The Pedigree of the Human Race Harris Hawthorne Wilder,1926

Race and Human Diversity Robert L. Anemone,2015-09-04 This book lays out some of the basic problems of a biological theory of race, in particular the arbitrariness of most racial classifications based on biological differences between populations. It provides the biological background to a consideration of the biology of human differences.

What I am Not... I AM Vanita Batra,2023-12-21 Widely accessible are a vast number of spiritual tools and teachings designed to help us cultivate a better understanding of ourselves, our world around us, and our role within it. Many of these teachings were, and continue to be, instrumental to my own journey of understanding. In 2016, that journey expanded to become one that includes Connection—connection to a higher version of self, and seemingly beyond self—to information that has completely decoded and recontextualized my perceptions of reality and human experience. I documented all of it. Having spent many years integrating this information while simultaneously striving to live my life in a way that is worthy of it, I now feel compelled to step out of the “spiritual closet” as one who channels—to share the documentation of my Journey’s transformation, as well as all of the transformational information received. Personal interpretations and perspectives are minimally offered so that each may receive this information in resonance with their own frequency, but much loving guidance is provided. Please be forewarned that Contemplation will be required to discover the multi-faceted and multi layered truths within this information. Other than being an observant, attentive, curious, questioning human, I am wholly without any recognizable accreditations that might qualify me to share any Wisdoms or Truths. Thus I am a living example of the Connection available to every human, merely accessing these abilities a little sooner than most of my collective siblings. With genuine and loving intention, I Trust and release this body of work to help expedite or birth for others, connections to and

beyond self, that they may find their own versions of Wisdom & Truth. Towards living a life in Service, this Sharing with you, dear Seeker. Vanita

Remapping Race in a Global Context Ludovica Lorusso, Rasmus Grønfeldt Winther, 2021-12-30 Investigating the reality and significance of racial categories, *Remapping Race in a Global Context* examines the role of race in human genomics, biomedicine, and struggles for social justice around the world. In this book, biologists, anthropologists, historians, and philosophers inspect critical questions around the biological reality of race and how it has been understood in different national and regional contexts. The essays also examine debates on the usefulness of race in medical and epidemiological studies. With a focus on the fields of human genomics and biomedicine, this book presents critical findings on whether and how race might be ethically and epistemologically justified in our age of personalized medicine, mass surveillance, and biased algorithms. The book will be of interest to researchers and advanced students in a broad range of scientific and humanistic disciplines, including biology, anthropology, geography, philosophy, cultural or community studies, critical race theory, and any field concerned with the deep racial dividing lines running across societies globally.

Sociology of Families David M Newman, Elizabeth Grauerholz, 2002-02-19 *Sociology of Families*, Second Edition, begins at the level of the individual by examining familiar contemporary issues³/₄ topics students are likely to feel strongly about. David Newman and Liz Grauerholz next show students the deeper and more detailed sociological underpinnings of the issues at hand, using the theories and data of social sciences to understand the meaning and broader relevance of these controversies and experiences.
