web a classificationneuralnetwork object is a trained feedforward and fully connected neural network for

classification the first fully connected layer of the neural network has a connection from the network input predictor data  $x$  and each subsequent layer has a connection from the previous layer

### **convolutional neural network cnn 7 layers image classification** - Feb 26 2022

web show more this example shows how to create and train a simple convolutional neural network for deep learning classification convolutional neural networks are essential tools for deep learning

### **matlab deep learning github** - Nov 06 2022

web pinned matlab deep learning model hub public discover pretrained models for deep learning in matlab matlab 326 74 image classification in matlab using tensorflow public this example shows how to call a tensorflow model from matlab using co execution with python matlab 41 17 image classification in matlab

### **matlab code for convolutional neural networks** - Jan 28 2022

web nov 18 2017 i am using matlab to train a convolutional neural network to do a two class image classification problem i have an imbalanced data set 1800 images minority

class 5000 images majority class as i understand it the `spliteachlabel` function will split the data into a train set and a test set
