**ePortfolios in Australian Universities** Jennifer Rowley, 2016-09-14 This book focuses on essential findings concerning emerging practices of student learning through the teaching and learning benefits of the electronic portfolio (ePortfolio) in a range of disciplines at Australian universities. It explores the latest research on ePortfolios, teaching quality, future research directions for tertiary learning and teaching, institutional agendas in higher education, and the role that the ePortfolios can play in supporting improvements in pedagogic practice and student outcomes. Included in these agendas is research into the development of higher education through the technologising of pedagogy, learner identities in discrete disciplines, and the praxis of individual university teachers. The book covers accounts of academic learning success and challenges across current higher education subject areas. By presenting case study accounts of ePortfolio use, it reveals the importance of defining and documenting how we can meaningfully develop learner portfolios in research, teaching and learning at Australian universities. With an intentional research base, the book draws on work conducted inside and outside Australia and highlights how the ePortfolio can help tertiary staff prepare for the impact of a student-created portfolio on teaching, learning, and subsequent academic scholarship.

*Textbook of Diagnostic Ultrasonography* Sandra L. Hagen-Ansert,2006 Now with hundreds of new images, this core text focuses on the two main divisions within sonography: general/abdominal and obstetric/gynecologic. It also provides coverage of vascular ultrasound and an introduction to echocardiography. While the abdominal and vascular sections are organized by body systems, OB/GYN uses a chronologic approach to development during pregnancy and an anatomic approach to gynecologic pathology. Each chapter covers patient history; normal anatomy, including cross-sectional anatomy; ultrasound techniques; pathology; and related laboratory findings. Ultrasound Tips offer practical, easy-to-find information on scanning techniques. Full-color presentation includes line art, design, and color scans, enhancing the visual appeal and teaching value of the text. Pathology tables present clinical findings, lab findings, sonography findings, and differential considerations. Key Terms and Definitions at beginning of each chapter highlight the most important information. Chapter Objectives and Review Questions open each chapter, and short-answer and essay questions are provided at the end. New chapters cover the following: . Introduction to Physical Findings includes assessment, lab values, and disease principles as they relate to sonography . Contrast Applications in the Abdomen . Invasive/Intraoperative Procedures in the Abdomen . Emergent Ultrasound Procedures . Musculoskeletal System . Neonatal Hips . Neonatal Spine . Sonographic Evaluation for Infertility . Sonographic 3D/4D Evaluation of Fetal Anomalies Basic and Professional Competencies in Sonography and Standards of Practice Hemodynamics Portal Hypertension HIPAA coverage provides information on how these new regulations affect the clinical environment.
