Pizzorno, 2018-04-26 Did you know that high levels of toxins in the human body can be linked to common conditions such as infertility, obesity, rheumatoid arthritis, heart disease, and diabetes? Expert authors Walter Crinnion and Joseph E. Pizzorno offer practical guidance for assessing both total body load as well as specific toxins. In addition, evidence-based treatment procedures provide recommendations for decreasing toxin exposure and supporting the body's biotransformation and excretion processes. - NEW! Unique! Practical diagnostic and therapeutic guidance designed for clinicians. - NEW! Unique! Coverage of the most common diseases for which toxins are a primary cause. - NEW! Description of how each toxin causes damage provides insights into sources, body load, and interventions for each toxin. - NEW! Unique! Entirely evidence-based content focuses on the most common conditions from which patients suffer. - NEW! Unique! LifeForce Jeffrey S. McCombs, 2001 LifeForce by Chiropractor Jeffrey S. McCombs outlines a simple and effective approach to preventing and overcoming disease, illness, and other health concerns that has been used by many of the author's patients. The LifeForce Plan is a potent tool for detoxifying the body, reestablishing the normal flora of the tissues, and reawakening the body's innate ability to regulate, balance, and protect itself. It teaches us how to activate the endless life-force potential that resides in every cell of our bodies. The seemingly miraculous results are achieved through a time-proven approach to reversing the ravaging effects that antibiotics have had on our bodies. Though antibiotics are useful, it is their worldwide overuse, misuse, and general application that have produced a devastating imbalance. The LifeForce Plan reverses that imbalance and restores the regenerative, life-enhancing cycle of the body, as the dominant cycle over the degenerative, aging cycle. The Plan succeeds where other anti-Candida diets have continuously failed, due to key fundamental insights, and it also provides a way to balance the effects of antibiotics when their judicious use is necessary. This is not intended to be a typical diet book. It offers a way to achieve better biofeedback from the body that will enable you to make dietary choices that will work for you. The Plan is a bridge back to an optimal state of health for our bodies.

Nonprescription Product Therapeutics W. Steven Pray, 2006 When it comes to helping customers make wiser and safer choices in their use of over-the-counter treatments, the pharmacist's best source of information is Nonprescription Product

Therapeutics. This text emphasizes the pharmacist's role in triage--assessing the best nonprescription products for a client and knowing when medical conditions warrant a referral to another health professional. Organized by condition rather than by drug, the text is easy to consult, and complements a disease-based approach to therapeutics. Pharmacists will find useful information on ingredients, interactions, contraindications, and other essentials for helping customers choose appropriate nonprescription products. The Second Edition contains additional charts, drawings, illustrations, and tables. The book includes decision-making algorithms, case studies, patient counseling tips, and warnings on dangerous or life-threatening ingredients, actions, or situations. Another unique feature of this text is A Pharmacist's Journal--real-life reports from the front lines by an award-winning professor and researcher with over twenty years of experience in retail community pharmacy.
