The Poles Marc E. Heine, 1976 Few countries suffered so extensively as Poland during World War II. Twenty percent of its population was killed and most of its cities and industrial installations were left in ruins. The Stalinism of the early post-war years produced a considerable internal upheaval, but subsequently the more liberal policies of Wladyslaw Gomulka and Edward Gierek have resulted in a uniquely Polish adaptation to the political realities of modern Europe and the world. Journalist Heine begins with a concise historical introduction to Poland's development, covering the people, their language, religion, government, industry, agriculture, trade, transport, housing, education, welfare services, culture, leisure activities, food and drink--From publisher description.

**The World Beyond the Windshield** Christof Mauch, Thomas Zeller, 2008 For better or worse, the view through a car's windshield has redefined how we see the world around us. In some cases, such as the American parkway, the view the road was the be-all and end-all of the highway; in others, such as the Italian autostrada, the view of a fast, efficient transportation machine celebrating either Fascism or its absence was the goal. These varied environments are neither necessary nor accidental but the outcomes of historical negotiations, and whether we abhor them or take delight in them, they have become part of the fabric of human existence.
