Analysing English-Arabic Machine Translation Zakaryia Almahasees,2021-11-29 Machine Translation (MT) has become widely used throughout the world as a medium of communication between those who live in different countries and speak different languages. However, translation between distant languages constitutes a challenge for machines. Therefore, translation evaluation is poised to play a significant role in the process of designing and developing effective MT systems. This book evaluates three prominent MT systems, including Google Translate, Microsoft Translator, and Sakhr, each of which provides translation between English and Arabic. In the book Almahasees scrutinizes the capacity of the three systems in dealing with translation between English and Arabic in a large corpus taken from various domains, including the United Nation (UN), the World Health Organization (WHO), the Arab League, Petra News Agency reports, and two literary texts: The Old Man and the Sea and The Prophet. The evaluation covers holistic analysis to assess the output of the three systems in terms of Translation Automation User Society (TAUS) adequacy and fluency scales. The text also looks at error analysis to evaluate the systems' output in terms of orthography, lexis, grammar, and semantics at the entire-text level and in terms of lexis, grammar, and semantics at the collocation level. The research findings contained within this volume provide important feedback about the capabilities of the three MT systems with respect to EnglishArabic translation and paves the way for further research on such an important topic. This book will be of interest to scholars and students of translation studies and translation technology.

Translatology, Translation and Interpretation - Toward a New Scientific Endeavor Noury Bakrim,2024-02-07 This book brings together scholarly contributions to question, model, and reshape translatology as the scientific discipline studying language translation. The chapters emphasize the hypothesis of a real domain of observability and objectivity through experimental and applied perspectives. The authors offer a balanced view of adequacy and coherence between the empirical and theoretical components of the book. The chapters include a good deal of individual language data from both source and target approaches, with a focus on typologically and culturally diverse spaces such as the African context. Domains of inquiry such as terminology and the cognitive dimension of the process exemplify the ability to create a dialogue between multidisciplinary intersections and translatological attempts of laws and generalizations.

Applying Technology to Language and Translation Leung Sze Ming,Chan Sin-wai,2024-12-31 A cutting-edge collection of

work on the influence and application of new technologies on the study and practice of language and translation. This book analyzes the relationship between technology, language, and translation in the digital age. Language issues covered include an automatic football commentary system, the use of digital humanities in the versification of Classical Chinese poetry, the application of corpus linguistics in identity construction in Hong Kong, Cantonese speech recognition, and the use of AI in a Chabot system. Other chapters look at translation matters, such as technologies for interpreting, neural machine translation for press releases, computer-aided annotation for translator and interpreter training, and artificial intelligence and translation. As language and translation are closely intertwined, together, these chapters illustrate the drastic changes that technology has brought to these combined areas. A vital resource for scholars and students studying the impact of technology on language and translation.

Google Apps: The Missing Manual Nancy Conner,2008-05-27 Among its many amazing applications, Google now has web-based alternatives to many of the applications in Microsoft Office. This comprehensive and easy-to-follow new book enables you to explore Google's new office applications in detail. Once you do, you'll be in good company -- more than 100,000 small businesses and some corporations are already looking to take advantage of these free Google offerings. Google Apps: The Missing Manual teaches you how to use three relatively new applications from Google: Docs and Spreadsheets, which provide many of the same core tools that you find in Word and Excel; and Google Calendar and Gmail, the applications that offer an alternative to Outlook. This book demonstrates how these applications together can ease your ability to collaborate with others, and allow you access to your documents, mail and appointments from any computer at any location. Of course, as remarkable as these applications are, Google's office suite is definitely a work-in-progress. Navigating what you can and can't do and -- more importantly -- understanding how to do it isn't always easy. And good luck finding enough help online. Google Apps: The Missing Manual is the one book you need to get the most out of this increasingly useful part of the Google

empire. This book: Explains how to create, save and share each of Google's web-based office applications Offers separate sections for Docs and Spreadsheets, Google Calendar, and Gmail Demonstrates how to use these applications in conjunction with one another Gives you crystal-clear and jargon-free explanations that will satisfy users of all technical levels Many of you already use Gmail, but do you know its full potential? Do you know how you can increase its power by using Gmail with Doc and Spreadsheets and Google Calendar? You'll find out with Google Apps: The Missing Manual. You'll also come to understand why large corporations such as General Electric and Proctor & Gamble are taking a long, hard look at these applications.
