*The American Aviation Experience* Tim Brady, 2000 This book is designed to be a primary text for courses in aviation history and development and aviation in America. The seventeen chapters in *The American Aviation Experience: A History* range chronologically from ancient times through the Wright brothers through both world wars, culminating with the development of the U.S. space program. Contributors also cover balloons and dirigibles, African American pioneers in aviation, and women in aviation. These essayists--leading scholars in the field--present the history of aviation mainly from an American perspective. *The American Aviation Experience* includes 335 black-and-white photographs, two maps, and an appendix, Leonardo da Vinci and the Science of Flight..

Downed Allied Airmen and Evasion of Capture Herman Bodson, 2005-09-27 This volume deals specifically with escape and evasion in the Netherlands, Belgium and France, an operation in which the author himself was directly involved, and discusses the role which these lines of escape played in the lives of airmen who were forced to bail out over enemy territory. He describes the ever-present risks the often nameless patriots faced, such as the danger of exposure and the threat of traitorous infiltration. Specific lines are traced geographically and their main participants discussed. Special emphasis is placed on the role of women in this resistance operation. Throughout the book, the reader benefits not only from the author's own personal recollections but also from his later on-location research. The final chapter concludes with statistical information directly related to this little known aspect of World War II. Appendices include lists of the airmen helped by the resistance movement.
