Sink the Rainbow! John Dyson,Joseph Fitchett,1986-01-01 Describes the sinking of the Greenpeace ship Rainbow Warrior, and discusses the political repercussions when French government officials admitted responsibility

Legend of the Rainbow Warriors Steven McFadden,Ven. Dhyani Ywahoo,2005-07-13 Legend of the Rainbow Warriors is a journalist's account of one of the core myths of America, and an electrifying exploration of how that myth is playing out in real time. One dominant myth is formed by advertising images of vast, luxurious wealth-the myth of materialism. Another myth is conjured in the bloody, sorrowful images that pervade movies, music and computer games-the myth that the world is hate-filled and chaotic beyond redemption. The Legend of the Rainbow Warriors offers a spiritual alternative of hope and real possibility based upon respect, freedom and responsibility. As drawn from dozens of historical accounts, the Legend of the Rainbow Warriors relates that when the Earth becomes desperately sick, people of all colors and faiths will unite, and rise to face the overwhelming challenges with insight, honesty, caring, sharing, and respect. Veteran writer Steven McFadden weaves the myths and the headlines together seamlessly in a rich work of literary journalism that is adroitly crafted, eye-opening, and soul-inspiring.

New Zealand in World Affairs IV 1990-2005 Roderic Alley,New Zealand Institute of International Affairs,2007 At the beginning of 1990, the Berlin Wall had just fallen, few believed that there was any serious threat to the environment, 9/11 was just any date, the Pacific was seen largely as an idyllic and stable region and Iraq was just another Middle Eastern state. By 2005 Iraq meant two wars ; the 'Cold War' had been replaced by the 'war on terror'; East Timor, Bougainville, Fiji and the Solomons were all synonyms for strife and instability in the region ; and sustainability, global warming and climate change were everyday topics. New Zealand in World Affairs IV surveys the period 1990-2005, provides a record of New Zealand's major international preoccupations, describes how they were officially handled and makes assessments of how effectively the challenges were interpreted and acted upon. This authoritative collection of essays, the fourth in a series commissioned by the New Zealand Institute of International Affairs, completes a survey of New Zealand's foreign relations since World War II.

The Light-Green Society Michael Bess,2003-11-15 The accelerating interpenetration of nature and culture is the hallmark of the new light-green social order that has emerged in postwar France, argues Michael Bess in this penetrating new history.

On one hand, a preoccupation with natural qualities and equilibrium has increasingly infused France's economic and cultural life. On the other, human activities have laid an ever more potent and pervasive touch on the environment, whether through the intrusion of agriculture, industry, and urban growth, or through the much subtler and more well-intentioned efforts of ecological management. The Light-Green Society limns sharply these trends over the last fifty years. The rise of environmentalism in the 1960s stemmed from a fervent desire to save wild nature-nature conceived as a qualitatively distinct domain, wholly separate from human designs and endeavors. And yet, Bess shows, after forty years of environmentalist agitation, much of it remarkably successful in achieving its aims, the old conception of nature as a separate sphere has become largely untenable. In the light-green society, where ecology and technological modernity continually flow together, a new hybrid vision of intermingled nature-culture has increasingly taken its place.

To Save the Earth Jules Archer,2016-04-12 With today's climate change, our environmental problems aren't going away any time soon. To Save the Earth looks at the lives of four extraordinary Americans who fought to save our earth. John Muir, a pioneer of conservationism, was the founder of our national park system. Rachel Carson, biologist and author, educated our country about the effects of pesticides and chemical waste. David McTaggart, the organizer of Greenpeace, introduced nonviolent protest into the struggle, while Dave Foreman, cofounder and former leader of the activist group Earth First!, shook up a movement that had grown complacent. The biographies of each of these figures, as well as personal interviews with David McTaggart and Dave Foreman, help us to understand the environmental movement specific to the United States. With current issues of excessive pollution and climate change, this is an excellent resource for introducing young readers to the cause. Upon first publication, To Save the Earth was chosen as a Junior Library Guild Selection, and now, this fascinating and important book is back in print to teach a whole new generation of readers the importance of environmental conservation and preservation.
