Covering the whole gamut of people-management skills, the author presents maxims on: planning * motivation * expectations * teaching and coaching * measuring performance * rewards and consequences * relationship management, self-management * leadership. The Dictionary of Modern Proverbs , 2012-05-22 You can't unring a bell. It takes a village to raise a child. Life is just a bowl of cherries. We sometimes think of proverbs as expressions of ancient wisdom, but in fact new proverbs are constantly arising. This unique volume is devoted exclusively to English language proverbs that originated in the twentieth and twenty-first centuries. The most complete and accurate such collection ever compiled, The Yale Book of Modern Proverbs presents more than 1,400 individual proverbs gathered and researched with the help of electronic full-text databases not previously used for such a project. Entries are organized alphabetically by key words, with information about the earliest datable appearance, origin, history, and meaning of each proverb. Mundane or sublime, serious or jocular, these memorable sayings represent virtually every aspect of the modern experience. Readers will find the book almost impossible to put down once opened; every page offers further proof of the immense vitality of proverbs and their colorful contributions to the oral traditions of today.

Portfolio Performance Measurement and Benchmarking, Chapter 21 - Elements of a Desirable Benchmark Jon A.

Christopherson, David R. Carino, Wayne E. Ferson, 2009-05-15 Here is a chapter from Portfolio Performance Measurement and Benchmarking, which will help you create a system you can use to accurately measure your performance. The authors highlight common mechanical problems involved in building benchmarks and clearly illustrate the resulting fallouts. The failure to choose the right investing performance benchmarks often leads to bad decisions or inaction and, inevitably, lost profits. In this book you will discover a foundation for benchmark construction and discuss methods for all different asset classes and investment styles.

The Invisible Bestseller Kenneth A. Briggs, 2016 How can a book -- one that's found in courthouses, libraries, and millions of households across the land -- be everywhere and nowhere at the same time? In this book, veteran religion writer Kenneth Briggs asks how, even as the Bible remains the best-selling book of all time, fewer Americans than ever can correctly articulate what it says, much less how it might offer guidance for their lives. In a quest to make sense of the Bible's relative disappearance from public life, Briggs shares with readers his own two-year cross-country journey to a variety of places. Brigg's narrative incorporates pertinent interviews throughout with preachers, pollsters, scholars, and ordinary citizens from California to Texas to Florida to Massachusetts. As he probes and reflects on his varied findings, Briggs offers keen insight into why and how the Bible's place in American public life has shifted and shrunk -- and he suggests what role the Bible may play in the US in years to come. -- adapted from book flap.

The Transportation Experience William L. Garrison, David M. Levinson, 2014-01-09 The Transportation Experience explores the historical evolution of transportation modes and technologies. The book traces how systems are innovated, planned and adapted, deployed and expanded, and reach maturity, where they may either be maintained in a polished obsolesce often propped up by subsidies, be displaced by competitors, or be reorganized and renewed. An array of examples supports the idea that modern policies are built from past experiences. William Garrison and David Levinson assert that the planning (and control) of nonlinear, unstable processes is today's central transportation problem, and that this is universal and true of all modes. Modes are similar, in that they all have a triad structure of network, vehicles, and operations; but this framework counters conventional wisdom. Most think of each mode as having a unique history and status, and each is regarded as the private playground of experts and agencies holding unique knowledge, operating in isolated silos. However, this book argues that while modes have an appearance of uniqueness, the same patterns repeat: systems policies, structures, and behaviors are a generic design on varying modal cloth. In the end, the illusion of uniqueness proves to be myopic. While it is true that knowledge has accumulated from past experiences, the heavy hand of these experiences places boundaries on current knowledge; especially on the ways professionals define problems and think about processes. The Transportation Experience provides perspective for the collections of models and techniques that are the essence of transportation science, and also expands the boundaries of current knowledge of the field.
