Conspiracy Encyclopedia Thom Burnett, 2006 Conspiracies are everywhere. they are the lifeblood of politics, business and our daily lives. this truly international and all-embracing encyclopedia explains the details of the world's major popular conspiracies, listing them chronologically under subject matter and cross-referencing them continually (because so many conspiracy theories interact on some level). Conspiracies are often international in their sweep and their impact. the brutal stabbing of Julius Caesar (the conspiracy which has defined political assassinations ever since) plunged the Roman Empire into civil war, which then engulfed much of the known western world. More recently the Cambridge spies (Philby, Blunt, MacLean and Burgess) helped Russia throughout WWII and then re-defined the Cold War afterwards, Philby's defection casting a 30-year shadow over CIA/Anglo-American relations. though conspiracies define our everyday lives, there is no body of serious academic research to understand their role, nature or defining characteristics. Most historians prefer to adhere to the cock-up theory of history, in which everything happens by accident or incompetence. Although this view is favoured by academics and historians, it is rejected by a large part of the general public who prefer the evidence of their own lives. However they consume their media, what they see is a mesh of conspiracies that define the texture of their everyday lives, often for the worst. Most people believe that there is a grain of truth in most theories about conspiracies. this book is for them.

*Thornton Dial* Bernard L. Herman,2012-03-01 Thornton Dial (1928-2016), one of the most important artists in the American South, came to prominence in the late 1980s and was celebrated internationally for his large construction pieces and mixed-media paintings. It was only later, in response to a reviewer's negative comment on his artistic ability, that he began to work on paper. And it was not until recently that these drawings have received the acclaim they deserve. This volume, edited by Bernard L. Herman, offers the first sustained critical attention to Dial's works on paper. Concentrating on Dial's early drawings, the contributors examine Dial's use of line and color and his recurrent themes of love, lust, and faith. They also discuss the artist's sense of place and history, relate his drawings to his larger works, and explore how his drawing has evolved since its emergence in the early 1990s. Together, the essays investigate questions of creativity and commentary in the work of African American artists and contextualize Dial's works on paper in the body of American art. The contributors are Cara Zimmerman, Bernard Herman, Glenn Hinson, Juan Logan, and Colin Rhodes.

*Great Events* Salem Press,2002 This updated eight-volume set contains essays that cover the 20th century's most important events. With its articles arranged in chronological order, this new edition covers a wide variety of events from national and world politics, wars, civil disturbances, disasters, crimes, business, scientific and medical discoveries and breakthroughs, and other fields. The set's new articles extend the coverage through September 2001 and include stories such as the massacre of the Nepalese royal family by its own crown prince; and the terrorist attacks of September 11 2001 and their aftermath. The top matter offers a summary description of the event and defines its significance in a brief sentence. Following that description is a list of the what, when, and where, who of the event, providing readers with the data on the first page of the article. The text of each 1000 word article is divided into three subsections, the first and second of which detail the event itself and the background to it, and the last of which, Consequences, identifies both the short-range consequences and the projected long-range impact of the event. The chronological arrangement of the articles not only serves as a timeline but also casts light on the social, political, and economic evolution of the world from a collection of

individual nations to a global community, in which developments in one regions have repercussions in others.
