Aproximaciones Criminológicas. Una Perspectiva Policial de la Delincuencia en Ecuador Marcelo López Amores,2022-11-19 La presente obra constituye un trabajo orientado a la comprensión básica del delito y la delincuencia, por lo que hurga en varios aspectos, conceptos y fundamentos del quehacer criminológico, con el propósito de encontrar elementos técnicos que sirvan de sustento para el análisis del fenómeno delictual. También se realizan ciertos ensayos elementales sobre algunos postulados o teorías, con el fin de comprobar a priori los fundamentos expuestos en ellas, por lo que los resultados obtenidos son relaciones básicas de estos intentos por articular la teoría con la práctica; por lo cual, deben ser tratados, estudiados y verificados con mayores elementos y rigurosidad; sin embargo, busca incidir en la necesidad por generar un conocimiento criminal ajustado a la realidad ecuatoriana con base en el conocimiento científico.

Psicopatología forense Eric García-López,2022-08-17 Este libro representa el panorama más actualizado de la Psicología Jurídica, Criminológica y Forense en América Latina. Para crearlo, el Director de la obra convocó investigadores de 40 instituciones (universidades, fiscalías, poderes judiciales y centros de investigación) de Alemania, Argentina, Canadá, Chile, Colombia, España, Estados Unidos y México. Científicos del comportamiento humano (psicólogos, neuropsicólogos y neurofisiólogos), juristas expertos y forenses de rotunda experiencia, analizan conceptos y aplicaciones a poblaciones específicas, como los agresores sexuales, los adolescentes en conflicto con la ley penal y los psicópatas. Además, se analizan temas selectos de justicia restaurativa, violencia intrafamiliar, divorcio y custodia de los hijos, alienación parental, mediación, acoso (laboral-mobbing y escolar-bullying), así como la atención y evaluación general a víctimas de tortura. El lector tiene en sus manos una obra imprescindible para aquellos estudiosos(as) de las complejas interacciones entre psicopatología y derecho, entre atención a víctimas y derechos humanos, entre agresores y prevención del riesgo de violencia, entre comportamiento humano y tribunales de justicia.

Child Grooming: el embaucamiento de menores en la era del Metaverso y la Inteligencia Artificial Alfredo Abadías Selma,2024-05-09 En un momento histórico de avances tecnológicos imparables, la humanidad dispone de grandes

oportunidades y desafíos que debe gestionar. Así pues, en el presente estudio, partiendo de una introducción contextual se pretende llevar a cabo una profunda exégesis del artículo 183 del Código penal español, que castiga el delito de embaucamiento de menores o «child grooming». Se realiza un estudio dogmático con apuntes criminológicos de los elementos estructurales del delito que indicamos con el sustento de la doctrina científica más actual y especializada, así como con la aportación de la jurisprudencia más relevante y representativa. Todo ello persigue, como corolario, la aportación de una serie de conclusiones y propuestas, algunas de lege ferenda, para regular un delito que podemos afirmar que posiblemente ha pasado demasiado desapercibido ante la última y polémica reforma de los delitos contra la libertad sexual. Además, y como contenido editorial diferencial y pionero en esta materia se incorpora una serie de consideraciones entorno a la problemática que comporta la inteligencia artificial en este ámbito delictivo.

Ciencia forense y contrainterrogatorio Eliseo Lázaro Ruiz, 2020-05-26 La ciencia forense ha recobrado importancia en México a partir de la reforma constitucional del 2008. No obstante, en la literatura de la materia se han generado explicaciones contrapuestas en relación a la conceptualización, metodología y legitimación de la ciencia forense en el procedimiento penal. En esta obra, Eliseo Lázaro Ruiz, investigador titular del INACIPE, analiza los paradigmas académicos actuales sobre ciencia forense y ciencias forenses. Además, aborda los debates más recientes sobre la idoneidad y la evidencia científica en el proceso pericial. A partir de una revisión del estado del arte de los servicios periciales, el autor propone un modelo metodológico para realizar contrainterrogatorios basado en tres elementos: perito, peritaje y perístasis. Esta propuesta hace énfasis en la idoneidad pericial, los estándares científicos internacionales para validar el peritaje y el análisis de la incertidumbre científica.

A War that Can't Be Won Tony Payan, Kathleen Staudt, Z. Anthony Kruszewski, 2013-10-17 More than forty years have passed since President Richard Nixon described illegal drugs as “public enemy number one” and declared a “War on Drugs.” Recently the United Nations Global Commission on Drug Policy declared that “the global war on drugs has failed with devastating consequences for individuals and societies around the world.” Arguably, no other country has suffered as much from the War on Drugs as Mexico. From 2006 to 2012 alone, at least sixty thousand people have died. Some experts have said that the actual number is more than one hundred thousand. Because the war was conceived and structured by US policymakers and officials, many commentators believe that the United States is deeply implicated in the bloodshed. *A War that Can't Be Won* is the first book to include contributions from scholars on both sides of the US-Mexico border. It provides a unique breadth of perspective on the many dimensions of the societal crisis that affects residents of both nations—particularly those who live and work in the borderlands. It also proposes practical steps toward solving a crisis that

shows no signs of abating under current policies. Each chapter is based on well-documented data, including previously unavailable evidence that was obtained through freedom-of-information inquiries in Mexico. By bringing together views from both sides of the border, as well as from various academic disciplines, this volume offers a much wider view of a complex problem—and possible solutions.
