**Louis I. Kahn** Louis I. Kahn, David M. Robb, Marshall D. Meyers, 1978

La construcción de la mirada Luz Fernández Valderrama Aparicio, 2004 Cómo miran los arquitectos, cómo se han construido la mirada aquellos que se estudian y cómo podemos aprender de los mismos confeccionando la nuestra. Ésa es la búsqueda que da forma a este trabajo, teniendo como objetivo primero la arquitectura.

**La estructura como arquitectura** Andrew Charleson, 2006 Este libro estudia las posibilidades que tiene la estructura - es decir, vigas, pilares, entramados, soportes y otros elementos- para enriquecer la arquitectura. Lo que se busca aquí es que los arquitectos perciban la estructura como un elemento integral de la arquitectura antes que como una simple técnica aplicada. También se pretende incitarlos a que diseñen estructuras ellos mismos, en colaboración desde luego con los calculistas de estructuras, para así poder hacer realidad sus ideas arquitectónicas. Asimismo, se intenta cambiar esa visión - habitual al menos entre los estudiantes de arquitectura- , de que la estructura es un componente puramente técnico o, en el peor de los casos, un mal necesario. Para ello se ilustran ejemplos de la estructura como elemento arquitectónico indispensable, un elemento que se involucra y se integra por completo en la creación arquitectónica, desempeñando importantes papeles que afectan a los sentidos, el corazón y la mente de los usuarios de los edificios. Como proyectistas, debemos preguntarnos cómo puede añadir la estructura valores estéticos y funcionales a nuestros proyectos, y contribuir así a enriquecerlos. En primera instancia, este libro está escrito para estudiantes de arquitectura y arquitectos en ejercicio, pero se pretende también suscitar un interés algo más que pasajero entre los estudiantes de ingeniería y los ingenieros de estructuras que deseen ampliar su experiencia sobre el potencial arquitectónico de este aspecto de su disciplina. Ilustrado con ejemplos de más de 170 edificios, este estudio pretende servir como manual de referencia y como inspiración para hacer proyectos, pero también como un instrumento que ayude a los arquitectos a reflexionar sobre su propio trabajo; además se aporta un amplio repertorio de ejemplos muy diversos en los que la estructura realza ideas, conceptos y cualidades específicamente arquitectónicas.

Suspending Modernity: The Architecture of Franco Albini Kay Bea Jones, 2016-04-01 Franco Albini's works of architecture and design, produced between 1930 and 1977, have enjoyed a recent revival but to date have received only sporadic

scholarly attention from historians and critics of the Modern Movement. A chorus of Italian voices has sung his praises, none more eloquently than his protégé, Renzo Piano. Kay Bea Jones' illuminating study of selected works by Studio Albin will reintroduce his contributions to one of the most productive periods in Italian design. Albin emerged from the ideology of Rationalism to produce some of Italy's most coherent and poetic examples of modern design. He collaborated for over 25 years with Franca Helg and at a time when professional male-female partnerships were virtually unknown. His museums and installation motifs changed the way Italians displayed historic artifacts. He composed novel suspension structures for dwellings, shops, galleries and his signature INA pavilions where levity and gravity became symbolic devices for connoting his subjects. Albin clarified the vital role of tradition in modern architecture as he experimented with domestic space. His cohort defied CIAM ideologies to re-socialize postwar housing and speculate on ways of reviving Italian cities. He explored new fabrication technologies, from the scale of furniture to wide-span steel structures, yet he never abandoned the rigors of craft and detail in favor of mass-production. *Suspending Modernity* follows the evolution of Albin's most important buildings and projects, even as they reveal his apprehensive attitudes about the modern condition. Jones argues here that Albin's masterful use of materials and architectural expression mark an epic paradigm shift in the modern period.

El nuevo libro de Kenneth Frampton es fundamental para arquitectos, estudiantes y cualquier interesado en los secretos de la arquitectura...» Rafael Moneo, catedrático de Arquitectura, Universidad de Harvard, Graduate School of Design.
