

Water Temple Tadao Ando

Geert Bekaert, Ronny de Meyer

Tadao Ando Tadao Andō, 2003-01-01 Ando selected for inclusion the thirty-five projects that best embody his belief that the interplay with nature defines architecture and the passage of time molds architecture. All are shown in spectacular, specially commissioned color photography. Among the major recent works are the Modern Art Museum of Fort Worth in Texas; the Komyo-ji Temple in Saijo, Japan; the meditation space for UNESCO in Paris; the Pulitzer Foundation for the Arts in St. Louis; and the Armani/Teatro in Milan. Also included are some of Ando's most important and well-known earlier works, including the Church of the Water in Hokkaido, the Church of the Light in Ibaraki, and a series of houses throughout Japan.--BOOK JACKET.

Makers of 20th-Century Modern Architecture Donald Leslie Johnson, Donald Langmead, 2013-05-13 Makers of 20th-Century Modern Architecture is an indispensable reference book for the scholar, student, architect or layman interested in the architects who initiated, developed, or advanced modern architecture. The book is amply illustrated and features the most prominent and influential people in 20th-century modernist architecture including Wright, Eisenman, Mies van der Rohe and Kahn. It describes the milieu in which they practiced their art and directs readers to information on the life and creative activities of these founding architects and their disciples. The profiles of individual architects include critical analysis of their major buildings and projects. Each profile is completed by a comprehensive bibliography.

Building with Water Zoë Ryan, 2012-11-05 Water has been an important topic in architecture and urban planning for years. The revitalization of the waterfront has been a prevalent trend in cities around the world. On the other hand, architecture also had to respond to the threat of floods. The theme of Building with Water is the use of water in architecture. It presents buildings that explicitly refer to water in their design and form. It establishes a typology of building by the water: residential structures, recreation facilities, industry and infrastructure, buildings for culture and art. The various design parameters are explored in four essays. Subsequently, twenty-two international projects are presented, organized according to their locations by a river, a lake or the sea. The authors' concern is not to show luxurious buildings in privileged locations but rather presenting projects that seriously grapple with the main criterion of the location—namely, water—in an ecologically sustainable way and respond to it with their design. Wasser ist seit Jahren ein wichtiges Thema in Architektur und Städtebau. «Building with Water» thematisiert die Verarbeitung von Wasser im architektonischen Entwurf; es werden

Bauten vorgestellt, die sich in ihrer Gestaltung und Form ausdrücklich auf Wasser beziehen. Eine Typologie des Bauens am Wasser wird erstellt: Wohnbauten, Verkehrs- und Industriebauten, Bauten für Kultur und Freizeit. Ebenso werden einleitend klassische Beispiele des Bauens am/im/auf dem Wasser gezeigt, wie etwa Château de Chenonceaux an der Loire, Falling Water in Pennsylvania von Frank Lloyd Wright oder das Salk Institute in La Jolla, Kalifornien, von Louis I. Kahn. Geordnet nach ihren Standorten am Fluss, See oder Meer, werden dann etwa 20 internationale Projekte vorgestellt. Es geht den Autoren nicht darum, luxuriöse Bauten an privilegierten Plätzen zu zeigen, sondern Projekte darzustellen, deren Entwurf sich ernsthaft und ökologisch verträglich mit dem Hauptkriterium des Standortes – nämlich Wasser – auseinandersetzt und sich gestalterisch darauf bezieht

Architects Today Kester Rattenbury, Robert Bevan, Kieran Long, 2006-08-10 This volume offers both an introduction to and an insight into key contemporary architects as well as giving a snapshot of the varied nature of architecture today. For each architect there are details of their life and work and illustrations of their most representative and iconic buildings.

Shinkenchiku, 1994

Key Modern Architects Andrew Higgott, 2018-05-31 Key Modern Architects provides an accessible and thought-provoking introduction to the work of the most significant architects of the modern era. Fifty short chapters introduce fifty key architects, from Le Corbusier to Aldo Van Eyck to Zaha Hadid, exploring their most influential buildings and developing a critique of each architect's work within a broader cultural and historical context. The selection represents the most influential architects working from 1890 to the present, those most likely to be taught on survey courses in modern architectural history, along with some lesser-known names with an equal claim to influence. Emphasis is placed on a critical and interpretative approach, allowing the student to position each architect in a cultural and intellectual context quickly and easily. Artistic, technical, social, and intellectual developments are brought to the fore – built and unbuilt projects, writings and influences. This approach brings to light the ideology behind architectural work, offering insights into each architect's working practice. - Helps students to develop a critical approach to understanding modern architectural history. - One chapter per architect – meaning chapters may be read individually as a concise resource for the study of an architect, or together as a coherent book-length history of the whole period of modern architecture. - Chapters are supported by boxed lists of each architect's most significant projects, along with suggestions for further reading as a springboard to further study and research. Combining the clarity and accessibility of a textbook with in-depth reading and a critical approach, Key Modern Architects provides an invaluable resource for both the classroom and for independent study in architectural and art

history.

Avery Index to Architectural Periodicals Avery Library, 1995

Context, 2005 Contributed articles on diverse topics of people, place, and architecture in the Indian context.

Arquitectura Y Espiritu Tadao Andō, 1998 Ando speaks of the spirituality of the materials he uses and explains that although spirituality is a nonvisible form of space, it is manifested in much if not all of his work. From secluded housing to modern temples, from museums to places of worship, his creations are built to enhance mediation, in life or in art. This guiding spirit in his architecture is presented in detail in this volume.

Persimmon, 2000

Arata Isozaki Arata Isozaki, 1993

Modernism and Modernisation Helen Castle, 1999-04-06 'Modernization' has become the soundbite of the 1990s. What is the role of architecture within this quest for the modern? The modernism of the 1990s is very different from its precursors earlier this century. Where the pre-war Modern Movement saw itself as an instrument of social change, today's modernism is most visible in shops and restaurants; where the International Style tended towards standardization and uniformity, architects today aim for flexibility and individuality. In examining these and other contemporary issues, *Modernism and Modernization in Architecture* looks towards a new definition of modernism for our times.

Encyclopedia of Twentieth Century Architecture R. Stephen Sennott, 2004 A balance of sophistication and clarity in the writing, authoritative entries, and strong cross-referencing that links architects and structures to entries on the history and theory of the profession make this an especially useful source on a century of the world's most notable architecture. The contents feature major architects, firms, and professional issues; buildings, styles, and sites; the architecture of cities and countries; critics and historians; construction, materials, and planning topics; schools, movements, and stylistic and theoretical terms. Entries include well-selected bibliographies and illustrations.--Reference that rocks, American Libraries, May 2005.

Where are we at?, 1992

Journal, 1993

Contemporary Japanese Architects Dirk Meyhöfer, 1994 In both diversity and quality, the architecture of present-day Japan can be classed as foremost in the world. This has not always been the case. Due to favorable economic circumstances and the coexistence of two generations of architects, it achieved a breakthrough on the international scene during the Eighties. This pluralistic architectural landscape, influenced by both tradition and a process of constant renewal, has a great many surprises in store for the Western eye. --
