**The Taoist Canon** Kristofer Schipper, Franciscus Verellen, 2019-09-01 Taoism remains the only major religion whose canonical texts have not been systematically arranged and made available for study. This long-awaited work, a milestone in Chinese studies, catalogs and describes all existing texts within the Taoist canon. The result will not only make the entire range of existing Taoist texts accessible to scholars of religion, it will open up a crucial resource in the study of the history of China. The vast literature of the Taoist canon, or Daozang, survives in a Ming Dynasty edition of some fifteen hundred different texts. Compiled under imperial auspices and completed in 1445—with a supplement added in 1607—many of the books in the Daozang concern the history, organization, and liturgy of China's indigenous religion. A large number of works deal with medicine, alchemy, and divination. If scholars have long neglected this unique storehouse of China's religious traditions, it is largely because it was so difficult to find one's way within it. Not only was the rationale of its medieval classification system inoperable for the many new texts that later entered the Daozang, but the system itself was no longer understood by the Ming editors; hence the haphazard arrangement of the canon as it has come down to us. This new work sets out the contents of the Daozang chronologically, allowing the reader to follow the long evolution of Taoist literature. Lavishly illustrated, the first volume ranges from antiquity through the Middle Ages, while the second spans the modern period. Within this frame, texts are grouped by theme and subject. Each one is the subject of a historical abstract that

identifies the text's contents, date of origin, and author. Throughout the first two volumes, introductions outline the evolution of Taoism and its spiritual heritage. A third volume offering biographical sketches of frequently mentioned Taoists, multiple indexes, and an extensive bibliography provides critical tools for navigating this guide to one of the fundamental aspects of Chinese culture.

*The Taoist I Ching* Lui I-ming, 2005-05-03 The I Ching , or Book of Change, is considered the oldest of the Chinese classics and has throughout history commanded unsurpassed prestige and popularity. Containing several layers of text and given numerous levels of interpretation, it has captured continuous attention for well over two thousand years. It has been considered a book of fundamental principles by philosophers, politicians, mystics, alchemists, yogins, diviners, sorcerers, and more recently by scientists and mathematicians. This first part of the present volume is the text of the I Ching proper—the sixty-four hexagrams plus sayings on the hexagrams and their lines—with the commentary composed by Liu I-ming, a Taoist adept, in 1796. The second part is Liu I-ming's commentary on the two sections added to the I Ching by earlier commentators, believed to be members of the original Confucian school; these two sections are known as the Overall Images and the Mixed Hexagrams. In total, the book illuminates the Taoist inner teachings as practiced in the School of Complete Reality. Well versed in Buddhism and Confucianism as well as Taoism, Liu I-ming intended his work to be read as a guide to comprehensive self-realization while living an ordinary life in the world. In his attempt to lift the veil of mystery from the esoteric language of the I Ching , he employs the terminology of psychology, sociology, history, myth, and religion. This commentary on the I Ching stands as a major contribution to the elucidation of Chinese spiritual genius.

*The Taoist Classics, Volume Four* Thomas Cleary, 2003-02-11 This collection of Taoist texts includes: • The Taoist I Ching: The classic Book of Change illuminated by the commentary of the eighteenth- and nineteenth-century Taoist adept Liu I-ming. The first part of the book is the text of I Ching proper with Liu's commentary. The second part is Liu's commentary on two additional sections—known as the Overall Image and the Mixed Hexagrams—added to the I Ching by earlier commentators, believed to be members of the original Confucian school. In total, the book illuminates the Taoist inner teachings as practiced in the School of Complete Reality. • I Ching Mandalas: A traditional program of study that enables students of the I Ching to achieve a deeper understanding of the meaning of this great classic. I Ching Mandalas presents diagrams as tools for whole-brain learning that help the student to visualize patterns and interrelationships among the trigrams and hexagrams of the I Ching.
