**Le droit à la mort** Claude Guillon,2010-03-03 C'est à peine si la loi Leonetti de 2005 reconnaît le droit de mourir aux mourants ! On peut désormais laisser mourir , de faim et de soif, les 150 000 agonisant(e) s que l'on débranche chaque année, mais le geste euthanasique, l'assistance au suicide et l'information sur ses moyens techniques demeurent interdits. Merveilleux progrès de l'humanisme démocrate ! La question, fondamentale, du droit à disposer de son corps et de sa vie jusqu'à la mort reste entière depuis la publication de Suicide, mode d'emploi , en 1982. Il est exceptionnel qu'un succès de librairie fasse contre lui l'unanimité de la presse, des autorités religieuses, civiles et judiciaires. C'est pourtant le destin d'un ouvrage, vendu à plus de 100 000 exemplaires, traduit en sept langues et finalement retiré de la circulation par décision de justice. Claude Guillon analyse le scandale qu'entraîna cette publication et donne à lire des extraits de lettres, choisies parmi plus de 600 reçues, qui sont une correspondance d'amitié, et parfois d'amour. Toutes parlent de la souffrance et de la mort avec une émotion, un humour et un sang-froid dont sont incapables les suicidologues .

**Postvention in Action** Karl Andriessen,Karolina Krysinska,Onja Grad,2019-12-09 A unique and comprehensive handbook presenting the state of the art in suicide bereavement support Suicide is not merely the act of an individual; it always has an effect on others and can even increase the risk of suicide in the bereaved. The International Association for Suicide Prevention, the World Health Organisation, and others have recognized postvention as an important strategy for suicide prevention. This unique and comprehensive handbook, authored by nearly 100 international experts, including researchers, clinicians, support group facilitators, and survivors, presents the state of the art in suicide bereavement support. The first part examines the key concepts and the processes that the bereaved experience and illustrates them with illuminating clinical vignettes. The second and third parts look in detail at suicide bereavement support in all the relevant settings (including general practices, the workplace, online and many others) as well as in specific groups (such as health care workers). In the concluding section, the support provided for those bereaved by suicide in no less than 23 countries is explored in detail, showing that postvention is becoming a worldwide strategy for suicide prevention. These chapters provide useful lessons and inspiration for extending and improving postvention in new and existing areas. This unique handbook is thus essential reading for anyone involved in suicide prevention or postvention research and practice.

**Georges Perec: A Life in Words** David Bellos, 2010-11-30 It's hard to see how anyone is ever going to better this User's Manual to the life of Georges Perec - Gilbert Adair, Sunday Times Winner of the Prix Goncourt for Biography, 1994 George Perec (1936-82) was one of the most significant European writers of the twentieth century and undoubtedly the most versatile and innovative writer of his generation. David Bellos's comprehensive biography - which also provides the first full survey of Perec's irreverent, polymathic oeuvre - explores the life of an anguished, comical and endearingly modest man, who worked quietly as an archivist in a medical research library. The French son of Jewish immigrants from Poland, he remained haunted all of his life by his father's death in the war, fighting to defend France, and his mother's in Auschwitz-Birkenau. His acclaimed novel *A Void* (1969) - written without using the letter e - has been seen as an attempt to escape from the words père, mere, and even George Perec. His career made an auspicious start with *Things: A Story of the Sixties* (1965), which won the Prix Renaudot. He then pursued an idiosyncratic and ambitious literary itinerary through the intellectual ferment of Paris in the 1960s and 1970s. He belonged to the *Ouvrier de Littérature Potentielle* (OuLiPo), a radically inventive group of writers whose members included Raymond Queneau and Italo Calvino. Perec achieved international celebrity with *Life A User's Manual* (1978), which won the Prix Medicis and was voted Novel of the Decade by the Salon du Livre. He died in his mid-forties after a short illness, leaving a truly puzzling detective novel, *53 Days*, incomplete. Professor Bellos's book enables us at once to relish the most wilfully bizarre aspects of Perec's oeuvre and to understand the whys and wherefores of his protean nature - Jonathan Romney, Literary Review

**Suicide Risk Assessment and Prevention** Maurizio Pompili, 2022-12-19 This book explores suicide prevention perspectives from around the world, considering both professionals' points of view as well as first-person accounts from suicidal individuals. Scholars around the globe have puzzled over what makes a person suicidal and what is in the minds of those individuals who die by suicide. Most often the focus is not on the motives for suicide, nor on the phenomenology of this act, but on what is found from small cohorts of suicidal individuals. This book offers a tentative synthesis of a complex phenomenon, and sheds some light on models of suicide that are less frequently encountered in the literature. Written by international experts, it makes a valuable contribution to the field of suicidology that appeals to a wide readership, from mental health professionals to researchers in suicidology and students.

Le Droit à la mort Claude Guillon, 2010-03-17 C'est à peine si la loi Leonetti de 2005 reconnaît le droit de mourir aux mourants ! Merveilleux progrès de l'humanisme démocrate ! **Suicide and Its Prevention** René F. W. Diekstra, 1989 In many countries of the world the number of persons that commit or attempt suicide has risen considerably over the past two decades. Particularly among young people suicide rates have increased dramatically, suicide now ranking as the second or third cause of death among them. The causes of this development have been questioned by health care workers, scientists and policy makers. Although much still remains unknown, it has become increasingly clear that one way in which a society affects the probability that an individual will die by his or her own hand is through the attitudes it adopts towards suicide. Modern society confronts people more and more often with attitudes and models, such as in the mass media, that express a permissive stance towards voluntary death in a variety of circumstances. Evidence suggest that imitation might indeed play a significant role in the frequency of suicide. A related aspect is the attitudes care givers entertain themselves towards suicide. This affects both the way in which they approach and treat individuals in suicidal crisis as well as the readiness of these individuals to look for professional help. The present volume presents an overview of important recent work on the influences of societal and care givers' attitudes on suicide as well provoking premature suicidal deaths.
