Enseigner la langue française à l'école - La grammaire, le vocabulaire et la conjugaison Carole

Tisset, 2017-03-22 Cet ouvrage se propose d'éclairer l'enseignement de la grammaire en décrivant des regards croisés sur l'histoire des notions, la position actuelle des chercheurs, le degré de conscience métaréflexive des élèves. Pour chaque notion, l'auteur montre les possibilités d'analyse des élèves et les investissements en lecture/écriture, en prenant soin de distinguer l'orthographe des autres activités. L'enseignant trouvera donc un outil de formation disciplinaire sur les « savoirs savants » et un outil pédagogique qui propose des démarches et des outils professionnels.

Towards the Multilingual Semantic Web Paul Buitelaar, Philipp Cimiano, 2014-11-13 To date, the relation between multilingualism and the Semantic Web has not yet received enough attention in the research community. One major challenge for the Semantic Web community is to develop architectures, frameworks and systems that can help in overcoming

national and language barriers, facilitating equal access to information produced in different cultures and languages. As such, this volume aims at documenting the state-of-the-art with regard to the vision of a Multilingual Semantic Web, in which semantic information will be accessible in and across multiple languages. The Multilingual Semantic Web as envisioned in this volume will support the following functionalities: (1) responding to information needs in any language with regard to semantically structured data available on the Semantic Web and Linked Open Data (LOD) cloud, (2) verbalizing and accessing semantically structured data, ontologies or other conceptualizations in multiple languages, (3) harmonizing, integrating, aggregating, comparing and repurposing semantically structured data across languages and (4) aligning and reconciling ontologies or other conceptualizations across languages. The volume is divided into three main sections: Principles, Methods and Applications. The section on “Principles” discusses models, architectures and methodologies that enrich the current Semantic Web architecture with features necessary to handle multiple languages. The section on “Methods” describes algorithms and approaches for solving key issues related to the construction of the Multilingual Semantic Web. The section on “Applications” describes the use of Multilingual Semantic Web based approaches in the context of several application domains. This volume is essential reading for all academic and industrial researchers who want to embark on this new research field at the intersection of various research topics, including the Semantic Web, Linked Data, natural language processing, computational linguistics, terminology and information retrieval. It will also be of great interest to practitioners who are interested in re-examining their existing infrastructure and methodologies for handling multiple languages in Web applications or information retrieval systems.
