Thomas Aichner

This Book Will Make You Calm Jessamy Hibberd,Jo Usmar,2014-01-02 Life in the 21st century is tough - new technology, constant change, more choice and extra pressure all add to our stress levels. And when you're stressed or tired your insecurities increase - so breaking that cycle feels impossible. But help is at hand: this book will show you how to beat stress and become more positive, relaxed and productive. Dr Jessamy Hibberd and Jo Usmar draw on the latest cognitive behavioural therapy (CBT) research to show you how to develop coping strategies and learn practical techniques to deal with stress and anxiety quickly and effectively. From reducing worry and boosting energy to breathing and mindfulness techniques, this helpful little book will make your life more serene, stress-free and fulfilled.

Serving the Customer Thomas Aichner,2023-01-01 This book examines key aspects of selling and the sale of goods and services in B2C and B2B. Renowned scholars and practitioners contributed their expertise with a wide range of articles about how to serve customers and the role of selling and sales. Their research results and practical experiences can be used as a basis for further research as well as implemented by small, medium-sized and globally operating companies. The 13 chapters are organized in four parts, starting with (I) value creation and selling services, followed by (II) business negotiations and sales in B2B, (III) using technology and innovation to increase sales and study consumers, and finishing with two chapters about sales competencies on the one hand and a critical piece about consumption on the other hand under (IV) selling more or consuming less?The European perspective adopted in the book provides both international researchers and entrepreneurs, as well as those already working in Europe, with a better understanding of the market and the dynamics in the consumer and business sectors. Excerpt from the content The meaning of value creation and value-in-use in selling services The vital role of pricing, customer participation, and the responsibilities of front-line employees How to negotiate the sale in B2B and purchase of three distinct types of business services How, why, and under which circumstances retailers are considering machine learning forecasting methods to increase sales Proposal for an autonomous consumer business, which is about fully automating transactions between a seller and a buyer How the Net Promoter Score works and why it can be both beneficial but also viewed skeptically Which specific competencies sales professionals must possess to succeed and sell well The downsides and threats of our economic system with a single-minded focus on the growth of sales or revenues

Cultures and Materialities of Imagination Stephan S. Sieland,2020-10-01 In our current digital era, imagination and

the cultural and material conditions by which it is developed are more crucially than ever implicated in the experienced adversities and contradictions of drug use. The technological changes of society underscore the need for rethinking dominant understandings which portray addiction as an immediate and even mindless relation between a person and a substance or behavior, only minimally affected by subjective significance and historical alterations of everyday life. Indeed, from ancient mythology to our modern times drugs have been part of our cultural history. Understandings and practices of their uses have developed through cultural ideas and cultural-material conditions like traditions, rituals and routines. Today, the omnipresence of digital media in everyday life is massively changing and expanding such cultural and material conditions. Digital media equip people with associations between drugs and an incredible abundance of images, ideas, facts, fiction, narratives, plots, soundtracks, characters, and much more, and thereby expanding their imaginable potentials for providing answers to biographical questions. People and potential drug use become connected in novel and labyrinthine ways through digital communities and arrangements of everyday life. And digital media are part of and transform the cultural-material practices in which activities and experiences of intoxication actually take place. In the book, all these details are extensively analyzed empirically based on qualitative data on the lives of a number of young, Danish people who were undergoing treatment for drug-related problems at the time of the research. An underlying premise of the entire work is that addiction may be seen as a more extreme expression of how the technological developments in our contemporary world more generally speaking magnify the contradictory implications of imagination for modern living. Over the recent years, psychological research into the significance of the human capacity to imagine for how people deal with and live their lives has received growing attention. Yet, the complex involvement of imagination in actual living and consequently the theoretical cruxes this engenders continue to amaze and surprise research and researchers. This book also contributes to these theoretical ambitions with a substantial work on the concept of imagination. It primarily suggests that a critical discussion of how imagining is essentially a contradictory process in everyday life and how it is always grounded in the agency of material aspects, ranging anywhere from mundane artifacts over mediated content to advanced technologies, is ultimately what makes the scientific study of imagination relevant to understanding and intervening in the dilemmas and crises of modern life and society. The book will primarily interest scholars of social psychology of everyday life, scholars working conceptually and empirically on imagination, scholars of social studies of media, materiality and technology, and researchers or practitioners working with addictions.
