Creating Competitiveness David B. Audretsch, Mary Walshok, 2013-02-01 Although competitiveness is typically associated with firms, they are not the only organizational body whose performance is dependent upon competitiveness. This poignant and insightful book focuses on how the varied economic performance of cities and regions, both within nations as well as across nations, during the era of the Great Recession also highlights the need for competitiveness. Competitive cities and regions enjoy a superior economic performance, while their less competitive counterparts experience poorer economic growth and increasing unemployment. Using leading frameworks, this study provides applications and case studies about what shapes the competitiveness of places in an international context. Specific policies that enhance local competitiveness are identified and analyzed. Scholars of regional economics, urban economics, urban planning and public policy as well as

policymakers will find plenty of invaluable information in this invigorating book.

The Korean Paradox Marco Milani, Antonio Fiori, Matteo Dian, 2019-05-24 Bringing together an international line up of contributors, this book examines South Korea's foreign policy strategies designed to cope with the challenges of the post-Cold War regional order and the emergence of a Korean paradox. Focusing on non-material factors in shaping the decision-making processes of primary actors, such as traditions, beliefs, and identities, this book begins by analysing the emergence of the Asian Paradox and explores how different political traditions have influenced South Korea's foreign and security policies. In the second part (from Chapter 4), this book goes on to deal directly with the key issues in South Korea's foreign policy today, with an emphasis on the progressive and conservative approaches to the challenges the country faces. This includes the North Korean threat, the alliance with the U.S., relations with China and Russia, the complicated relationship with Japan, and the emerging role of South Korea outside of Northeast Asia. An innovative study of the domestic sources of South Korean foreign policy, *The Korean Paradox* investigates South Korea's growing role at both regional and global levels. As such, it will be useful to students and scholars of Korean Studies, International Relations and East Asian Studies more generally.

Social Trust and Economic Development O. Yul Kwon, 2019 In just one generation, South Korea has transformed from a recipient of foreign aid to a member of the G20. In this informative book, South Korea is used as a case by which to explore and illustrate specific issues arising from the complex relationships between the nation's economic development and society. p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 10.0px Arial}

Intermediate Microeconomics Samiran Banerjee, 2014-09-15 *Intermediate Microeconomics: A Tool-Building Approach* is a clear and concise, calculus-based exposition of current microeconomic theory essential for students pursuing degrees in Economics or Business. This beautifully-presented and accessible text covers all the essential topics that are typically required at the intermediate level, from consumer and producer theory to market structure (perfect competition, monopoly and oligopoly). Topics covered include risk, game theory, general equilibrium and externalities, asymmetric information, and public goods. Using numerical examples as well as sophisticated and carefully designed exercises, the book aims to teach microeconomic theory via a process of learning-by-doing. When there is a skill to be acquired, a list of steps outlining the procedure is provided, followed by an example to illustrate how this procedure is carried out. Once the procedure has been learned, students will be able to solve similar problems and be well on their way to mastering the skills needed for future study. *Intermediate Microeconomics* presents a tremendous amount of material in a concise way, without sacrificing rigor, clarity or exposition. Through use of this text, students will acquire both the analytical toolkit and theoretical foundations necessary in order to take upper-level courses in industrial organization, international trade, public finance and other field courses. Instructors that would like to consider *Intermediate Microeconomics: A Tool-Building Approach* for course adoption

Rekindling the Strong State in Russia and China ,2020-04-20 Rekindling the Strong State in Russia and China offers a thorough analysis of the profound regeneration of the State and its intense interaction with the external projections of Russia and China. In the international political scene, leaderships are under constant negotiation. Financial crisis, social and cultural transformations, values setting and migration flows have a deep impact on global powers, leading to the appearance of new actors. At present, the assumed rise of a new axis between two emerging powers, such as Russia and China, effaces their different backgrounds, leading to misinterpretations of their positioning in the geopolitical arena. This book is an essential and multifaceted guide aimed at understanding the deep changes that affect these two countries and their global aspirations. Contributors are: Marco Puleri; Andrea Passeri; Marco Balboni; Carmelo Danisi; Mingjiang Li; Mahalakshmi Ganapathy; Rosa Mulè; Olga Dubrovina; Evgeny Mironov; Yongshun Cai; Vasil Sakaev; Eugenia Baroncelli; Sonia Lucarelli; Nicolò Fasola; Stefano Bianchini; Stanislav Tkachenko; Vitaly Kozyrev; Marco Borraccetti; Francesco Privitera; Antonio Fiori, Massimiliano Trentin; Arrigo Pallotti; Giuliana Laschi; Michael Leigh.
