The 20th Century's Greatest Hits Paul Williams, 2000-10-06 The book that will make you think about the 20th Century. This book lists and discusses the top 40 artistic events of the 20th century, using a quirky and personal list created by Paul Williams, which is illuminated by forty short essays discussing his choices. That alone would suffice. But in addition, Williams has created an entertaining, readable book-length work on personal and subjective responses to art. Everybody loves top-40 lists: Will it have your own secret favorites on it? Or will there be some stuff you never heard of? Or hate? Bob Dylan? Sure, but what by Dylan? Every list provokes delight and danger and, if it is a good one, illumination and surprise. Paul Williams's lists mixes high art and popular culture, and is sure to leave no one who reads it unmoved. But a list only takes one page--and the rest of this book is Williams's thoughts on how everyday people connect with art and performance, subjects on which Williams is brilliant, insightful, and entertaining. This is a good and serious book that is fun to read. At the publisher's request, this title is being sold without Digital Rights Management software (DRM) applied.

Imagining Outer Space Alexander C.T. Geppert, 2018-04-25 Imagining Outer Space makes a captivating advance into the cultural history of outer space and extraterrestrial life in the European imagination. How was outer space conceived and communicated? What promises of interplanetary expansion and cosmic colonization propelled the project of human spaceflight to the forefront of twentieth-century modernity? In what way has West-European astroculture been affected by the continuous exploration of outer space? Tracing the thriving interest in spatiality to early attempts at exploring imaginary worlds beyond our own, the book analyzes contact points between science and fiction from a transdisciplinary perspective and examines sites and situations where utopian images and futuristic technologies contributed to the omnipresence of fantasmatic thought. Bringing together state-of-the-art work in this emerging field of historical research, the volume breaks new ground in the historicization of the Space Age.

Dinosaurs in Fantastic Fiction Allen A. Debus, 2013-03-25 From the first illustrated edition of Jules Verne's Journey to the Center of the Earth in 1867, dinosaurs and prehistory have fascinated readers. Writers would time and again come back to dinosaurs as an element of fantastic fiction, often using these creatures--through the venue of the written word--to reflect the world of the writers' own time. This literary survey examines how paleoliterature originated, developed and matured to the present day. Also discussed are the ways in which dinosaur fiction mirrors contemporary ideas about subjects such as geology, the Cold War, environmentalism, time travel, evolution and bioengineering. Featured authors include Ray Bradbury, H.G. Wells, and Poul Anderson, among others. In select cases, the novelizations of movie scripts are also examined. An appendix provides brief summaries of deserving dinosaur texts.
