Bronze Age Settlement and Land-Use in Thy, Northwest Denmark (Volume 1 & 2) Jens-Henrik Bech, Kristian Kristiansen, Berit Valentin Eriksen, 2018-06-04 This two volume monograph about the region of Thy in the early Bronze Age provides a high resolution archaeological and ecological model of the organisation of landscape, settlements and households during the period 1500-1100 BC. Bordering the North Sea to the west, and the calmer waters of the Limfjord to the east, the region of Thy in Denmark experienced four centuries of intense economic and demographic expansion. By combining results from environmental and economic research (pollen and palaeo-botanical analyses) with intensive field surveys and excavations of farmsteads with exceptional preservation, it has been possible to open a window to the changes that transformed Bronze Age society and its environment during a few centuries of exceptional expansion and wealth consumption. The results from this interdisciplinary venture made it possible to link together the histories of local farmsteads with the wider regional and global history of the Bronze Age in North-western Europe during this period. Here is much to feed on for students and researchers of the Bronze Age alike.

Data-Driven Innovation in the Creative Industries Melissa Terras, Vikki Jones, Nicola Osborne, Chris Speed, 2024-04-17 The creative industries – the place where art, business, and technology meet in economic activity – have been hugely affected by the relatively recent digitalisation (and often monetisation) of work, home, relationships, and leisure. Such trends were

accelerated by the global COVID-19 pandemic. This edited collection examines how the creative industries can be supported to make best use of opportunities in digital technology and data-driven innovation. Since digital markets and platforms are now essential for revenue generation and audience engagement, there is a vital need for improved data and digital skills in the creative and cultural sectors. Taking a necessarily global perspective, this book explores the challenges and opportunities of data-driven approaches to creativity in different contexts across the arts, cultural, and heritage sectors. Chapters reach beyond the platforms and approaches provided by the technology sector to delve into the collaborative work that supports innovation around the interdisciplinary and cross-sectoral issues that emerge where data infrastructures and approaches meet creativity. A novel intervention that uniquely centres the role of data in the theory and practice of creative industries' innovation, this book is valuable reading for those researching and studying the creative economy as well for those who drive investment for the creative industries in a digitalised society. The Open Access version of this book, available at www.taylorfrancis.com, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 International license.

Inflation Targeting and Central Banks Joanna Niedźwiedzińska, 2021-07-28 Over the last three decades, inflation targeting (IT) has become the most popular monetary policy framework among larger economies. At the same time, its constituting features leave room for different interpretations, translating into various central banks' institutional set-ups. Against this backdrop, this book investigates the importance of institutional arrangements for policy outcomes. In particular, the book answers the question of whether there are significant differences in IT central banks' institutional set-ups, and—if yes—whether they influence the ability of monetary authorities to meet their policy goals. The book examines around 70 aspects related to independence, accountability and transparency of 42 IT central banks over the last 30 years. Based on the analysis, it can be concluded that the quality of the institutional set-ups materially affects monetary policy effectiveness. In fact, a visible improvement of institutional arrangements resulting from pursuing an inflation targeting strategy can be treated as its lasting contribution to central banking. Thus, despite the recent critique of the framework, its prospects continue to be rather favourable. Overall, for the advocates of inflation targeting, the findings of the book can be seen as identifying the sources of IT strengths, while for IT opponents, they may be viewed as indicating which elements of IT institutional set-ups should be kept even if the need to replace this strategy with another regime will, indeed, result in a change. Given the role monetary policy plays within the economy, such knowledge may have significant implications. Therefore, the book will be relevant for different audiences, including scholars and researchers of monetary economics and monetary policy, and will be essential reading for central banks already pursuing an IT strategy or those preparing to adopt one. Importantly, the book includes supplementary indices of proposed institutional arrangements that assess a range of aspects related to IT central bank's independence, accountability, and transparency. Readers thus have access to the

author's full database, which covers individual indices for all monetary authorities investigated across the given period of analysis.

IEEE/PES Transmission and Distribution Conference and Exhibition 2002: Asia Pacific ,2002

Making Money Work Asian Development Bank,2015 The new sustainable development agenda is expected to touch every country, person, and activity. Therefore, shouldn't every dollar count toward achieving it? Asia and the Pacific, home to more than half of humanity, has the money to improve the lives of all its people, and protect the planet in fair and durable ways. However, funds are in many hands, invested elsewhere, or used for various purposes. It is time to move beyond this fragmentation and align finance behind sustainable development, recognizing that while capital will be key, so will the capacity to apply and attract it effectively. This report explores some of the ways forward. It highlights not just the need to inject more money into investments that contribute to sustainable development, but also the need to attract funds toward them- to finance human needs, infrastructure, and cross-border public goods. The report spans public and private options, in their distinct roles and in combination. An eight-point agenda suggests how key constituents can do their parts. Working together, they can make money work for development where benefits are not only more equitably shared, but will last for generations to come.

The New Grand Strategy Mark Mykleby,Patrick Doherty,Joel Makower,2016-06-14 The New Grand Strategy tells the story of a plan, born within the Pentagon, to recapture America's greatness at home and abroad by elevating sustainability as our new strategic imperative. It aligns our enduring national interests of prosperity and security with a new framework that addresses pressing economic, social, and environmental issues at home, tapping into a trillion-dollar market demand for walkable communities, regenerative agriculture and resource productivity. It is an inspiring vision of what's possible when Americans hold a collective view of the future and come together to bring it to reality. This is no idealistic pipe dream or wonky policy prescription. The story that unfolds in this book weaves together hard-nosed economic analysis, a clear-eyed study of demographic and societal shifts, the realities of climate change and resource scarcity, a risk-based assessment of America's challenges and opportunities, and on-the-ground reporting of how much this is already unfolding throughout the country. By rediscovering the power and discipline of grand strategy—and taking responsibility for our future—America can reimagine the American dream and once again take on “the cause of all mankind.” Released during one of America's most divisive presidential election campaigns, The New Grand Strategy avoids the partisan rhetoric dividing our nation today. Instead of placing blame, it offers a clear, pragmatic plan that can unite Americans and launch a new era of prosperity and

security.
