Authors in the News Barbara Nykoruk, 1976 A compilation of news stories and feature articles from American newspapers and magazines covering writers and other members of the communications media.

Images of America in Scandinavia Poul Houe, Sven Hakon Rossel, 1998 The subject of Images of America in Scandinavia, the first comprehensive study of its kind, is as multifaceted, complex, and overwhelming as America or the United States, itself. It concerns the nature and function, reality and fiction of such images in Denmark, Norway, and Sweden past and present. The book is intended to be a source of solid information as well as a starting point for further inquiries into its cultural territory. Part of its focus is on images of America rooted in printed sources, but, in addition, general surveys of other cultural signs of America in the Scandinavian countries present a broader picture and provide some of the background for the predominantly literary images. Issues such as government and politics, popular and vanguard music and art, and socio-cultural institutions intermittently come to the fore. Framing the volume's three pairs of national surveys is an introductory chapter, which addresses the entire subject from a bird's-eye view, and a concluding chapter, which, by contrast, delves into the cross-fire of sentiments defining people whose images of America, are both American and Scandinavian. The discussion of America as perceived in Scandinavia sheds new light on intriguing inter-Scandinavian cultural distinctions and borderlines. Countless books and articles, methods and theories, have been devoted to the study of national and cultural identity. Still, the exchanges between such identities and the images they engender - so indispensable for the participants in a global culture - remain clouded by many misconceptions. Images of America in Scandinavia whose editors and authors all have Scandinavian backgrounds, will contribute an improved understanding of the cultural interplay between Scandinavia and the United States of America.

Encyclopedia of Activism and Social Justice Gary L. Anderson, Kathryn G. Herr, 2007-04-13 This is an important historical period in which to develop communication models aimed at creating opportunities for citizens to find a voice for new experiences and social concerns. Such basic social problems as inequality, poverty, and discrimination pose a constant challenge to policies that serve the health and income needs of children, families, people with disabilities, and the elderly. Important changes both in individual values and civic life are occurring in the United States and in many other nations. Recent trends such as the globalization of commerce and consumer values, the speed and personalization of communication

technologies, and an economic realignment of industrial and information-based economies are often regarded as negative. Yet there are many signs - from the WTO experience in Seattle to the rise of global activism aimed at making biotechnology accountable - that new forms of citizenship, politics, and public engagement are emerging. The Encyclopedia of Activism and Social Justice presents a comprehensive overview of the field with topics of varying dimensions, breadth, and length. This three-volume Encyclopedia is designed for readers to understand the topics, concepts, and ideas that motivate and shape the fields of activism, civil engagement, and social justice and includes biographies of the major thinkers and leaders who have influenced and continue to influence the study of activism. Key Features Offers multidisciplinary perspectives with contributions from the fields of education, communication studies, political science, leadership studies, social work, social welfare, environmental studies, health care, social psychology, and sociology Provides an easily recognizable approach to topics, ideas, persons, and concepts based on alphabetical and biographical listings in civil engagement, social justice, and activism Addresses both small-scale social justice concepts and more large-scale issues Includes biography pieces indicating the concepts, ideas, or legacies of individuals and groups who have influenced current practice and thinking such as John Stuart Mill, Rachel Carson, Mother Jones, Martin Luther King, Jr., Karl Marx, Mohandas Gandhi, Nelson and Winnie Mandela, Dorothy Day, and Thomas Merton
