Handbook on Product Standards and International Trade James J. Nedumpara, Satwik Shekhar, Akshaya Venkataraman, 2021-11-05 Global Trade Law Series, Volume 55 India, one of the world's foremost trading nations, exhibits a particularly complex regulatory landscape with a variety of standard-setting bodies, regulators, accreditation and certification bodies, inspection agencies, as well as several state-level regulators. This is the first book to extensively describe the nature of standard-setting processes in India and the key agencies involved with this task, greatly clarifying the scope of market opportunities in the country. Lucid contributions from experienced practitioners and regulators with first-hand experience in formulating and advising on standards-related issues in international trade help disentangle the web of laws, regulations, operations, and functions of India's standard setters in governmental, non-governmental, and industry contexts. The chapters describe how standards apply to such crucial trade aspects as the following: conformity assessment practice and procedure; environmental, ethical, social, and safety issues; import bans and import licensing; certification and labelling measures; mutual recognition agreements; food safety; and standardisation of the digital economy. The book is drafted throughout in an easy-to-read style, with numerous tables, flowcharts, and figures illustrating step-by-step compliance procedures. Informative annexes guide the reader to relevant agencies and identify their roles and responsibilities. This book provides a clear and concise guide to the operations, functions, and compliance and documentation requirements of India's standard-setting and regulatory bodies across all sectors and products, and thus will serve as an unmatched guide for manufacturers, traders, and exporters operating in the Indian market or seeking to export to India. It will also serve as a useful Handbook to policymakers, academics, and researchers interested in understanding the role of standard-setting bodies

in the field of international trade.

Volatile Compounds and Smell Chemicals (Odor and Aroma) of Food Eugenio Aprea,2021-04-29 Among the constituents of food, volatile compounds are a particularly intriguing group of molecules, because they give rise to odor and aroma. Indeed, olfaction is one of the main aspects influencing the appreciation or dislike of particular food items. Volatile compounds are perceived through the smell sensory organs of the nasal cavity, and evoke numerous associations and emotions, even before the food is tasted. Such a reaction occurs because the information from these receptors is directed to the hippocampus and amygdala, and the key regions of the brain involved in learning and memory. In addition to identifying the odor active compounds, the analysis of the volatile compounds in food is also applicable for detecting the ripening, senescence, and decay in fruit and vegetables, as well as monitoring and controlling the changes during food processing and storage (i.e., preservation, fermentation, cooking, and packaging). I warmly invite colleagues to submit their original research or review articles covering all aspects of volatile compounds research in the food sector (excluding pesticides), and/or the analytical methods used to identify, measure, and monitor these molecules.
