Sport Coach Education, Development, and Assessment Liam McCarthy, 2024-08-19 Sport Coach Education, Development, and Assessment offers a range of coach assessment ideas and practices from leaders in the coach education and development field. A combination of theory- and practice-focused chapters aims to stimulate thoughts, dialogue, and actions. Sport coaches play an increasingly important role in delivering positive outcomes through sport for individuals, groups, and societies at large. It is understandable, therefore, that attention is increasingly being directed towards how coaches are supported in their roles. Perhaps the most dominant support mechanism is large-scale coach education programmes. These professional development opportunities invite coaches to participate in a learning experience which typically involves exposure to new ideas, opportunities to practice, and an assessment. Much has been said and written about the extent to which these programmes are effective and the degree to which they contribute to coach learning, or not. These discussions typically reference the learning environment, nature of the curriculum, and report coaches' experiences. However, lacking in these discussions is any deliberation over coach assessment, as a consistent feature of nearly all of these programmes, the world over. This book reflects a very deliberate attempt to platform and promote the issue of coach assessment. This book is designed to offer support and guidance to sport coaches who are engaged in assessment, coach educators/developers who are delivering assessment activities, and programme designers/policy architects who are creating learning opportunities for coaches.

Geomagnetic Field Variations in the Past E. Tema, A. Di Chiara, E. Herrero-Bervera, 2020-10-15 In the last decades, palaeomagnetic research has provided important information about the past variation of the Earth's magnetic field (EMF) from its origin to the present day. However, questions regarding the origin and evolution of the EMF as well as the frequency and spatial distribution of its variations still remain open to debate. This Special Publication provides new insights into the study of the temporal and spatial evolution of the EMF presenting new data from palaeomagnetic and rock magnetic studies of archaeological materials, sediments and lavas. The papers presented cover a wide range of topics related to archaeology, stratigraphy and climate, including new data from several parts of the world, such as Europe, Africa, Australia, New Zealand, India and the Baltic Sea. This Special Publication aims to present an overview of the most recent secular variation studies

and their use to disclose fundamental properties of the EMF evolution.

Field Geologists' Manual Donald Alexander Berkman,W. R. Ryall,1976 This manual is intended to provide, in one volume, a broad selection of basic material which may be required by a geologist during the course of his work. It is an attempt, with some personal bias, to abstract those critical parts of a reference library (to which all geologists require reasonable access) which may be of use during short term field projects. Obviously a geologist on a major and long term field investigation should have access to a number of textbooks to supplement the minimal particular enquiry. Specialists may find that their individual area of knowledge has been only briefly covered, but as far as possible classifications which are widely accepted have been used - and these are often the simplest--Preface.
