House on Fire Joseph Finder,2020-01-21 In New York Times bestselling author Joseph Finder's electrifying new thriller, private investigator Nick Heller infiltrates a powerful wealthy family hiding something sinister. Nick Heller is at the top of his game when he receives some devastating news: his old army buddy Sean has died of an overdose. Sean, who once saved Nick's life, got addicted to opioids after returning home wounded from war. Then at Sean's funeral, a stranger approaches Nick with a job, and maybe also a way for Nick to hold someone accountable. The woman is the daughter of a pharmaceutical kingpin worth billions. Now she wants to become a whistleblower, exposing her father and his company for burying evidence that its biggest money-maker was dangerously addictive. It was a lie that killed hundreds of thousands of people, including Sean. All Nick has to do is find the document that proves the family knew the drug's dangers. But Nick soon realizes that the sins of the patriarch are just the beginning. Beneath the surface are barely concealed cabals and conspiracies: a twisting story of family intrigue and lethal corporate machinations. In a deadly game of chess that pits Nick against a family dynasty, against brothers and sisters with schemes of their own, Nick learns how far his enemy is willing to go to protect its name and its wealth.

Zen Pencils Gavin Aung Than,2014-11-11 NEW YORK TIMES BESTSELLER! Gavin Aung Than, an Australian graphic designer turned cartoonist, started the weekly Zen Pencils blog in February 2012. He describes his motivation for launching Zen Pencils: I was working in the boring corporate graphic design industry for eight years before finally quitting at the end of 2011 to pursue my passion for illustration and cartooning. At my old job, when my boss wasn't looking, I would waste time reading Wikipedia pages, mainly biographies about people whose lives were a lot more interesting than mine. Their stories and quotes eventually inspired me to leave my job to focus on what I really wanted to do. The idea of taking these inspiring quotes, combining them with my love of drawing and sharing them with others led to the creation of Zen Pencils. Zen Pencils deftly blends the inspired thoughts of our great creative and moral thinkers with its own fresh visual wit. Because these work

as pithy history lessons illuminating timeless human truths, it's no wonder Gavin's engaging comics go viral! —Michael Cavna, Washington Post's Comic Riffs Sometimes all it takes is a clear, original vision and a talented hand. Gavin Aung Than and his genius of Zen Pencils gives us that together, and so much more. --Chris Hadfield, retired astronaut and former Commander of the International Space Station If you read this book and don't get a lump in your throat and a stirring in your heart at least once, check your pulse. You're dead. —Philip Plait, The Bad Astronomer Gavin has the amazing ability to make words and ideas come alive. He teaches, inspires, and brings a whole new level of creativity to the quotes that hold a special place in our hearts. —Brené Brown, Ph.D., LMSW Author of the No. 1 New York Times Bestseller, Daring Greatly Zen Pencils is a visual demonstration of joy and courage. Buy it for inspiration, and keep it for regular reminders of living bigger. — Chris Guillebeau, New York Times Bestselling Author of The \$100 Startup

Genomics with Care Mike Fortun, 2023-06-30 In Genomics with Care Mike Fortun presents an experimental ethnography of contemporary genomics, analyzing science as a complex amalgam of cognition and affect, formal logics and tacit knowledge, statistics, and ethics. Fortun examines genomics in terms of care—a dense composite of affective and cognitive forces that drive scientists and the relations they form with their objects of research, data, knowledge, and community. Reading genomics with care shows how each resists definition yet is so entangled as to become indistinguishable. Fortun analyzes four patterns of genomic care—curation, scrupulousness, solicitude, and friendship—seen in the conceptual, technological, social, and methodological changes that transpired as the genetics of the 1980s became the genomics of the 1990s, and then the “post-genomics” of the 2000s. By tracing the dense patterns made where care binds to science, Fortun shows how these patterns mark where scientists are driven to encounter structural double binds that are impossible to resolve, and yet are where scientific change and creativity occur.

Quotes by Neil DeGrasse Tyson Lilith Regan, 2020-03-30 My view is that if your philosophy is not unsettled daily then you are blind to all the universe has to offer. God is an ever-receding pocket of scientific ignorance. Where ignorance lurks, so too do the frontiers of discovery and imagination I would request that my body in death be buried not cremated, so that the energy content contained within it gets returned to the earth, so that flora and fauna can dine upon it, just as I have dined upon flora and fauna during my lifetime In 5-billion years the Sun will expand & engulf our orbit as the charred ember that was once Earth vaporizes. Have a nice day. The more I learn about the universe, the less convinced I am that there's any sort of benevolent force that has anything to do with it, at all. People cited violation of the First Amendment when a New

Jersey schoolteacher asserted that evolution and the Big Bang are not scientific and that Noah's ark carried dinosaurs. This case is not about the need to separate church and state; it's about the need to separate ignorant, scientifically illiterate people from the ranks of teachers. ... there is no shame in not knowing. The problem arises when irrational thought and attendant behavior fill the vacuum left by ignorance.
