Educación Física 3.0. Innovación y tecnología en el aula de Primaria Carmen Ocete Calvo, María Fernández Rivas, 2025-11-16 Este libro es producto del trabajo coordinado del profesorado universitario y que se enmarca en dos proyectos de innovación docente financiados en convocatorias propias de la Universidad Pontificia Comillas. Surge del compromiso del profesorado universitario de las asignaturas de Innovación Educativa, Didáctica de las Actividades Físicas y Deportivas, Teoría y Práctica de los Juegos Motores, Primeros Auxilios en la Actividad Física y el Deporte, y Prácticas, con el objetivo de visibilizar y compartir experiencias de innovación desarrolladas en el ámbito universitario. Desde una mirada reflexiva y transformadora, se propone fomentar la creación de recursos didácticos como ejemplos reales de iniciativas donde el alumnado —futuros docentes de Educación Primaria— diseña, implementa y evalúa propuestas pedagógicas significativas. Estas iniciativas promueven la participación, la cooperación y la capacidad crítica, al tiempo que animan a los estudiantes a cuestionar lo establecido, explorar nuevas estrategias y asumir un papel activo como agentes de cambio en los procesos

educativos.

Estado del Conocimiento Zoila Rafael Ballesteros, 2024-12-30 La presente obra surge en el marco de los trabajos realizados en la Red de Investigadores Normalistas (REDIEN), que inició con el interés de indagar sobre los procesos formativos que suceden en las Escuelas Normales. La primera etapa se centró en investigar quién es el estudiante que ingresa y se prepara profesionalmente en estas instituciones, particularmente, porque una de las preocupaciones actuales entre los docentes de las Escuelas Normales es atender a una población de estudiantes inmersos en una sociedad de consumo denominada por Bauman (2017) “una sociedad líquida”, en la que la satisfacción está puesta en lo inmediato, en obtener lo que se desea de manera rápida y sin esfuerzo, propiciando una fragilidad del Yo y una hipersensibilidad al sufrimiento.

Modelo de la Escalera de la Comunicación Asertiva, los escalones que previenen la deserción escolar Skary Armando López Osuna, 2024-05-09 Modelo de la escalera de la comunicación asertiva los escalones que previenen la deserción escolar. Antología y didáctica ofrece un viaje revelador a través de la implementación de una intervención psicopedagógica en una escuela secundaria, donde la lucha contra la deserción escolar se convierte en el escenario para una profunda exploración de la comunicación asertiva. El diagnóstico inicial, tras un breve contexto económico y social, revela deficiencias en la toma de decisiones y habilidades comunicativas entre los estudiantes. La falta de comunicación asertiva es un factor clave en la deserción escolar, por lo que se introduce un modelo de siete pasos —el modelo de la escalera de comunicación asertiva— efectuado a través de talleres. El libro presenta evidencias de que la aplicación del modelo ECA modifica actitudes, promoviendo decisiones más eficaces y una convivencia escolar positiva. Se sostiene que la comunicación

asertiva no solo aborda la deserción escolar, sino que también fortalece habilidades sociales cruciales para la participación activa de los estudiantes en una sociedad diversa. El libro documenta así evidencias convincentes de que el modelo no solo modifica actitudes, sino que también promueve decisiones más eficaces y una convivencia escolar más saludable, habilidades necesarias para enfrentar los obstáculos de la vida y participar plenamente en una sociedad plural.

Al borde del abismo Gilberto Guevara Niebla, José Navarro Cendejas, 2024-06-17 Paulo Alberto Carrillo Torres - Eduardo Backhoff Escudero Raquel Ahuja Sánchez - Claudia Santizo Rodall - Karin Yovana Quijada Lovatón - Antonio Gómez - Nashiki - Úrsula Zurita Rivera - Leticia Fuentes Vera - Gabriela de la Cruz Flores Hugo Balbuena Corro - Silvia García Peña - Amira Dávalos Emiliana Rodríguez-Morales - Carlos Ornelas - Aldo Muñoz Armenta Elisa Bonilla Rius - Laura Frade Rubio - Leslie Serna Hernández Gilberto Guevara Niebla - José Navarro Cendejas En los últimos meses hemos vivido una tormenta pública en torno a los libros de texto de educación básica. No hay, sin embargo, mucha claridad sobre el objeto central del debate. Lo que se puede decir con precisión es que el gobierno federal encabezado por Andrés Manuel López Obrador impulsó, desde 2021, no una reforma, sino una transformación radical de la educación básica de México, con el argumento de que la educación anterior era neoliberal y estaba atada a una lógica de intereses privados. En esta obra colectiva, Gilberto Guevara Niebla y José Navarro Cendejas reúnen a expertos en distintos campos que aportan un panorama descriptivo y analítico de la educación básica en México, con especial énfasis en sus problemáticas y deficiencias. Al borde del abismo tiene como finalidad brindar los elementos para ampliar el debate sobre la pertinencia de la ejecución de la reforma curricular de 2022 en un contexto como el que aquí se presenta. «La educación es un derecho universal consagrado en la Constitución que el Estado garantiza, pero para atender ese derecho ¿el gobierno federal puede impartir cualquier tipo de educación?»

La Orientación Educativa: una mirada desde la investigación científica Colectivo, 2023-04-10 El libro La Orientación Educativa: una mirada desde la investigación científica, es producto del Congreso de Pedagogía y Deporte, organizado por la Red de Investigadores de la Educación y el Deporte en coordinación con la Red Iberoamericana de Pedagogía e instituciones Aliadas que promueven el desarrollo, socialización y visualización de las investigaciones que contribuyan al cambio contextualizado del proceso de enseñanza-aprendizaje en cualquiera de sus manifestaciones apoyados en la ciencia y la tecnología. En el libro se abordan temáticas relacionadas con las Ciencias de la Educación dirigidas a mejorar el desempeño de la actividad docente-educativa, proceso de enseñanza-aprendizaje, problemas específicos esenciales en la formación de los maestrantes en su área de trabajo como profesionales de la educación, aplicar métodos científicos y habilidades profesionales de acuerdo con el avance de las Ciencias de la Educación, así como concebir y desarrollar proyectos de acuerdo con las necesidades institucionales, familiares e individuales. Las propuestas didácticas y pedagógicas que se presentan se convierten en una herramienta potencial que conduce a la formación académica e enriquece los aprendizajes,

así como la actividad científico-investigativa que prepara a los educandos en el orden teórico y práctico desde diferentes contextos educativos favoreciendo el desempeño personal de los profesionales de la educación.

El desarrollo de la habilidad profesional pedagógica utilizar software educativo por docentes de Ciego de Ávila Rodolfo Luis Reyes Baños,2017-04-20 Tesis Doctoral / Disertación del año 2016 en el tema Didáctica - Ciencias de la computación, , Materia: Informática educativa, Idioma: Español, Resumen: La introducción de las Tecnologías de la Información y las Comunicaciones (TIC) está estrechamente relacionada con el desarrollo alcanzando en la sociedad, en especial la Informática que abarca progresivamente todas las esferas y especialmente la educación; lo que genera una necesidad de superación continua de los docentes para su uso eficientemente en el proceso de enseñanza-aprendizaje, pero son insuficientes las acciones desde el punto de vista teórico y práctico para darle solución a esta problemática. La investigación tiene como objetivo proponer una definición y estructuración de la habilidad utilizar software educativo (SE) de manera que facilite la formación permanente de los docentes en este sentido. Lo anterior condujo a profundizar en la forma de perfeccionar la utilización del software educativo a partir del desarrollo de diferentes habilidades profesionales. En esta investigación se usaron diferentes métodos que permitieron determinar las tendencias que se dieron en la superación de los docentes a lo largo de más de diez años en la utilización del software educativo, la definición y estructuración de la habilidad profesional pedagógica utilizar software educativo y la proyección de un programa de superación que responde a la habilidad antes mencionada y da respuesta a la exigencia de la utilización de estas tecnologías en la educación. Lo novedoso reside en enfocar como el aspecto interno de una habilidad la secuencia procedimental necesaria para la utilización correcta del software educativo y evaluar la efectividad. La puesta en práctica de la propuesta realizada permitió un mejor tratamiento metodológico del medio a nivel provincial, una mejor preparación de los docentes en las actividades que se realizan en el proceso de enseñanza-aprendizaje y además permitió el uso del software educativo con más creatividad, entre otros resultados.
