**The Fourth Turning** William Strauss, Neil Howe, 1997-12-29 NATIONAL BESTSELLER • Discover the game-changing theory of the cycles of history and what past generations can teach us about living through times of upheaval—with deep insights into the roles that Boomers, Generation X, and Millennials have to play—now with a new preface by Neil Howe. First comes a High, a period of confident expansion. Next comes an Awakening, a time of spiritual exploration and rebellion. Then comes an Unraveling, in which individualism triumphs over crumbling institutions. Last comes a Crisis—the Fourth Turning—when society passes through a great and perilous gate in history. William Strauss and Neil Howe will change the way you see the world—and your place in it. With blazing originality, *The Fourth Turning* illuminates the past, explains the present, and reimagines the future. Most remarkably, it offers an utterly persuasive prophecy about how America’s past will predict what comes next. Strauss and Howe base this vision on a provocative theory of American history. The authors look back five hundred years and uncover a distinct pattern: Modern history moves in cycles, each one lasting about the length of a long human life, each composed of four twenty-year eras—or “turnings”—that comprise history’s seasonal rhythm of growth, maturation, entropy, and rebirth. Illustrating this cycle through a brilliant analysis of the post-World War II period, *The Fourth Turning* offers bold predictions about how all of us can prepare, individually and collectively, for this rendezvous with destiny.

**Summary of The Fourth Turning** Alexander Cooper, 2021-03-26 Summary of The Fourth Turning *The Fourth Turning* is a book by William Strauss and Neil Howe. It outlines the foundation for what is now known as Strauss-Howe generational theory. The main tenet of the book is that American and global history follows a generational cycle. The cycle is defined by four Turnings,” each lasting about 20 years. Generational archetypes play a crucial role in historical events, and these archetypes recur. The cycle of the four Turnings is called a saeculum” and is roughly the length of human life. The book offers a detailed description of the underlying philosophy. The key idea is seasonality. The authors offer their findings from nature and history to claim that the cyclical nature of time permeates all life, including American history. Furthermore, the authors analyze Anglo-American history to find patterns in a generational attitude. They then correlate these characteristics to the historical events of significance. The evidence that the authors present focuses on their interpretation of key historical figures, as well as societal attitudes. The cyclical generational attitudes are the prime factor in analyzing history and politics,

according to Strauss and Howe. The authors claim that race, gender, economic class, religion, and political beliefs are all less influential in determining the course of history. This claim is controversial, and authors reflect on their stance against other prominent academics, offering some comparison with several secondary sources. Overall, the evidence that the authors present is highly subjective and is not sufficiently bolstered with verifiable sources. Each generation is presented as having a unified voice, with few acknowledgments of a diversity of thought within each generational group. Therefore, the predictions are not based on solid evidence. Rather, the book puts forward a theory of generational seasonality. The authors explore what this theory could mean, but they do not offer a sufficient basis for their findings. **Summary Of The Fourth Turning** Scorpio Digital Press,2019-06-26 Is massive change coming in the form of...? THE FOURTH TURNING? Read on and decide for yourself! Immerse yourself in this summary and analysis of The Fourth Turning by William Strauss and Neil Howe. Let me give you the list of Strauss and Howe's popular book: The Fourth Turning insists that events in history follow a predictable cycle. By looking at Anglo-American history over an extremely long span, one can conclude that there are in fact distinct cycles that can be measured and described. Each of these cycles is made up of turnings, or time of societal change. They each typically last around 20 years. Reaching back to the Etruscans and early Roman Empire, the authors explain how these civilizations first linked the cycles of human life and the cycles of history to the passing of the seasons. They explain that a year passes through four seasons. There are birth and generation in the spring and summer, and harvest and death in the fall and winter. They explain that the span of human generations and empires are similar. Strauss and Howe describe how a saeculum (an approximately 80-year period) encompasses four historical/cultural rhythms. This idea comes from the early Romans - their empire itself was believed to be destined for a fixed number of 100 years and indeed the Roman Empire did follow this prediction. They even took into account accidents of nature and outside invasion. Each of the four cycles contains different generations, which each have their own distinct place in their civilization's drama. The Fourth Turning Is Here Neil Howe,2023-07-18 Twenty-five years ago, Neil Howe and the late William Strauss dazzled

the world with a provocative new theory of American history. Looking back at the last 500 years, they'd uncovered a distinct pattern: modern history moves in cycles, each one lasting roughly eighty to one hundred years, the length of a long human life, with each cycle composed of four eras--or turnings--that always arrive in the same order and each last about twenty years. The last of these eras--the fourth turning--was always the most perilous, a period of civic upheaval and national mobilization as traumatic and transformative as the New Deal and World War II, the Civil War, or the American Revolution. Now, right on schedule, our own fourth turning has arrived. And so Neil Howe has returned with an extraordinary new prediction. What we see all around us--the polarization, the growing threat of civil conflict and global war--will culminate by the early 2030s in a climax that poses great danger and yet also holds great promise, perhaps even bringing on America's next golden age. Every generation alive today will play a vital role in determining how this crisis is resolved, for good or ill.

Next comes an Awakening, a time of spiritual exploration and rebellion. Then comes an Unraveling, in which individualism triumphs over crumbling institutions. *Boomer Destiny* Tom Osenton, 2009-04-30 The U.S. experiences a major crisis about every eighty years, and the last big crisis started more than eighty years ago. If history is any indicator, argues author Tom Osenton, we are in the very early stages of the next major crisis—one that could make the Great Depression seem like a day at the beach. The storm clouds are on the horizon: A slowing U.S. economy, major banks failing, a weakening dollar, the subprime mortgage debacle, a widening gap between the wealthy and working class, credit delinquencies and bankruptcies on the rise, infrastructure crumbling, healthcare in crisis—the list goes on and on. Baby Boomers, says Osenton, are standing precisely where FDR stood at the beginning of the Great Depression, and they are in a unique position to help pull society out of the morass and set the country on a course of growth and contentment for generations to come. It's no wonder that most young people do not feel they will be better off than their parents. Besides a looming economic crisis, we face a number of other crises: budget deficit, environmental, real estate, infrastructure, education, immigration, and healthcare. Now throw in some unforeseen wild cards such as terrorism, war, disease, poverty, homelessness, and natural disasters, and you have a recipe for a cataclysmic, multi-generational failure that will take decades and trillions of dollars to fix. Boomers are about to move into the role as the elders of an America desperate for leadership. It will be Boomers who take responsibility for directing us through the minefield of crises that will profoundly shape the U.S. for decades to come. It will be the Boomers' responsibility—and their destiny and legacy—to lead the U.S. through a thicket of issues that have been back-burnered by at least the last five presidential administrations. Full of solutions to seemingly intractable problems, *Boomer Destiny* shows how they can do it.

**The Prophets of Doom** Neema Parvini, 2023-07-27 Linear and progressive views of history have dominated the popular imagination for the past seventy years in a worldview wedded to the inexorable rise of globalisation and GDP-growth at any cost. However, the end of the Cold War failed to produce the end of history as hoped, a fact brought home to many by Russia's invasion of Ukraine in 2022. Material wealth and 'Progress' in the name of 'social justice' have not made people happier or more united but quite the opposite. Anxiety, depression, fearfulness, sadness, loneliness and anger have all

massively increased since 1970 with the male suicide rate at an all-time high. Western society seems to be divided against itself across every line conceivable: left versus right, women versus men, "non-whites" versus "whites", globalists versus populists, "the elites" versus "the people", people who think that men can be women and vice versa versus those who insist that they cannot, and so on. Seventy-three percent of Americans believe their country is on "the wrong track", with similar views reflected in Britain and across Europe. The Prophets of Doom explores eleven thinkers who not only dared to contradict the dominant linear and progressive view of history, but also predicted many of the political and social maladies through which we are living.

**Purpose Beyond 2012** Wj Reichertz,2012 Like many Americans, Ricky Vogt was searching for a career and purpose during the fallout from America's 2008 economic implosion. At the same time the nation was searching to resolve energy, environmental, and economic problems within a dysfunctional political system. This story explains how Vogt joined his fellow Americans as they fought amongst themselves in search of a better vision. He questions how community resolves the tension between intolerance and personal liberty; between the selfishness of trickle-down economics and the ideals of spirituality and our founding documents promoting the common good. The book depicts Vogt's evolving search for better solutions and a new way forward.

*The Cycle of War and the Coronavirus* Martin A. Armstrong,2020-12-15 The global economy deteriorated in a matter of months due to governments' mishandling of the coronavirus outbreak. General observers may describe this event as "unforeseen," but they fail to look at the patterns of the past that reveal the future. Cyclical behavior dominates every facet of our world, including warfare, civil unrest, and even pandemics. "The Cycle of War and the Coronavirus" is the most comprehensive review of the war cycle from the beginning of recorded history. The civil unrest prevailing on a worldwide

basis can be traced to events of the past, as it is cyclically on time for a revolution. However, the current pandemic is by no means a natural occurrence—this a deliberate attempt to radicalize the world in the vision of those pulling strings behind the curtain. This book exposes the truth, explaining why the coronavirus outbreak destroyed the global economy, the culprits, and what we can expect in the short-term and long-term volatile future.
