Advantages and Disadvantages of Using Social Networks in Business Caroline Mutuku,2018-02-08 Essay from the year 2017 in the subject Business economics - Offline Marketing and Online Marketing, grade: 1.8, , language: English, abstract: In the contemporary world, there is no business without communication. To most entrepreneurs in the 21st century, social media use in business is seemingly the next big thing. The emergence of an online technology that allows reaching of big crowds without necessarily meeting them has presented a temporary yet essential fad that ought to be appropriately made use of while it is still in the spotlight. To this group of entrepreneurs, reaching out the virtual market has presented itself as a stepping-stone to, not only establish their brands, but also to make it earn acceptance in the market. Others have even gone further to establish online shops where customers can easily order and wait for their products to be delivered without having to necessarily visit the product stores. Unfortunately, however, there exists a population to which social media marketing is a buzzword without any practical advantage and steep. They envision it to be a complicated learning curve that further makes their business life unexpectedly complex. With regards to the different approaches to social media, this paper will look at both the negative and the positive aspects of using social media as a tool for running business operations.

E-Collaboration Technologies and Strategies for Competitive Advantage Amid Challenging Times Zhao, Jingyuan,Richards, Joseph,2021-06-11 E-collaboration is a tool that breaks the boundaries of activities within and between

organizations. E-collaboration technologies are making it easier than ever for people to work together no matter where they happen to be. Succeeding with collaboration at a level where it represents a competitive advantage requires a broad approach. Internal social networks can circumvent bureaucratic boundaries and facilitate information sharing activities among individuals across hierarchies and divisions or departments. This allows organizations to acquire resources or competencies from external sources that otherwise would be difficult or expensive to access. Accordingly, organizations focus more on their own areas of competence and gain a competitive advantage by acquiring richer content and better solutions in a creative and cost-effective way. Challenging times can provide new opportunities that need to be detected at the right time. There must be many other sources of competitive advantages which should support the main source of competitive value. Competitive advantage may be gained if the organization is able to find sources of competitive advantage in time of economic crises. Organizations have rapidly deployed technology solutions, such as collaboration tools and cloud computing, which enable their employees to work remotely and continue these organizational operations, especially during times of crisis. *E-Collaboration Technologies and Strategies for Competitive Advantage Amid Challenging Times* focuses on e-collaboration technologies, strategies, and solutions from a perspective of organizational competitive advantage, including e-collaboration technologies' situation and solutions, innovation systems, competition and strategies, marketing, and growth capabilities. The book presents a full understanding on e-collaboration technologies, strategies, and solutions in organizations, and provides insight for how to develop e-collaboration technologies, strategies, and solutions more generally so as to simultaneously leverage potential benefit and guard against potential risk, promoting organizational competitive advantage amid challenging times. This book is ideally intended for policymakers, government officials, corporate heads of firms, managers, managing directors, practitioners, researchers, academicians, and students seeking information on the e-collaboration technologies being employed in businesses in times of crisis.

CYBER LAWS AND IT PROTECTION, SECOND EDITION CHANDER, HARISH, KAUR, GAGANDEEP, 2022-04-20 India has emerged as a hub of the IT industry due to the phenomenal growth of the IT sector. However, this huge growth has brought legal complications due to a switch from paper-based commercial transactions to e-commerce and e-transactions. This book, now in its Second Edition, discusses the legal position of Information Technology (IT), e-commerce and business transaction on the cyberspace/Internet under the Information Technology (IT) Act in India. Divided into five parts, Part I of the text deals with the role of the Internet, e-commerce and e-governance in the free market economy. Part II elaborates on various laws relating to electronic records and intellectual property rights with special reference to India. Efforts are being

made internationally to rein in cybercrimes by introducing stringent laws; Part III deals with various rules and regulations which have been introduced to get rid of cybercrimes. Part IV is devoted to discussing various offences committed under the IT Act, penalties imposed on the offenders, and compensations awarded to the victims. Finally, Part V acquaints the students with electronic evidence, social media crimes and investigation in cybercrimes. This book is designed as a text for postgraduate students of Law (LLM), undergraduate law students (B.A. LL.B./ BBA LL.B./ B.Com. LL.B.), postgraduate students of Information Technology [B.Tech./M.Tech. (IT)] and for Master of Computer Applications (MCA) wherever it is offered as a course. The Success of the Occupy Wall Street Movement due to Twitter Finbar O' Grady, 2013-07-01 Master's Thesis from the year 2012 in the subject Business economics - Offline Marketing and Online Marketing, grade: B2, University of Limerick, course: Masters in Business Management, language: English, abstract: The "Occupy Movement" is an international protest movement driven by people's discontent with social and economic inequality. This paper is based primarily on Mark Earls book 'Herd', particularly his research regarding how "All mass behavior is a result of interacting individuals within a specific context" (Herd 2009 p.147). It will examine social media's ability to magnify how word of mouth can influence mass behavior also considering Seth Godin book "Tribes" in this context and the increased speed at which this can happen due to social media (Godin 2008). The paper discusses how the Occupy Movement was partly inspired by the Arab Spring uprisings which had already demonstrated the power that social media can have on mass behavior throughout 2011. "We use Facebook to schedule the protests, Twitter to coordinate, and youtube to tell the world" was exclaimed by a Cairo activist to convey how they were leveraging social media to their advantage during the riots in Egypt (Casilli & Tubaro 2011). Social media refers to the use of both web-based and mobile technologies to allow people to communicate with each other and build relationships. Micro blogging sites such Twitter fall under the large scope of social media, as do social networking sites such as Facebook. Since the advent of Smartphones, people have access to social media sites at all times. People often look to Twitter for news first as updates about current events often appear on Twitter before they appear on major news outlets, The paper will discuss both the advantages of disadvantages of how social media can be utilized by the people involved in protests or riots by comparing the Cronulla riots of 2005 against the London riots of 2011 when social media was much more accessible and common place. The paper will also look at how the Occupy Movement spread across the world very quickly and discuss Occupy Wall Street's future from the view point of it being a brand. It will conclude by showing that the Occupy Movement can attribute its growth and participation to social media's effect on mass behavior, and in particular why Twitter is largely responsible for its success.
