Lost Cities Maria Teresa Guaitoli,

Lost Cities Maria Teresa Guaitoli, 2002 The cities of antiquity, where civilization took root and developed to create great empires and cultures, are considered by experts to be the sacred places of historical science: these sites and the unstinting work of archaeologists have made it possible to piece together the history of famous civilizations and examine their ancient art, thereby restoring to humanity fragments of our lost treasures and the memory of the remote past. -- Cover, page 4.

Four Lost Cities Annalee Newitz, 2022-01-18 Named a Best Book of the Year by NPR and Science Friday A quest to explore some of the most spectacular ancient cities in human history—and figure out why people abandoned them. In *Four Lost Cities*, acclaimed science journalist Annalee Newitz takes readers on an entertaining and mind-bending adventure into the deep history of urban life. Investigating across the centuries and around the world, Newitz explores the rise and fall of four ancient cities, each the center of a sophisticated civilization: the Neolithic site of Çatalhöyük in Central Turkey, the Roman vacation town of Pompeii on Italy's southern coast, the medieval megacity of Angkor in Cambodia, and the indigenous metropolis Cahokia, which stood beside the Mississippi River where East St. Louis is today. Newitz travels to all four sites and investigates the cutting-edge research in archaeology, revealing the mix of environmental changes and political turmoil that doomed these ancient settlements. Tracing the early development of urban planning, Newitz also introduces us to the often anonymous workers—slaves, women, immigrants, and manual laborers—who built these cities and created monuments that lasted millennia. *Four Lost Cities* is a journey into the forgotten past, but, foreseeing a future in which the majority of people on Earth will be living in cities, it may also reveal something of our own fate.
