instances of successful cooperation in U.S. contexts, and the challenges posed to both movements by globalisation and climate change.

**The State of the Environment in Asia** The Japan Environmental Council, 2012-12-06 In December 1977 we published the first in this series of NGO-oriented reports on Asia's environment, *Ajia Kankyo Hakusho* 1997/98. This was published in English by Springer-Verlag as *The State of the Environment in Asia* 1999/2000. Although only a few years have passed since then, Asia has seen tumultuous changes in the political, economic, social, environmental, and other domains, as well as a number of prominent trends that could be regarded as harbingers of the new century. China, for instance, could henceforth decisively affect the evolution of environmental problems not only in Asia, but across the entire globe. Yet Chinese concern

for and initiatives on pollution and environmental damage have increased more quickly than could have been anticipated just a few years ago. And on Taiwan, where a Democratic Progressive Party president was elected over the long-ruling Nationalist Party, an attorney who has cooperated with our pollution surveys for a decade, Hsieh Chang-ting, became mayor of Taiwan's largest heavy and chemical industry city of Kaohsiung, where he has begun a Green Revolution. On the Korean Peninsula, which has for many years endured the division of its people, as well as political and military tensions, there are the beginnings of a new North-South dialog. These changes are all welcome to those of us who wish to see new advances in environmental cooperation throughout Asia.

**The Tree Climbing Cure** Andy Brown, 2022-12-15 Our relationship with trees is a lengthy, complex one. Since we first walked the earth we have, at various times, worshiped them, felled them and even talked to them. For many of us, though, our first memories of interacting with trees will be of climbing them. Exploring how tree climbers have been represented in literature and art in Europe and North America over the ages, *The Tree Climbing Cure* unpacks the curative value of tree climbing, examining when and why tree climbers climb, and what tree climbing can do for (and say about) the climber's mental health and wellbeing. Bringing together research into poetry, novels, and paintings with the science of wellbeing and mental health and engaging with myth, folklore, psychology and storytelling, *Tree Climber* also examines the close relationship between tree climbing and imagination, and questions some longstanding, problematic gendered injunctions about women climbing trees. Discussing, among others, the literary works of Margaret Atwood; Charlotte Bronte; Geoffrey Chaucer; Angela Carter; Kiran Desai; and J.R.R. Tolkien, as well as work by artists such as Peter Doig; Paula Rego; and Goya, this book stands out as an almost encyclopedic examination of cultural representations of this quirky and ultimately restorative pastime.

*Replenishing the Earth* Tom Woodhouse, 1990 Each year, the work of outstanding individuals and organisations is given public recognition by their being chosen to receive The Right Livelihood Award (popularly known as the Alternative Nobel prize). This volume brings together the acceptance speeches of award winners from 1986 to 1989.

*EnviroPOP* Mark Meister, Phyllis M. Japp, 2002-09-30 Although much scholarly and critical attention has been paid to the relationship between rhetoric and environmental issues, media and environmental issues, and politics and environmental issues, no book has yet focused on the relationship between popular culture and environmental issues. This collection of essays provides a rigorous and multifaceted rhetorical and critical perspective on the ways in which the language and imagery of nature is incorporated strategically into various popular culture texts—ranging from greeting cards to advertisements to supermarket tabloids. As a distinguished group of scholars reveals, our notions about the environment and environmentalism are both reflected in and shaped by our popular culture in fascinating ways never previously examined in

an academic context. The consumptive vision of nature presented in these texts represents a wholly American view, one promoting leisure and comfort, and nature as the place to experience them. This good life attitude toward the environment often serves to commodify it, to render it little more than space in which to pursue conventional notions of the American dream. As such, the volume represents a bold and striking vision both of popular culture and of popular notions of an environment that can be either protected or just simply consumed.

Themes and Issues in Hinduism Paul Bowen,1998 This book offers useful insights into the complex and internally diverse realm of Hinduism. Adopting a poly-thematic approach, it is intended to acquaint the reader with themes and issues that while of relevance to all religious traditions and systems, contribute to an understanding of the abstract nature of Hinduism as a whole. Beginning with Hindu religious understandings of the human condition, the chapters are arranged so as to form a thematic survey and overview of Hindu religious beliefs and practices. The themes of morality and ethics, the role of women in Hinduism, the Hindu religious construction of nature, and issues such as mythology, the status of texts, forms of worship, and sacred time and place can be systematically considered: or alternatively, the focus can fall upon these topics that are of particular personal interest. Readers should find this volume to be a wide-ranging and balanced introduction to Hinduism's inner diversity.

**Attitudes to Nature** John Bowker,1994 This work provides an evaluation of the cosmos and the planet by each of the various religions. It looks at the status of the natural order in its own right, as well as the status and responsibilities of humans in that order. The following questions are tackled: Is the relationship one of dominion, stewardship, union or duality? What is the status of animals? How far do the moral considerations that affect humans extend to animals - if at all? Do the different religions offer any distinctive understanding of the status of animals? What, if anything, is there in religious anthropologies which distinguishes humans from (or unifies them with) animals? What is the ultimate condition of nature in the religious (often eschatological) vision?
