**Rob Shelsky**

*The Real Atlantis-In the Eye of the Sahara* Martin K. Ettington, There have been many books and movies about whether Atlantis really existed and where it was located. Now we have a new candidate location which meets the criteria established by Plato much better than any of the other candidates. A location which is the exact same size as the fabled city and is located by more than one ancient source. The story of the Eye of the Sahara is truly amazing and once you read it you will become convinced like I am of this logically being the real location of the mythical city of Atlantis. There are even ancient maps which show the location of Atlantis to be in the area of this Eye of the Sahara Lots of history and related information in this study of where Atlantis was really located.

**The Atlantian Chronicles: Fight for Survival** Nick Baeta, 2025-01-03 Bryce Hillcrest was a normal American teenager growing up in the small town of Broadway Hills, Texas. That was until a fight with his school bully at a party lit a fuse that blew up his life. On the run from a group known only as Unity, Bryce must uncover the past, understand and adapt to his new life and survive! Using skills taught to him by his ex-Special Forces father and the mysterious power that got him into this mess, Bryce must fight tooth and nail to survive and protect those he loves and those who cannot protect themselves. Through cunning, wit, determination and luck, Bryce will navigate this world picking up friends, allies and enemies along the way in this young adult fantasy thriller.

The Destruction of Civilization about 10,500 B.C. Martin K. Ettington, There is much of human history which we don't know due to lost records, the oceans covering our ancestor's cities, natural disasters, and reasons we don't know. There are also many anomalies which have been found showing ruins and objects from the far past which should not exist. Some of the Historical Facts this book is based on: Plato said that Atlantis was destroyed 9,000 years before his time in Greece. Plato lived in 433 B.C. which would have meant Atlantis was destroyed 9,433 years B.C. or 11,433 years before the current age. The Younger Dryas Period in History was between roughly 12,900 and 11,600 years ago according to paleontologists and archeologists. Many researchers think this period of climate change resulted from comets hitting the Earth at this time. The Vulture Stone at Gobekli Tepe which some scientists have interpreted as having a record of comets hitting the Earth about 11,000 B.C. My study on ancient history has led me to write a number of books on the topic which can be found on my website at this link: <https://mkettingtonbooks.com/ancient-history.html> The above facts and all of my research has led me to

conclude that there were ancient world spanning civilizations which existed and were destroyed on the Earth in the 9,000 B.C. to 11,000 B.C period. There may have been earlier civilizations too, but the focus of this book is on that time period. The following chapters review some of the evidence of these ancient civilizations which existed at these same very ancient times.

*The Mystery of Water* Johanna Blomqvist, 2024-10-31 FIND OUT THE ANSWERS TO THESE QUESTIONS AND MORE: How can a jellyfish, which is almost entirely water and has neither a heart nor a brain, be a living and consciously responsive being? What kind of water is best for our well-being? Why cold water swimming is so good for us? Can water be influenced by thoughts and emotions? Does water remember? What do we really know about water? Could solving the mystery of water also help us understand ourselves? In an unprecedented way, Johanna Blomqvist dives into the mystery of water in her book, approaching water through science, physics, and the latest research, as well as from an experiential perspective. What follows is not only an interesting journey into the history and essence of water but also a highly personal dive into the various ways water influences us during our lifetimes and even through generations. Water is a simple molecule, yet we do not fully understand it. It has many strange and exceptional properties that have yet to be explained. Even the structure of water has yielded surprising results in recent studies. It appears there might be two types of water. The structure of water can begin to mimic the molecules with which it has been in contact, bringing about their effects. Even emotions seem to have a connection to water. Water increasingly appears as a state of being between the material and immaterial worlds. Water is a mystery that we need to solve to understand ourselves — after all, we are over 70% water. Water symbolizes vitality, renewal, creativity, and change. Water is fundamental and sacred. Water is the beginning and the end — from it we are born, and often it has also been the fate of our civilizations, in the form of a flood or other upheaval. I feel that water is now my teacher, and my task is to discover who I really am and what my deepest essence is. Looking deeply is also a form of surrender. When one dares to surrender and let go, a path unfolds, becoming increasingly clear. *The Mystery of Water* makes you see water in a new way. You will find a new connection to water — to our deepest essence. Water may contain fundamental answers to our life, existence, and also our future.

**Stranger Than Science Stories and Facts** Martin K. Ettington, I first read the book “Stranger Than Science” By Frank Edwards when I was about 10 years old and it was an important turning point in my life. The book has many stories of strange events and it really built my curiosity about the world. Later I went to Engineering School and also had many paranormal experiences from learning meditation and other practices. I have now researched and written over 100 books on strange and mysterious phenomena. My fascination with strange things has become a major passion in my life. This book is kind of an updated version of that famous Frank Edwards book based on my experiences and research of many phenomena. I’m sure you will find the stories in this book fascinating since they are all samples of much of what I experienced, researched, and have written about. It contains over 32 chapters of my favorite stories on various topics to provide a

question mark for your beliefs and assumptions about the world and universe we live in. When you finish this volume maybe you will see my point of view which is that as much as we think we know about this world and the universe, there are still many mysteries and strange things out there.

**Invader Moon** Rob Shelsky, 2016-02-23 A UFO investigator presents a provocative theory about how the moon got here, who brought it here, and why—with fascinating historical evidence! Was the moon always in our skies? UFO investigator Rob Shelsky doesn't think so. In *Invader Moon* he reveals the secret history of a time before the moon, its dramatic arrival, and its momentous impact on Earth's civilizations. Shelsky contends that there were two distinct civilizations on our planet—ours, and one before ours. He goes on to suggest that the earlier civilization did not originate on Earth. When it arrived here, it brought the moon along with it. Offering more than mere conjecture, Shelsky supports his theory with physical and archeological evidence, historical records, and oral histories from around the world.

**Atlantis: the antediluvian world** Ignatius Donnelly, 1889

*Atlantis* Ignatius Donnelly, 1882 At the center of Donnelly's thesis are a set of similarities between widely separated cultures. This he interpreted as evidence that all civilization diffused outward from a central point (a now sunken continent in the mid-Atlantic). He cites mythological, linguistic, ethnographic and other evidence for this theory, which at the time seemed to add up to an airtight case. Donnelly proposes a literal interpretation of Plato's account of Atlantis. He also ties Atlantis into the global flood myth-complex. These, until recently, have been two of the most compelling unsolved puzzles of history. What was Plato writing about when he described the prehistoric civilization of Atlantis, which disappeared overnight in a great catastrophe? Was this an actual historical account, or a philosophical fable? And why do widely separated cultures on every continent, Australia, the Americas, Europe and Asia all have a similar myth of a great flood from which only a few humans survived to restart civilization?

The Clive Cussler Adventures Steven Philip Jones, 2014-05-20 The author of more than 50 books--125 million copies in print--Clive Cussler is the current grandmaster of adventure literature. Dirk Pitt, the sea-loving protagonist of 22 of Cussler's novels, remains among the most popular and influential adventure series heroes of the past half-century. This first critical review of Cussler's work features an overview of Pitt and the supporting characters and other heroes, an examination of Cussler's themes and influences, a review of his most important adventures, such as *Raise the Titanic!* and *Iceberg*, and a look at adaptations of his work in other media. Cussler joins the pantheon of such as Rudyard Kipling, Sir Arthur Conan Doyle and Ian Fleming, and this overdue volume demonstrates that beneath Cussler's immense popularity lies a literary depth that well merits scholarly attention.

**Eye of the Sahara@Plate Tectonics** Anipe Steeven King,2024-10-05 In this compelling exploration, The Eye of the Sahara addresses misconceptions surrounding the Richat Structure's formation. The book proposes that major geological changes in 1405 BC, during Joshua's Long Day, caused Atlantis to submerge due to tectonic plate movements, leading to the creation of this geological wonder. Discover the captivating facts behind the Eye of the Sahara in this thought-provoking work.

**Horror and Science Fiction Films IV** Donald C. Willis,1997-08-07 This fourth title in a unique series that combines reference and analytical qualities in chronicling the horror and science fiction genres, Horror and Science Fiction Films IV brings the earlier three volumes in the series up to date, concentrating on the period from 1984-1994, as well as updating entries from the previous volumes and adding newly-discovered titles from 1900-1983. Entries in the main list include credits, cast, synopsis, and annotation. The introduction lists 1995 releases in the genres and 1996 releases through the summer, cites the more memorable films in the genres for both the current period and 1900-1984, and serves as an index to key titles in the main list, including long-lost titles such as the -obscure silent *Were Tiger* and the 1931 *The Phantom*. Willis includes many films from around the world that are not found in any other English-language film reference work. One appendix provides thumbnail descriptions of problem and peripheral films; another updates entries in the first three books with alternate titles; and a third appendix serves as an index to the approximately 7,000 films listed in the first three volumes in the series as well as in the current volume, thus bringing the total number of films covered in this series to roughly 11,000 titles.
