Bad Language: Decoding Donald Trump Andy Curtis, 2024-09-13 You've heard the speeches. Now see how they work—that is, how language can be used to convey information—or misinformation—to persuade, to rouse, to obfuscate. Linguist and researcher Dr. Andy Curtis deconstructs five major speeches by Donald Trump and examines them move by move, line by line, and explains how they function. Thoroughly researched (citing well over 200 sources) and engagingly written, this book pulls back the curtain to show you how this kind of speechifying works. Words matter, whether you're speaking them or hearing them. As a global citizen, you owe it to yourself to understand the deeper meaning of the messages targeted at you. With a better understanding of how language works, you'll be better equipped to make sense of what you hear, and to distinguish fact from fiction.

Place-Based Evaluation for Integrated Land-Use Management Johan Woltjer, Ernest Alexander, Matthias Ruth, 2016-03-03 In recent years, there has been an increasing emphasis placed on local and regional integration in major planning projects and infrastructure development including roads, rail and waterways. This emphasis is not only on integrating various projects, but also integrating them with related issues such as housing, industry, environment and water. In other words, land-use planning and infrastructure management have become more spatially-oriented. This book brings together experts in the fields of spatial planning, land-use and infrastructure management to explore the emerging agenda of spatially-oriented integrated evaluation. It weaves together the latest theories, case studies, methods, policy and practice to examine and assess the values, impacts, benefits and the overall success in integrated land-use management. In doing so, the book clarifies the nature and roles of evaluation and puts forward guidance for future policy and practice.

Place Based Approaches to Sustainability Volume I Mara Del Baldo, Maria-Gabriella Baldarelli, Elisabetta Righini, 2024-02-22 Without respecting and nurturing 'place' we cannot achieve a state of ecological sustainability. Place-based organizations are not run on a purely materialistic basis. The non-materialistic features of a place, its aesthetics, cultural heritage, community feelings, transcendence, should be integrated into sustainability management. This far-reaching two-volume work breaks with the economic logic of efficiency and profit maximization, and suggests that organizations should inform their sustainability by encompassing feelings of identity with and attachment to place. According to this vision, the editors have compiled scholarly contributions aimed to support the ecological transformation of humankind by exploring

both theoretical and practical models that integrate the sense of the place, ethics and spirituality in new ways of organizing of economic and social life. This first volume sets the theoretical direction of the volumes, asking broad aesthetic questions around the ethical and spiritual foundations of sustainability. It will be of interest to scholars, practitioners and students of sustainability, business ethics and spirituality.

Leonard Bernstein Paul Laird,2013-10-11 Beginning with an introductory essay on his achievements, it continues with annotations on Bernstein's voluminous writings, performances, educational work, and major secondary sources.

A Place More Void Paul Kingsbury,Anna J. Secor,2021-02 A Place More Void takes its name from a scene in William Shakespeare's The Tragedy of Julius Caesar, wherein an elderly soothsayer has a final chance to warn Caesar about the Ides of March. Worried that he won't be able to deliver his message because of the crowded alleyways, the soothsayer devises a plan to find and intercept Caesar in "a place more void." It is precisely such an elusive place that this volume makes space for by theorizing and empirically exploring the many yet widely neglected ways in which the void permeates geographical thinking. This collection presents geography's most in-depth and sustained engagements with the void to date, demonstrating the extent to which related themes such as gaps, cracks, lacks, and emptiness perforate geography's fundamental concepts, practices, and passions. Arranged in four parts around the themes of Holes, Absences, Edges, and Voids, the contributions demonstrate the fecundity of the void for thinking across a wide range of phenomena: from archives to alien abductions, caves to cryptids, and vortexes to vanishing points. A Place More Void gathers established and emerging scholars who engage a wide range of geographical issues and who express themselves not only through archival, literary, and socio-scientific investigations, but also through social and spatial theory, political manifesto, poetry, and performance art.

A Quiet Place John Krasinski,2021-06-01 The vision behind the creation of the new horror classic A Quiet Place and its sequel, A Quiet Place Part II, as told by the film's co-writer, director, and star John Krasinski. John Krasinski reveals the making of the shocking, near-silent film A Quiet Place, with dramatic behind-the-scenes photographs and running commentary about the journey to the silver screen. A Quiet Place portrays the struggle of the Abbott family to survive as the parents (Krasinski and Emily Blunt) raise their children in utter silence so as to not attract the alien evil that lurks in the surrounding forest. Released by Paramount Pictures, the film became a major box-office success and received critical acclaim for its atmosphere, direction, acting, and sound design. Also included are never-before-seen photographs and Krasinski's director's take on the much-anticipated sequel, A Quiet Place Part II, to be released May 2021. With a foreword by co-star Emily Blunt and contributions from co-stars and production teams, this volume will be a valuable, insightful companion to both films for fans and film buffs.
