New York (N.Y.). Board of Education

Emotive Language in Argumentation Fabrizio Macagno, Douglas Walton, 2014-02-24 This book analyzes the uses and implicit dimensions of emotive language from a pragmatic, dialectical, epistemic and rhetorical perspective.

The Get-Passives as an Emotive Language Device Norman Knabe, 2009 Seminar paper from the year 2008 in the subject English Language and Literature Studies - Linguistics, grade: 2, University of Hamburg, course: Language and Emotion, language: English, abstract: With forming a passive-voiced sentence out of an active-voiced sentence, certain elements of a situation shall be emphasized. By making the recipient of the active-voiced form the grammatical subject of the passive-voiced sentence, its focus becomes reinforced due to the sentence-initial position. The passive is thus favoured over the active form when the receiver of an action (recipient) should be focused rather than the performer (agent) of the action. Next to the greater emphasis of the active-voice object, the passive is used to stress the result of an action (which is supported by the possibility of omitting the agent). The structure be + past participle can be considered as the norm for English passives. Since the passive meaning is essentially expressed by past participles, be in the structure can also be replaced by other verbs such as get, become, remain etc. Considering be- and get-passives, there seems to be no obvious difference between the two forms. However, the get-passive would not be used at all unless it had a different meaning in comparison to the be-passive. This paper aims to explore what the distinctive feature of the get-passive is. A major contribution to answer this question comes from Hübler who claims that the get-passive is used as means of an emotive language device. I will focus mainly, though not exclusively, on his contribution *The Expressivity of Grammar*. While many authors (Hatcher, Lakoff, Collins etc.) have tried to analyse the difference in meaning of the two passive forms, Hübler seems to have covered and united most of the theories, leading to the conclusion that the get-passive is used to express emotional attachment. His theory is depicted in detail in the following chapter. This paper should furthermore serve to test Hübler's (someh

GCSE English Language for AQA Progress Student Book Clare Constant, Imelda Pilgrim, Bernard Ward, 2015-06-04

Specifically written for the AQA GCSE English language specification for first teaching from 2015, this student book is designed for students to progress to grade 5, with extension activities to facilitate achievement beyond this. With progress at its heart, this differentiated resource covers a range of 19th-, 20th-, and 21st-century texts and has spelling, punctuation, and grammar support integrated throughout.

Language and Emotion. Volume 1 Gesine Lenore Schiewer, Jeanette Altarriba, Bee Chin Ng, 2022-11-07 The Handbook consists of four major sections. Each section is introduced by a main article: Theories of Emotion – General Aspects Perspectives in Communication Theory, Semiotics, and Linguistics Perspectives on Language and Emotion in Cultural Studies Interdisciplinary and Applied Perspectives The first section presents interdisciplinary emotion theories relevant for the field of language and communication research, including the history of emotion research. The second section focuses on the full range of emotion-related aspects in linguistics, semiotics, and communication theories. The next section focuses on cultural studies and language and emotion; emotions in arts and literature, as well as research on emotion in literary studies; and media and emotion. The final section covers different domains, social practices, and applications, such as society, policy, diplomacy, economics and business communication, religion and emotional language, the domain of affective computing in human-machine interaction, and language and emotion research for language education. Overall, this Handbook represents a comprehensive overview in a rich, diverse compendium never before published in this particular domain.

Emotive Language in Argumentation Fabrizio Macagno, Doug Walton, 2013 This book analyzes the uses of emotive language and redefinitions from pragmatic, dialectical, epistemic and rhetorical perspectives, investigating the relationship between emotions, persuasion and meaning, and focusing on the implicit dimension of the use of a word and its dialectical effects. It offers a method for evaluating the persuasive and manipulative uses of emotive language in ordinary and political discourse. Through the analysis of political speeches (including President Obama's Nobel Peace Prize address) and legal arguments, the book offers a systematic study of emotive language in argumentation, rhetoric, communication, political science and public speaking.

The Psychological Background of Writing Harry Willard Reninger, Norman Raymond Frederick Maier, 1928

Concise Encyclopedia of Philosophy of Language P. Lamarque, R. E. Asher, 1997-12-17 Philosophers have had an interest in language from the earliest times but the twentieth century, with its so-called 'linguistic turn' in philosophy, has seen a huge expansion of work focused specifically on language and its foundations. No branch of philosophy has been unaffected by this shift of emphasis. It is timely at the end of the century to review and assess the vast range of issues that have been developed and debated in this central area. The distinguished international contributors present a clear, accessible guide to the fundamental questions raised by the philosophers about language. Contributions include Graeme Forbes on necessity, Susan Haack on deviant logics, Paul Horwich on truth, Charles Travis on Wittgenstein, L.J. Cohen on

linguistic philosophy, Ruth Kempson on semantics and syntax and Christopher Hookway on ontology, to name but a few. A wide range of topics are covered from the metaphysics and ontology of language, language and mind, truth and meaning, to theories of reference, speech act theory, philosophy of logic and formal semantics. There are also articles on key figures from the twentieth century and earlier. Based on the foundation provided by the award-winning Encyclopedia of Language and Linguistics this single volume provides a collection of articles that will be an invaluable reference tool for all those interested in the area of philosophy of language, and also to those in cognitive science and psychology. All the articles have been thoroughly revised and updated. This volume gives a unique survey of topics that are at the very core of contemporary philosophy.

The Science of Rhetoric David Jayne Hill, 1877

Gender and Emotional Language in Children's TV Series. An Analysis of "Avatar: The Last Airbender" Bettina Breitenberger, 2014-10-27 Seminar paper from the year 2013 in the subject English Language and Literature Studies - Linguistics, grade: 2,3, University of Augsburg, language: English, abstract: As TV series can have a big impact on children's development, it is the purpose of this term paper to examine, whether gender-specific stereotypes in regard to emotions can actually be found, or whether the claim that TV series are stereotyped is a prejudice itself. Therefore, the characters' emotional language in Avatar: The Last Airbender will be analyzed. It will be closely looked at, whether both genders are associated with differing types and amounts of emotion talk. Due to the results of several researchers, it was expected that female and male characters display emotions considered appropriate for their sex in order to provide children with idealized gender role models to imitate. As research sees a relationship between showing gender-conform emotions and popularity among peers, it was furthermore anticipated that fans of the series would vote those characters most popular that show emotions considered appropriate for their sex.
