Ordinary People, Extraordinary Experiences Nelson Abreu, PE, Torben Riise, PhD, 2018-10-23 Ordinary People, Extraordinary Experiences is an exploration of psi phenomena through real accounts and testimonies of everyday people. This book includes a collection of real-life stories of people who have had transformative experiences, like telepathy and out-of-body experiences. They suggest that such experiences happen spontaneously to people of all walks of life. Some also demonstrate that some of these extraordinary phenomena can be facilitated by training or optimal conditions. It becomes evident that such abilities could have a significant impact on our personal and collective spiritual development. Utilizing a more objective perspective, this collection of extraordinary narratives provides guideposts and opens important doors in the ever-expanding study of consciousness.

Engineering Education Firoz Alam, Alexandra Kootsookos, 2020-12-17 This book details the key concepts, objectives and processes relating to the professional accreditation of engineering bachelor (honours) degrees. The contemporary context of accreditation is examined in terms of the globalised nature of both the engineering profession and higher education. Examples of the processes relating to single and dual accreditation are provided, with examination of the Washington Accord and the requirements of the European Network for Accreditation of Engineering Education. Details are also provided as to how learning outcomes can be structured to demonstrate compliance with accreditation criteria. The final chapters deal briefly with quality assurance processes used in education and the current international quality ranking systems which exist. This book will provide the reader with a detailed examination of outcome based education within the context of Bachelor of Engineering (honours) degrees. A key feature of this book is the side-by-side comparison of different accreditation criteria and a thorough discussion of the relatively new phenomenon of dual accreditation. The book seeks to provide a very clear explanation and exploration of accreditation within the context of engineering education and will benefit those practitioners involved in the accreditation process.

It will also be of considerable use to more experienced teachers to review and assess their own practice and gain a new perspective on how best to facilitate their students' or trainees' learning. About the authors Ronald M Harden is General Secretary for the Association of Medical Education in Europe, Editor of Medical Teacher, former Professor of Medical Education, Director of the Centre for Medical Education and Teaching Dean at the University of Dundee, UK and Professor of Medical Education at Al-Imam University, Riyadh, Saudi Arabia. The text provides hints drawn from practical experience to help teachers create powerful learning opportunities for their students, providing readable guidelines and introducing new techniques that potentially could be adopted for use in any teaching programme. Throughout the book introduces some key basic principles that underpin the practical advice that is given and which will help to inform teaching practice. This book will assist readers to reflect on and analyse with colleagues the different ways that their work as a teacher or trainer can be approached and how their student or trainee's learning can be made more effective.

Death and Consciousness David H. Lund, 2016-05-06 Does bodily death mean the complete destruction of a person? The first part of this scholarly book defends the view that the nature of man and the world he encounters implies survival of death as a conceptual possibility. The second part considers the empirical evidence for concluding that at least some persons have survived death. A new kind of understanding, among readers, might result from following the concepts logically developed in this work, using real life terminology and experience.
