Johann Heinrich C. Willibald Beyschlag

The Secret Lives of Color Kassia St. Clair, 2017-10-24 One of USA Today's "100 Books to Read While Stuck at Home During the Coronavirus Crisis" A dazzling gift, the unforgettable, unknown history of colors and the vivid stories behind them in a beautiful multi-colored volume. "Beautifully written . . . Full of anecdotes and fascinating research, this elegant compendium has all the answers." —NPR, Best Books of 2017 *The Secret Lives of Color* tells the unusual stories of seventy-five fascinating shades, dyes, and hues. From blonde to ginger, the brown that changed the way battles were fought to the white that protected against the plague, Picasso's blue period to the charcoal on the cave walls at Lascaux, acid yellow to kelly green, and from scarlet women to imperial purple, these surprising stories run like a bright thread throughout history. In this book, Kassia St. Clair has turned her lifelong obsession with colors and where they come from (whether Van Gogh's chrome yellow sunflowers or punk's fluorescent pink) into a unique study of human civilization. Across fashion and politics, art and war, the secret lives of color tell the vivid story of our culture. "This passionate and majestic compendium will leave you bathed in the gorgeous optics of light." —Elle

Impressions of The Mind and The Heart Priyanshu Shekhar, Literature is the mirror of society that reflects the true picture and says it all, the reflection of what and how the society and its people live and interact with each other.* - Priyanshu Shekhar A book isn't just a book or a collection of pages bound together with a cover on top, nor it is a book containing words and phrases. The words, phrases, and sentences are the expression of the inner consciousness of the author expressed through the soul of the pen. This book is in itself a reflection of the inner voice of the author in the expression of the magic of words in the form of poetry, acting as a mirror of society through the emancipated soul of the pen.

The Pigmentary System James J. Nordlund, Raymond E. Boissy, Vincent J. Hearing, Richard A. King, William S. Oetting, Jean-Paul Ortonne, 2008-04-15 The most comprehensive and integrated book on pigmentation *The Pigmentary System*, Second Edition, gathers into one convenient, all-inclusive volume a wealth of information about the science of pigmentation and all the common and rare clinical disorders that affect skin color. The two parts, physiology (science) and pathophysiology (clinical disorders), are complementary and annotated so that those reading one part can easily refer to relevant sections in the other. For the clinician interested in common or rare pigment disorders or the principles of teaching about such disorders, this book provides an immediate and complete resource on the biologic bases for these disorders. For the scientist studying the biology of melanocyte function, the book provides a list of disorders that are related to basic biological functions of melanocytes. New features of this Second Edition include: Completely new section on the basic science of pigmentation - explaining the integration of melanocyte functions with other epidermal cells and with various organ systems like the immune system New chapters on pigmentary disorders related to intestinal diseases, the malignant melanocyte, benign proliferations of melanocytes (nevi) and phototherapy with narrow band UV All clinical chapters include the latest genetic findings and advances in therapy More than 400 color images of virtually all clinical disorders The book is ideal for all dermatologists and especially those interested in disorders of pigmentation. It is of particular use for pediatric dermatologists and medical geneticists caring for patients with congenital and genetic pigmentary disorders. This

authoritative volume will fill the gap for dermatology training programs that do not have local experts on pigmentation. Basic and cosmetic scientists studying pigmentation and melanocytes will find the science and clinical correlations very useful in showing human significance and relevance to the results of their studies.
