Administração: Organização, direção e controle da atividade organizacional 4 Elói Martins Senhoras, 2021-07-21 Os estudos organizacionais compõem uma área de destaque no contemporâneo campo científico da Administração em razão da sua importância para explicar, descrever e prescrever como os indivíduos desenvolvem estruturas, processos e práticas organizacionais e como são afetados pelas organizações em suas estruturas de comando, subordinação e controle, razão pela qual a temática organizacional é objeto deste livro. A presente obra, “Administração: Organização, Direção e Controle da Atividade Organizacional 4” tem o objetivo de discutir o estado da arte no campo dos estudos administrativos, por meio da apresentação de uma coletânea diversificada de estudos teóricos e empíricos, os quais refletem uma riqueza de temáticas estratégicas, bem como a própria realidade organizacional no Brasil e no mundo. A organização desta obra se materializou em 17 capítulos, os quais foram escritos por meio de uma linguagem fácil e amplamente acessível a um público leigo ou especializado. Ao buscar uma via didática para apresentar as explicações, descrições e debates para um amplo público, a obra manteve a preocupação científica de se estruturar fundamentada em um rigor teórico-metodológico. A proposta implícita neste livro tem no paradigma eclético o fundamento para a valorização da pluralidade teórica e metodológica, sendo este livro construído por meio de um trabalho coletivo de pesquisadoras e pesquisadores oriundos de diferentes estados brasileiros, o que repercutiu em uma rica oportunidade para o compartilhamento de experiências no campo epistemológico da Administração. A natureza exploratória, descritiva e explicativa quanto aos fins e a abordagem quali-quantitativa caracterizam o perfilamento metodológico desta obra, sendo o método teórico-dedutivo o fundamento para a utilização, tanto, de revisões bibliográficas e estudos de caso como procedimentos de levantamento de dados, quanto, de hermenêutica administrativa na análise de dados. Estruturados em 2 macroeixos temáticos que combinam teoria e prática administrativa, os 17 capítulos do presente livro apresentam discussões relacionadas, tanto, a tendências, instrumentos e ferramentas administrativas, quanto, a estudos de casos diversos, incluindo focos sobre gestão das cadeias de suprimentos e compras, bem como responsabilidade social e ambiental. Conclui-se com base nos debates teóricos e estudos de caso apresentados ao longo dos capítulos deste livro que os estudos organizacionais possuem uma abertura plural e absorvente de temas e discussões nas relações de comando, subordinação e controle, possibilitando aos leitores uma instigante imersão que vai desde modelos e marcos teórico-conceituais até à apreensão empírica de especificidades e complexidades organizacionais no

mundo real.

The New Domestic Automakers in the United States and Canada A.J. Jacobs, 2015-12-16 Over the past forty years, state/provincial and local governments in the United States and Canada have provided foreign automakers with approximately \$4.80 billion in incentives in order to lure light vehicles assembly plants to their areas. This has included tax abatements, infrastructure construction, land giveaways, job training programs, and other subsidies. As of early 2015, ten foreign vehicle makers operated 20 light vehicles in developed North America. Despite the fact that all ten of these automakers have pursued a similar pattern—first exporting vehicles into the United States and Canada before launching vehicle plants in developed North America—each has followed its own specific historical development path and has created its own unique growth trajectory. This book provides a unique historical and qualitative review of these ten vehicle makers, from their early beginnings to their export entry into the United States and/or Canada through early 2015. In addition, it chronicles the histories of more than a dozen former automakers and potential future foreign light motor vehicle assembly plants in the United States and Canada. This includes the first foreign automaker to build its cars in the United States, De Dion-Bouton of France in July 1900, the early 20th Century endeavors of Fiat, Mercedes, and Rolls Royce, and the present day hopes of Chinese and Indian automakers. In the process, the text also provides an assessment of the top competing states and sites for any future plants, the possible incentives packages governments may offer to attract such facilities, and an estimated incentive value for each automaker. Overall, the goal of this book is to expand the knowledge of policymakers at all tiers of government in the United States and Canada and to help them take a more holistic look at the pros and cons of attracting Automobile Manufacturing FDI. It is hoped that this will enable them to make more informed decisions when pursuing a new foreign motor vehicle assembly plant. Its findings should also prove informative to urban and regional planning, political science, sociology, economics, labor, and international development scholars and students in North America and worldwide.

Marketing Luxury Services Miguel Angelo Hemzo, 2023-04-26 This textbook discusses luxury marketing management, considering the broader range of decisions related to the complexities of offering luxury as services. Placing a strong emphasis on strategy as well as positioning and the market, it focuses on the challenges in luxury related to the traditional 4 Ps (Products, Place, Promotion and Price), in addition applying the service-dominant logic to luxury management in relation to the other 4 Ps in marketing decisions (People, Process, Panorama, and Productivity). The text opens with an exploration the history and evolution of the concept and definition of luxury and the effect upon the practice of luxury marketing today, concluding with an overview of the contemporary luxury market, description of the main players, and relevant industry trends. It then discusses marketing strategies as applied to the luxury market, including market identification, brand communication, product positioning, pricing, flow of goods, foreign market entry, and more. With contributions from luxury

marketing practitioners to offer practical knowledge as well as real world cases studies, this textbook will equip students with a comprehensive understanding of marketing in the luxury industry and the tools necessary to be successful in the management of luxury brands.

Asian Trade and Investment in Europe Prana Krishna Biswas, Robert Dygas, 2022-04-28 This book provides deep insight into the flow of foreign direct investment from Asia to Europe. It assesses the topic of trade and investment from the reverse direction, considering Asian countries as the capital investors in the EU countries. Each chapter analyses either the international trade or investment of one or more Asian countries in correlation with one or more European states. The book analyses a significant number of countries, which are included in various economic associations, such as the Visegrad Group, the Three Seas Initiative, the European Free Trade Association, or are states from the same geopolitical region – for instance, the Iberian Peninsula, Baltic States, and Nordic countries. It examines Indian outward foreign direct investment trends in the UK before and after Brexit, based on select case studies, to emphasize the impact of Brexit, as well as to encourage trade and investment among Asian and European countries before and during COVID-19, to highlight the influence of the pandemic on the target country's economy. The authors use a variety of analytical methods in the book, such as numerical presentations, econometric analysis, descriptive statistical analysis, an examination of time-series dynamics, the modelling of functions, and semi-structured interviews with company executives. The regional perspectives bring new and useful insights to the topic, and the case study approach allows for a wider exploration of the research questions as well as their theoretical evolution. The book provides a big picture for economists, researchers, business analysts, and PhD students of economics, international trade, and business.

EU Sustainability Legislation and International Supply Chains Adolf Peter, 2025-10-17 This book provides an in-depth analysis of the Corporate Sustainability Due Diligence Directive (CSDDD) – including the European Commission's Omnibus Directive Proposal – focusing on civil liability, enforcement issues, climate-related transition plans and directors' liabilities. It also discusses other Environmental, Social and Governance (ESG)/ sustainability-related legislation and stock exchange rules in the EU, the United States and China. Using case studies involving multinationals such as BYD, Shell, RWE, Borealis, BMW, VW and L'Oréal, the book demonstrates the increasing negative impact of ESG-related issues on a company's reputation and finances. Showing that international commercial arbitration is the ideal means for the resolution of ESG/climate/CSDDD-related disputes between multiple parties, the book compares the arbitration rules of 11 leading arbitration institutions in terms of consolidations and joinders. It proposes an incentive mechanism for the contractual cascading of climate-related targets and ESG-related arbitration rules. It also features more than 20 contractual template clauses aimed at (i)

implementing the CSDDD throughout international supply chains, (ii) reducing product/service-related GHG emissions (including Scope 3 emissions) year on year to achieve net-zero across entire value chains and (iii) facilitating consolidations and joinders in ESG-related multi-party arbitrations. The book is directed at legal practitioners, legislators of various jurisdictions, board members of companies, academics, researchers and students.

Trust and Brand Management Hanna Górska-Warsewicz,2024-12-23 Trust and Brand Management covers the main topics of heritage-based corporate brand management and its relationship to external factors and performance. The benefits for readers of this book lie in several aspects: knowledge of corporate brand management, brand heritage and related concepts, theoretical and practical foundations of brand management and brand heritage, and empirically supported research on the relationship among brand heritage, brand management practices, antecedents, and outcomes of heritage-based corporate brand management. This book consists of two parts. The first part provides a literature review and theoretical and practical background on brand heritage, its antecedents and outcomes, brand management approaches, and heritage-based corporate brand management. The second part presents the results of an empirical study as structural equation modeling to establish the relationship among brand heritage, corporate brand management practices, antecedents (brand history, culture, identity, and authenticity), and outcomes of heritage-based corporate brand management (brand trust, brand equity, and performance). In addition, the book includes 31 case studies of well-known heritage brands presenting their history, marketing communications, development, and positioning strategies. The benefit for managers is the presentation of terms and specific tools related to corporate brand management in the market and customer outcomes.
