**James E. Tomberlin**

**The Brain in a Vat** Sanford C. Goldberg, 2016-06-13 The scenario of the brain in a vat, first aired thirty-five years ago in Hilary Putnam's classic paper, has been deeply influential in philosophy of mind and language, epistemology, and metaphysics. This collection of new essays examines the scenario and its philosophical ramifications and applications, as well as the challenges which it has faced. The essays review historical applications of the brain-in-a-vat scenario and consider its impact on contemporary debates. They explore a diverse range of philosophical issues, from intentionality, external-world scepticism, and the nature of truth, to the extended mind hypothesis, reference magnetism, and new versions of realism. The volume will be a rich and valuable resource for advanced students in metaphysics, epistemology, and philosophy of mind and language, as well as anyone interested in the relations between language, thought and the world.

Global Anti-realism James O. Young, 1995 This text seeks to provide an answer to the perennial question what is truth? According to the global anti-realist the trust conditions of all classes of sentences are detectable by speakers. The author argues that the only way to be a global anti-realist is to maintain that the truth conditions of all sentences are the conditions under which they cohere with a system of beliefs. Global anti-realism is a form of coherence theory of truth. Realists are committed to some form of correspondence theory. Both camps are opposed to deflationary accounts of truth according to which truth is not a property of sentences.

*A Metalogical Theory of Reference* Roger Vergauwen, 1993 Roger Vergauwen seeks to provide an answer to the question, How does language connect to the world? He begins with the recent developments in formal semantics and from them constructs his own 'theory of reference' with which he considers the nature of the correspondence of the world. The author locates his metalogics between the philosophy of language and epistemology while he covers a range of models from Plato to Wittgenstein. Vergauwen assumes no previous technical or logical study. Contents: Introduction: The Temperature of a Hot

Topic; The Tarski Program: Hijacking the Truth about Reference; Reference and Theory of Reference; Inside Out: Reference and Metalogic; Outline of a Logic with Non-Standard Meanings.

**Thomist Realism and the Linguistic Turn** John P. O'Callaghan, 2003 Philosophers of all sorts will be richly rewarded by reading John O'Callaghan's new book, Thomist Realism and the Linguistic Turn. Based on his broad knowledge of Aristotle and Aquinas, O'Callaghan provides not only an excellent treatment of Aquinas's epistemology but also a superb demonstration of just how Aquinas might contribute to contemporary debates. The camps of realism and idealism fiercely engaged one another in the field of epistemology for a long time. Thomists participated in confronting idealism from their unique realist position. Post-Wittgenstein, the conflict has been dominated by that form of epistemology that grounds all knowledge in linguistic practice. Since Thomists work in a textual and historical mode, their response to the technical approach of analytic philosophy in which most of the linguistic epistemologists write has been slow in coming. That is, until John O'Callaghan. O'Callaghan expertly closes that gap by successfully bringing together these fields. His impressive discussions use careful exegesis and analysis of contemporary philosophical issues, including an outstanding section on the historical origins of mental representationalism and the importan

**The Possibility of Knowledge** Steven Luper, 1987-06 This volume of original essays assesses Nozick's analyses of knowledge and evidence and his approach to skepticism. Several of the contributors claim that Nozick has not succeeded in rebutting the skeptic; some offer fresh accounts of skepticism and its flaws; others criticize Nozick's externalist accounts of knowledge and evidence; still others welcome externalism but attempt to replace Nozick's accounts of knowledge and

evidence with more plausible analyses.
